特殊高中入學
學生及家長/監護人須知

這份2018-2019學年特殊高中學生手冊含有以下實用資訊：

- 特殊高中入學程序
- 報名參加特殊高中入學測驗（簡稱SHSAT）和拉瓜地亞音樂和藝術及演藝高中（拉瓜地亞高中）表演面試
- SHSAT測試和拉瓜地亞高中表演面試特別照顧的確認
- 重要日期的日曆
- 樣本SHSAT試題及應試技巧

紐約市共有九所特殊高中。分別是：

<table>
<thead>
<tr>
<th>入學由表演面試決定</th>
<th>FIORELLO H. LAGUARDIA HIGH SCHOOL OF MUSIC &amp; ART AND PERFORMING ARTS</th>
</tr>
</thead>
<tbody>

</table>

這些學校是根據紐約州法律2590G部分而設立的。除了拉瓜地亞高中是以競爭性的表演面試和學生學業記錄審查為依據錄取學生，其他學校都按SHSAT成績錄取學生。學生必須是紐約市居民並且目前就讀8年級或第一次就讀9年級，才能申請、報名、參加特殊高中入學測試（SHSAT）和拉瓜地亞高中的表演面試，並且收到測試和表演面試的結果。

有關特殊高中入學的最新消息，請瀏覽schools.nyc.gov/shs。

《特殊高中學生手冊》是紐約市教育局的項目。
THE BRONX HIGH SCHOOL OF SCIENCE
75 Bronx Science Boulevard, Bronx, New York 10468
電話：(718) 817-7700 ■ 網站：www.bxscience.edu
電子郵件：golanc@bxscience.edu
概览：布朗士科學高中 (The Bronx High School of Science) 以嚴謹的科學、技術、工程和數學 (簡稱 STEM) 課程體系為具有學業天賦的學生群體提供教育。所有學科均在質询的透視下授教，注重批判思考和解決問題的技能。學校培育多元化的終身學習者社區。在學生、教育工作者和校友的共同協作和支援網絡中，學生發掘自己的興趣。藍理論和應用學習的平衡，學生探索複雜問題，並利用學校所提拱的豐富資源想出解決方案。布朗士科學高中一直追求學術上的卓越，為學生進入頂尖的學院或大學做好準備。學校著名校友有八名諾貝爾得獎者和六名普立茲獎得奬者。

學術課程：布朗士科學高中開設30門大學先修 (Advanced Placement, 簡稱 AP) 課程和很多「AP後」課程 (即第二年大學課程)。學校開設有六門外語，還有生物學、化學、物理學、數學、人文、音樂等多門選修課，以及三年的 STEM 或社會科學獨立研究課程。學生也可以選擇計算機科學和工程方面的系列，這些課程強調科學原則實際操作的應用。學校網站提供全面的課程説明。

課外活動：課外活動包括70多個課後俱樂部、43支運動隊、一支享有國際聲譽的演講和辯論隊、模擬聯合國、模擬審判隊、兩個機器人小組、兩個劇場製作組、S!NG、科學奧林匹亞、青年成就、編程俱樂部、創客空間、兩個駭客馬拉松、校報、畢業紀念冊、學術期刊等。詳情請瀏覽我們的網站。

2018年錄取情況：19,715名學生在SHSAT將布朗士科學高中列作一項學校選擇，其中912名學生被錄取。

THE BROOKLYN LATIN SCHOOL
223 Graham Avenue, Brooklyn, New York 11206
電話：(718) 366-0154 ■ 網站：www.brooklynlatin.org
電子郵件：parents@brooklynlatin.org
概覽：以建校於2006年的著名波士頓拉丁學校 (Boston Latin School) 為模式，布碌崙拉丁學校 (Brooklyn Latin School/TBL) 開設人文教育課程和拉丁語教學。早期指導注重掌握主要學術科目的核心知識，學生將以此為基礎在更高年級進行更加深入的探討。國際學士 (International Baccalaureate, 簡稱 IB) 課程在世界上被廣泛認同為高中程度學習最嚴謹和最具綜合性的課程，是本校課程體系的重要構成部分。在所有課程中，學生體驗到結構化寫作和公開演講的突出和持續的強調，並擁有各種機會鍛煉自己的分析性思考，這一切都有助於他們應對來自大學學科的挑戰。

學業課程：所有學生均必須完成四年的拉丁語、歷史、數學、英語和科學學科的學習，並完成至少一門兩年的世界語言的學習和一年的藝術史學習。我們的許多課程提供公開演講鍛煉機會 (如演講和蘇格拉底式討論會) 和科學實驗室及數學試題集的口頭陳述機會。此外，我們的許多課程還設有寫作練習 (如科學實驗報告)、西班牙語作品集和散文、數學建模論文和拉丁文視譯。IB 課程對學生袓的質詢、全球視角、國際化思維和個人誠信的強調完美地適應本校建基所在的理想。除了嚴格的課堂課外，IB 課程強調獨立思考和社區參與。為獲得 IB 文憑，學生應完成一個獨立研究項目，並在項目結束時撰寫一篇自擬主題的 4,000 詞論文，這是一項與大學程度研究寫作密切相關的任務。他們必須學習一門持續兩年的認識論課程。這門名為「知識理論 (Theory of Knowledge/TOK)」的課程，指導學生考慮知識建構的方式；學生在課程結束時寫成一篇研究論文和進行演講。此外，學生必須參加涉及創意、服務和反思的活動，為期18個月。創意、行動和服務 (CAS) 可以包括在 TBL S 社群和更大的社群做志願工或參加有意義的活動。IB 文憑的這些要求有助於我們的學生成長為全面發展的世界公民。

課外活動：為了豐富學生的課外活動，並幫助學生完成其 CAS 項目的要求，TBL S 目前支援40多種課外活動，其中包括運動隊 (如男女生越野、足球、男子和女子籃球、男生角力和女生排球俱樂部)；美術和表演藝術相關活動包括工作室藝術、攝影、文學雜誌、舞蹈和人聲樂團；另有各種其他團體，如校報、STOKED、數學俱樂部、科學奧林匹亞、模擬聯合國、法律俱樂部等等。TBL S 還設有亞洲學生協會、黑人學生協會、女權主義學生聯盟、穆斯林學生協會、全國優秀生學會及 GSA 等學生組織。

2018年錄取情況：17,111名學生在SHSAT將 The Brooklyn Latin School 列作一項學校選擇，其中582名學生被錄取。
BROOKLYN TECHNICAL HIGH SCHOOL
29 Fort Greene Place, Brooklyn, New York 11217
電話: (718) 804-6400 網 站: www.bths.edu
電子郵件: info@bths.edu
概 覽: Brooklyn Technical High School (Brooklyn Tech) 擁有約 6,000 名學生，是全美最大的側重科學、技術、工程和數學 (STEM) 的公立高中。為了應對 21 世紀，學校的很多設施都已脫胎換骨。電腦室佈置為適合教授數碼設計，還配備了 3D 打印機。除擁有一個大型模擬法庭和一個取證科學實驗室外，學校還擁有最先進的製造和機器人、數碼媒體、DNA 和遺傳學、環境科學(包括溫室)、建築施工(建造兩層樓)、建築及航空(配有工業標準飛行模擬器)實驗室。學校是全國卓越的榜樣，擁有育人的良好環境，有助於过渡型教育及個人發展。得益於 STEM 合作機構的投入，我們的實驗室和教室與大學及行業標準不相上下。

2018 年錄取情況: 24,163 名學生在 SHSAT 將布碌崙科技列作一項學校選擇，其中 1,904 名學生被錄取。

HIGH SCHOOL FOR MATHEMATICS, SCIENCE AND ENGINEERING AT THE CITY COLLEGE OF NEW YORK
240 Convent Avenue, New York, New York 10031
電話: (212) 281-6490 網 站: www.hsmse.org
電子郵件: info@hsmse.org
概 覽: 紐約城市學院數理及工程高中 (The High School for Mathematics, Science and Engineering/HSMSE) 創辦於 2002 年 9 月，提供無與倫比的獨特協作教育體驗。學校使命在於激勵和培養學生的探究、寫作和口頭表達以及批判性思考的習慣。HSMSE 從全市五大行政區招收約 500 名學生，是紐約市數一數二多元化的學校。學校擁有嚴謹的學業環境，著重數學、科學和工程，同時強調作為內源動力的公民責任和知識價值。HSMSE 教職員工定期一起共同合作制定課程方案、制訂課程大綱，分享最佳教學方法。他們的精湛專業和個人經歷豐富著學習社群；很多教職人員都擁有博士學位，所有教學人員均擁有高級學位。成為教師之前，他們很多在商業、工程和其他領域取得了卓越成就。

HSMSE 員工定期開展個人和小組諮詢討論會，並協調開展 Big Sib/Little Sib 計劃，為高年級學生與低年級學生牽線搭橋，使前者成為後者的朋輩導師。因為與 The New York Foundling 的合作關係，HSMSE 建立了健康保健中心，並在中心配備一位專職心理健康醫師。HSMSE 主辦了具有總體主題的研討會，參會的工業合作機構派出了不同部門的發言人，以對某個特定工作或公司進行全方位的分析。參加的學生可以申請合作公司的暑期研究、見習和/或就業機會。
學業課程：HSMSE 教職員工規劃的課程包括學生討論和協作學習，旨在培養和提高學生的問題解決技能。所有學生都學習四年的數學和科學課程。核心課程隔天上 90 分鐘課，使學生有時間從事親自實踐的活動和展開深度的討論。學生每天都有一節 45 分鐘的選修強化課；課程選擇有：烹飪法、天文學、視軟辦公室用戶書、美術、詩歌寫作、爵士樂隊和古典吉他。學生在 10 年級春季時從三大專業中選擇一項：數學、西奈山（Mount Sinai）醫學生物醫學研究計劃或工程學。HSMSE 擁有紐約州最大規模的德語課程。學校以多種方式提供大學學分課程：大學先修（Advanced Placement）課程是由紐約城市學院（CCNY）和紐約市立大學（CUNY）「現在上大學」（College Now）計劃合作為符合資格的學生開設的紐約市立大學課程。在 HSMSE，我們努力培養全面發展的學生；因此除了一流的學術支援服務之外，還提供健康保健中心，並在中心配備一位全職心理健康醫師，以解決學生在社交情緒方面的需要。

課外活動：CCNY 的巴斯克維爾大廳（Baskerville Hall）面朝學院的方庭，使學生能在陽光明媚的日子，身處綠色環境中用午餐、交往和休息。學生可以在課後參與大量課外活動和公立學校體育聯盟（PSAL）的體育活動，包括美國少年政治家（Junior Statesmen of America）、EatNYC、歐洲挑戰賽、函授法、排球、舞蹈、啦啦隊和策略遊戲俱樂部。HSMSE 學生可參加歌德學院（Goethe Institute）和美國德語教師協會（American Association of Teachers of German）贊助的全國競賽，爭取到德國學習的機會。每一年，HSMSE 至少有一名學生能成功勝出，獲得到德國免費旅行兩個星期的機會。在學年中，HSMSE 舉辦到波士頓學院、麻省理工學院、普林斯頓、布朗大學和密歇根大學等學校參觀活動。

2018 年錄取情況：19,856名學生在SHSAT將紐約城市學院數理及工程高中列作一項學校選擇，其中 149名學生被錄取。
為學生提供「全人」教育。除了注重學業外，學校還強調文科以及學生人際交往、協作及溝通技巧方面的培養。我們相信，透過學業準備及注重軟技能，學生會成為終身學習者和獨立思考者，並為我們的社會做出巨大貢獻。

**學業課程**
開設的課程每年會有變化。全部都是進階或榮譽課程。課程計劃內容廣泛，包括所有學科的大學先修機會，如生物學、微積分 AB、微積分 BC、化學、中文、英語與作文、環境科學、物理學、西班牙語、美國歷史、物理學 C 及世界歷史。學校開設了所有科目的各種選修課，還有美術、音樂和語言課程。此外，學生還有機會參加科學和數學研究課程，接受大學教授的指導。學生有機會參加紐約市立大學（CUNY）的「現在上大學」（College Now）課程，包括生物學、社會學、健康服務和健康、微積分預科以及心理學。在這種育人的環境下，學生可得到老師、輔導員和同學的進一步幫助。

**課外活動**
由於本校設於約克學院的校園內，學生可以在高中時享用一流的設施，例如約克學院的圖書館、體育館、游泳池、劇院和食堂。學生可以參加各種俱樂部（具體開設情況取決於學生建議和教職工的能力），包括辯論、國際特赦、無仇恨（No Place for Hate）、Veritas（文學雜誌）、Key Club、機械人、籃球、攝影及許多其他俱樂部。學生有機會參加實習、社區服務、科學、數學及美術比賽。學生有機會參加紐約市立大學（CUNY）的「現在上大學」（College Now）課程，包括生物學、社會學、健康服務和健康、微積分預科以及心理學。在這種育人的環境下，學生可得到老師、輔導員和同學的進一步幫助。

2018年錄取情況：16,823名學生在SHSAT將約克學院皇后區科學高中列作一項學校選擇，其中151名學生被錄取。

**STATEN ISLAND TECHNICAL HIGH SCHOOL**
485 Clawson Street, Staten Island, New York 10306
電話：(718) 667-3222 網站：www.siths.org
電子郵箱：BMalenfant@schools.nyc.gov

概覽：史丹頓島科技高中（Staten Island Technical High School）的大學預備課程提供豐富的人文課程，包括科學、技術、工程、藝術和數學（STEAM）課程以及最前沿的職業及技術教育（CTE）課程。所有學生都將參加高度創新的 1:1 - BYOD 數位教育創新計劃。60% 以上的教師執教大學先修課程（簡稱 AP）以及其他大學程度課程。

學業課程：學生學習四年的數學課程及所有學科領域的大量 STEAM、大學先修（AP）課程與雙註冊課程。並能夠選擇參與科學及工程研究（Science & Engineering Research）計劃。這個計劃讓參與者參加紐約市科技及工程展（NYC Science and Engineering Fair）、雷根納榮科學獎（Regeneron Science Talent Search）、Google 和生活品質（Quality of Life）諸項競賽，因此其學習程度超出核心課程的學習。所有九年級學生將學習一門進級寫作（Intensive Writing）課程和大學委員會制訂的與共同核心相一致的英文「跳板」（Springboard）英語藝術課程。這些課程幫助所有學生為 AP 語言及 AP 文學和作文課程以及 SAT 的學習做準備。所有學生在畢業時至少會通過兩門或三門 AP 社會研究課程，並學習三年的俄語課程。

工程預科 STEAM 課程涵蓋機器人學、AutoCAD、數碼 - 模擬電子學、電視演播廳工程、IT 滑鼠小隊和電腦科學課程以及一個龐大的工作學習大學和職業探索（Work Based Learning College and Career Exploration）系列。這一探索系列擁有職業討論、工作跟隨學習、職業和大學展覽會以及實習。所有學生都學習工程預科 STEAM 課程。

學校與紐約市立大學「現在上大學」（College Now）課程、紐約州立大學高中機會（SUNY University in the High School）、聖約翰大學「大學優勢」（College Advantage）及聖洛斯學院（College of St. Rose）合作，為學生提供獲得在畢業時修得15到60個大學學分的機會。

2018年錄取情況：16,007名學生在SHSAT將史丹頓島科技高中列作一項學校選擇，其中326名學生被錄取。

**STUYVESANT HIGH SCHOOL**
345 Chambers Street, New York, New York 10282-1099
電話：(212) 312-4800 網站：www.stuy.edu
電子郵箱：02M475@schools.nyc.gov

概覽：史岱文森高中（Stuyvesant High School）的使命是為學生提供嚴謹學業課程，培養和激發學生的智力探索興趣。雖然史岱文森高中一向以其數學、科學和科技教學之...
特殊高中

強得到公認，但是，學校也設置了充滿活力、多元化的入學課程和獨特的課外教育機會。

學術課程：學校的強化課程包括畢業所要求的必修課程，也讓學生有機會選修很多不同科目的高級課程和選修課。課程選擇除了有大量大學先修課程，還包括科學研究、多變數微積分、有機化學、存在主義、工程學和陶藝。

課外活動：學校擁有42支公立學校體育聯盟 (PSAL) 的運動隊及機器人、數學小組，演講及辯論，科學奧林匹克、棋藝，模擬聯合國、美國政治家等課外活動，並以此為傲。學校有很多主要出版物、190多個由學生主持的俱樂部以及一個十分活躍的學生會。對音樂和藝術有興趣的學生可以參加音樂團體 (有12個)，包括交響樂團、交響樂團、爵士樂團和很多合唱組，還可以加入史岱文森戲劇社，該戲劇社每年表演三場製作，包括音樂劇、戲劇和喜劇。

2018年錄取情況：23,067名學生在SHSAT將史岱文森高中列為一項學校選擇，其中902名學生被錄取。

FIORELLO H. LAGUARDIA HIGH SCHOOL OF MUSIC & ART AND PERFORMING ARTS

100 Amsterdam Avenue, New York, New York 10023
電話：(212) 496-0700 網站：www.laguardiahs.org
電子郵箱：admissions@laguardiahs.org

作為第一所也是最頂尖的致力於培育熱愛藝術的學生的高中，拉瓜地亞音樂和藝術及演藝高中 (Fiorello H. LaGuardia High School of Music & Art and Performing Arts) 享有國際聲譽。拉瓜地亞高中的雙重使命是既貫徹嚴格藝術學校專業訓練又進行嚴謹綜合學業課程教育，為學生提供獨一無二的平衡二者的教育體驗。

工作室課程：在舞蹈課程中，學生學習芭蕾舞和現代舞；補充課程包括專業技能、舞蹈史、編舞、劇場舞 (踢踏舞和爵士舞)、職業管理和和曲目。在戲劇課程中，學生學習演戲、聲線及發音法、形體技巧、戲劇歷史、音樂劇場、電影表演以及劇本分折，重在為劇場做準備。在美術課程中，學生接受兩年的傳統基礎技能與媒體訓練。其中包括但不限於繪畫、水性媒介繪畫、平面設計、油畫和丙烯酸繪畫。在學習核心美術課程之後，學生接著學習上述科目和其他選修科目方面所包括的美術教育高級課程，比如建築學、藝術史、陶藝、電腦繪圖、壁畫、攝影、版畫以及雕塑。在技術劇場課程中，學生接受布景設計、燈光技術、服裝結構、音響屬性、舞臺管理、技術畫圖以及設計方面的實際訓練。成功完成這些課程後，學生可以獲得由職業及技術教育 (CTE) 授予的文憑。技術劇場學生參與拉瓜地亞高中各種活動的製作和演出兩方面的活動。在器樂課程中，學生學習聲樂、音樂理論和音樂史。器樂工作室表演團體包括高級交響樂團、中高級交響樂團、中級交響樂團、初級交響樂團、高級樂隊、中級樂隊、高級樂隊、高級爵士樂隊、中級爵士樂隊和兩個樂池伴奏團。在聲樂課程中，學生學習聲樂、音樂理論與音樂史。器樂和器樂選修課包括室內音樂、吉他、語音錄製工作室、音樂技術、新樂園、藝術表演團、獨唱、表演面試準備、福音合唱、鋼琴、歌曲創作與歌劇製作。學生還有機會作曲、指揮和演出原創曲目。

除了學生時多個課節的學習外，每個工作室均需要在課後花上大量時間。這些要求包括但不限於排練、表演以及技術劇院的實際應用及美術館管理技巧。在各個表演時間中，教學日會延長，而學生必須列席並參與課程相關的課後表演和活動。成功完成畢業要求、工作室作業、考試之後，學生可以獲得教育總監的藝術背書。

表演面試：將在曼哈頓的拉瓜地亞高中校園舉行。學生必須向所在學校的輔導員報名參加表演面試。請參看第14頁至16頁有關拉瓜地亞高中的表演面試資訊。

學術課程：拉瓜地亞高中學生超過了紐約市教育局升大學和職業準備程度的基準。如教育局所述，這些基準定義了學生需要達到的素質和成就，以準備好參加、堅持進行大學和高等教育訓練並在訓練中取得成功，以及進入有意義的職業生涯。學校嚴謹的學業課程包括畢業所要求的必修課程。紐約市立大學學分課程以及以下學科超過24個的大學先修 (AP) 課程：藝術史、生物學、微積分 AB 與 BC、化學、電腦科學原理、英語、英語文學、環境科學、政府與政治、人文地理、意大利語、法語和西班牙語語言和文化、音樂理論、物理、心理學、統計學、工作室藝術繪畫與 2-D、美國歷史和世界歷史。

除工作室專業課程外，學生還需完成此課程。
課外活動：學生積極參入 22 支 PSAL 運動隊，並參加大量課外活動，如數學小組、科學奧林匹亞、GSA、ARCHON、ARISTA 優等生聯合會。學生參加 50 多個由學生主持的俱樂部以及一個十分活躍的學生會。

2018 年錄取情況：共有 11,881 名學生報名參加表演面試，其中 1,015 名學生收到了拉瓜地亞高中一個或多個課程的錄取通知。
有目前在公立學校、私立學校和教會學校就讀 8 年級和首次就讀 9 年級的學生，要申請一所或多所紐約市特殊
高中（拉瓜地亞高中除外），都必須參加特殊高中入學測驗。約有 28,000 名學生參加了 2018 年 9 月的特殊高
中入學測驗。

有興趣參加 SHSAT 的學生應在報名期間找學校的輔導員。

學生將收到一張准考證，上面將列明規定學生參加測驗的日期、時間和地點，以及測驗時的特別照顧（如適用）。

學生必須在指定的日期和地點參加測驗。測驗地點列於第 12 頁，我們根據學生所讀學校的地理學區分配考場。如有時間衝
突，請儘快通知您子女的學校輔導員。有關補考申請方面的資訊，請參閱下文。

### 2018 年 9 月 6 日 – 10 月 11 日

| 報名期 | 2018 年 10 月 17 日 | 發放准考證 |

| **測驗日期**（如需查看地點，請參看第 12 頁） | 2018 年 10 月 20 日（星期六） | 2018 年 10 月 21 日（星期日） | 2018 年 11 月 1 日（星期四） | 2018 年 11 月 3 日（星期六） | 2018 年 11 月 18 日（星期日） | 2019 年夏季末 |

| 所有目前就讀 8 年級的學生 | | | | | | |

| 所有首次就讀 9 年級的學生 | | | | | | |
| SHSAT 教學日試點 | | | | | | |
| 目前就讀 8 年級及首次就讀 9 年級的英語學習生，或參加了包含測驗特別照
顧的個別教育計劃 (IEP) 和 504 計劃的殘障學生** | | | | | | |
| 補考申請 | | | | | | |
| 剛到紐約市的學生（記錄必須顯示學生是在 11 月考試日後才到紐約市**） | | | | | | |

### 其他測驗日期

- 如果學生需要一個不與自己的星期六或星期日宗教儀式構成衝突的考試日期安排，必須在報名期間內告知學校輔導
員。如果學生的准考證列出的日期錯誤，則應告知學校輔導員，這樣准考證可以得到更正。

- 測驗時間與拉瓜地亞高中表演面試衝突的學生，應參閱第 14 頁的表演面試的例外安排。

- 如果學生因生病而不能在預定日期參加考試，則學生必須立即在返校當日通知學校輔導員，出示醫療證明，並向學校
輔導員要求安排一個補考日期。

- 在確認一則有效的補考申請時會要求提供有關證明。11 月 3 日的補考，學校輔導員必須在 10 月 31 日或之前遞交學
生要求補考的申請和所需的文件，而 11 月 18 日的補考必須在 11 月 14 日或之前遞交。

**更多有關符合資格的英語學習生和曾經為英語學習生的學生的資訊列於第 18 頁。**

注：不是每個考點都在11月18日開放的。請檢查准考證上列出的精確考場地點。
測驗結果

請注意，入讀拉瓜地亞高中不需要參加 SHSAT。有關所有其他特殊高中，錄取一概根據學生的 SHSAT 分數、學生在其 SHSAT 答題紙上如何排列特殊高中的志願順序以及學校名額情況而決定。SHSAT 分數將與 2019 年 3 月高中入學第一輪 (High School Admissions Round One) 結果一起發佈。如何確定學生被一所特殊高中錄取：

■ 所有學生參加 SHSAT 測驗並按真實的志願順序在 SHSAT 答題紙上列出學校選擇。學生只列出採用 SHSAT 錄取的八所特殊高中。參閱第 23 頁關於列出選擇的更多資訊。

■ 然後，參加該測驗的全體學生的所有分數從高到低排列。

■ 獲得最高分的學生被安排到其第一志願學校（其答題紙上排名最靠前的學校）。

■ 按順序從最高分往下排列，每一名學生依次被安排入讀仍有入學名額的、其志願排名最靠前的學校。因此，如果學生首先選擇的學校的所有入學名額都已被安排給了得分更高的學生，那麼，如果其第二志願學校仍有入學名額，該學生將被安排到該校。如果其第二志願學校、所有入學名額都已經被安排給了得分更高的學生，那麼，如果該生第三選擇的學校仍有入學名額，該生將被安排到該校，依此類推。這一過程一直繼續，直至這八所特殊高中的任何一所學校都不再有入學名額為止。

根據學校自身的招生數量，每一所特殊高中提供的入學安排和預期的名額數量每一年都可能會有變化。
表演面試日期

所有表演面試都在拉瓜地亞高中舉行。表演面試日期是根據學生就讀學校所在的行政區以及學生姓氏的首字母而安排，而不是根據學生的住址安排的。

表演面試的例外安排

如果學生的表演面試日期與其遵守的宗教節日日期有衝突，學生可以在其所安排的週末（星期六或星期日均可）參加表演面試。

如果學生的 SHSAT 日期/時間安排與其拉瓜地亞高中表演面試的時間安排有衝突，學生必須在其所安排的週末（星期六或星期日均可）參加表演面試。

如果學生由於生病/受傷而需要另作安排，拉瓜地亞高中要求學生提供醫生證明。

剛到紐約市的學生參加表演面試

正式記錄表明學生是在 2018 年 11 月 1 日之後成為紐約市居民的，該學生可在 2019 年暑假結束時參加表演面試。成為紐約市居民後的學生，請造訪紐約市教育局家庭歡迎中心。
錄取程序

■ 拉瓜地亞高中入學資格是根據競爭激烈的表演面試和對學生學業記錄的審查結果決定的，以確保學生在要求嚴格的工作室學習和富有挑戰性的學業課程中均能取得成功。

■ 學生如果要參加拉瓜地亞高中一個或多個工作室的表演面試，必須告訴學校輔導員有關參加表演面試的意向，並說明希望參加哪個（哪幾個）工作室的表演面試。學校輔導員必須在報名期為學生提供表示收到學生申請的收條，並在表演面試日期之前給學生發放准考證。

■ 成功的考生應在其表演面試的藝術形式上展現出中級至高級水準。學校根據考生準備表演面試的情況、技術的熟練程度和藝術性表現來評估學生。大多數收到一項或多項工作室錄取的學生，除了擁有令人滿意的學業成績及出勤記錄之外，通常還在工作室表演面試中獲得80至100分的好成績。

■ 所有申請學生都必須攜帶表演面試准考證，才能進入相應的考場。考場不接受報名時所印出的收條。對於就讀非公立學校（私立學校或教會學校）的學生，其報名參加的每一工作室的表演面試均要求學生提供一份上一個學年的成績報告卡或成績單。例如，如果學生參加兩個工作室的表演面試，則學生必須提供四張表演面試准考證和兩份成績報告卡。學校僅評估學生在上一個學年取得的正式成績。學校將不會根據學生後來提高的任何學業成績進行評估。

報名參加拉瓜地亞高中表演面試

■ 如果學生有意申請拉瓜地亞高中一個或多個工作室課程（有六個），學生應仔細閱讀本手冊和《2019年紐約市高中指南》中所列的表演面試要求，為表演面試做好準備。

■ 拉瓜地亞高中可能會要求那些報名參加兩個以上工作室表演面試的學生參加不止一天的表演面試。如果學生屬於這一情況，應要求學校輔導員直接跟進拉瓜地亞高中進行諮詢。

■ 有資格獲得測驗特別照顧的英語學習生（ELL）和其個別教育計劃（IEP）或504計劃上規定有測驗特別照顧的學生將獲得拉瓜地亞高中表演面試的特別照顧，只要這些特別照顧不對所衡量的內容或技能構成妨礙。

■ 凡是將在拉瓜地亞高中表演面試中使用特別照顧資格的殘障學生或符合資格的英語學習生和曾是英語學習生的學生，在報名截止日之前，必須將任何有關特別照顧資格的材料（如學生的個別教育計劃（IEP）、504計劃，或一封有學校正式信頭的簽名信，說明學生在學校環境中接受英語學習生支援）送交拉瓜地亞高中。送交拉瓜地亞高中的材料可以傳真到212-724-5748；也可電郵到admissions@laguardiahs.org。

■ 雖然學生的表演面試准考證上所列的時間可能不是表演面試的實際開始時間，但是學生必須準時到達參加表演面試。強烈建議學生攜帶零食和/or飲用水。

■ 表演面試期間，另設有一個家長等待區，表演面試區僅供申請學生使用。家長或監護人也可以選擇在任何時間離開之後又重新進入學校大樓。切記，學生應該自己攜帶食物，與家人的其他任何交流都必須在表演面試程序開始前完成。

各工作室表演面試資訊

在2018-2019學年，總計11,881名學生報名參加拉瓜地亞高中六個工作室的一個或多個表演面試。學生可以參加以下工作室的表演面試。只有居住在紐約市的學生才有資格申請和參加表演面試。

舞蹈 申請人參與一堂芭蕾舞課和一堂現代舞課。申請人必須穿著芭蕾舞鞋和合身的黑色舞衣。

戲劇 申請人應準備好表演兩段（年齡和內容合適的）有強烈對比的一分鐘獨白。可能會要求申請人作即興誦讀。著裝應該便於活動，因為我們可能要求申請人展示肢體的靈活程度。

美術 申請學生必須攜帶8至15件自己創作的藝術作品。這些作品必須是以多種不同媒介創作的。這些藝術作品應是透過觀察、想像與記憶創作的。所有藝術作品必須標示恰當，並包含學生姓名、藝術類型和媒介。學生應在作品背面標明創作的時間。作品的相片（非原件）也可放到作品集內。表演面試時，學生將完成三項繪畫作業。學生均要畫人物寫生、從記憶中畫靜物、根據想像繪製彩圖。表演面試所需的所有材料將在表演面試時由學校提供。

器樂 申請學生應準備一首無伴奏獨奏曲參加表演面試，並上一份自己用於表演面試的曲譜。申請人應將自己的樂器带到表演面試現場。如果是鋼琴或打擊樂器，學生將在表演面試時由學校提供。

器樂 申請學生應準備一首無伴奏獨奏曲參加表演面試，並上一份自己用於表演面試的曲譜。申請人應將自己的樂器带到表演面試現場。如果是鋼琴或打擊樂器，學生將在表演面試時由學校提供。
在表演面試時由學校提供。學校也將在表演面試時為電子吉他學生提供擴音箱。申請人將接受節奏與音調記憶測驗，並要完成一項視讀考試。

技術劇場 申請人應攜帶一份預先準備的以下任意戲劇的 3D 設計模型/立體圖型和立體圖型照片：The Crucible、A Raisin in the Sun或者 Dracula。學生必須能夠對所選戲劇進行分析討論，並闡述設計立體圖型時的決定。學生還必須能夠在表演面試當天自己提著立體圖型。申請人將參與技術劇場多方面的一對一實際操作考評。

聲樂 申請人應準備一首歌曲，在表演面試中無伴奏演唱。拉瓜地亞高中在下列網站中列出了一些建議歌曲：(www.laguardiahs.org);但是學校並不要求學生一定從這些歌曲中選擇。申請人除了要表演所選歌曲外，還要重複唱出考官給出的旋律模式，為考官給出的節奏模式打拍子。
申請特殊高中
申請過程中的各步驟

1

聯絡學校輔導員
從 9 月初開始，在報名期之內，學生應聯絡自己的
學校輔導員，說明自己參加 SHSAT 測驗和/或拉瓜
di亞高中表演面試的意願。

2

取得測試或表演面試的准考證
在測試/表演面試日期前，學校輔導員將為學生提
供特殊高中入學測試准考證和/或拉瓜地亞高中表
演面試准考證。該准考證上列有測試/表演面試的考場地點、
日期和時間；學生請務必將此准考證帶到考場。SHSAT 考場並
非根據學生目前的住址安排，而根據學生目前就讀學校的
地點分配的。

3

核實測試或表演面試准考證
學生和家長/監護人應核對測試或表演面試准考證
上的所有資訊，確保無誤。但是，學生應該對自己的准考證，於
11 月和 14 日。如果測試或
表而面試准考證的資訊有誤，學生應立即通知學校輔導
員。

4

填妥測試或表演面試准考證後簽名，
並讓家長/監護人簽名
在測試或表演面試之前，學生及其家長/監護人都
必須在測試或表演面試准考證上簽名。參加 SHSAT 測試的
學生，必須按照自己的志願次序，在准考證上列出最多八
所特殊高中。學生將在考前將這些選擇並公到答題
紙上。家長和學生應共同確保，使學生做好準備能正確地
完成這件事情。每個學生只會被列在答題紙上的學校考慮
錄取。學生可選擇在其准考證和答題紙上只列出一所學校，
也可以為了增加被其中一所特殊高中錄取的機會而在其准
考證及答題紙上列出全部八所學校。這是學生表明自己選
擇的唯一機會。拉瓜地亞高中表演面試准考證上將列出學
生報名參加表演面試的工作室。學生應將每一個表演面試
的准考證都複印一份。

5

參加 SHSAT 或表演面試
參加 SHSAT 的學生必須在測試當天將測試准考證
帶到考場。參加拉瓜地亞高中任何工作室表演面
試的學生必須帶上表演面試准考證。

沒有帶準考證到場的學生可能無法參加測試或表演面試。

6

收到考試結果
學生必須是紐約市居民，才可以收到 SHSAT
測試的結果和/或獲得拉瓜地亞高中工作室的錄
c
取。在 2019 年 3 月，學生將收到高中入學第一輪結果通
知，該信函將說明學生是否得到特殊高中的入學安排。參加
拉瓜地亞高中一項或多項工作室表演面試的學生，有可
能獲得拉瓜地亞高中一項或多項工作室的錄取。獲得一所
特殊高中錄取的學生，也可能同時獲得其在紐約市高中入
學第一輪申請表上所遞交的選擇志願中的一所高中的錄
取。獲得多所學校錄取的學生，將選擇一所學校的入學安排。
以下學生有資格獲得 SHSAT 和拉瓜地亞高中表演面試的測驗和/或表演面試的特別照顧:

- 個別教育計劃 (IEP) 有測驗特別照顧或 504 計劃的殘障學生；
- 目前是英語學習生的學生；及
- 曾為英語學習生的學生，在 2017 年及 2018 年紐約州英語為第二語言成績測驗 (NYSESLAT) 中達到熟練水平。

測驗的特別照顧旨在確保殘障及英語水平有限的學生能夠與同齡人享有同等的機會參加評估。測驗的特別照顧讓符合資格的學生有機會展示掌握的技巧和知識，不會因為殘障或語言水平的影響而受到限制或不公平的限制。

學生家長應查閱紐約市教育局有關測驗特別照顧的資源，更多資訊登載於:
http://schools.nyc.gov/Academics/SpecialEducation/FamilyResources GUIDES Documents/default.htm。

關於特別照顧的重要須知

- SHSAT 或拉瓜地亞高中表演面試的特別照顧根據學生現有的考試特別照顧提供。這些都記錄在學生個別教育計劃 (IEP) 或 504 計劃中或以他們的英語學習生身份為基礎。
- 不可僅要求 SHSAT 和/或拉瓜地亞高中表演面試的特別照顧。學生必須出示需要和使用考試特別照顧的過去記錄。
- 擁有 504 計劃的學生必須每年取得特別照顧的批准。學校和家長必須在學期的最後一天 (2018 年 6 月) 之前確認。英語為第二語言成績測驗 (NYSESLAT) 中達到熟練水平。

申請特殊高中續...
申請特殊高中 續...
測驗和表演面試特別照顧

SHSAT 不准許的測驗特別照顧

學生有權享受其個別教育計劃 (IEP) 或 504 計劃所列的測驗特別照顧，但有些特別照顧在 SHSAT 中對任何學生都是不准許的。例如，學生不得在數學部分使用計算器和/或數學表格，因為 SHSAT 的這個部分評估的是學生的數學計算技能。

此外，測驗說明、問題和回答均不得予以口譯，因為這樣做會改變測驗的標準化。（需要翻譯的英語學習生只可以在 SHSAT 的數學部分使用雙語數學詞彙表。）

有關此處可能未提及的測驗特別照顧或具體情況，學生和家長必須向其學校輔導員諮詢。

SHSAT 不需要的測驗特別照顧

另外，學生可能在其他測驗中得到的測驗照顧可能並非 SHSAT 所需。例如，在文章寫作測驗時使用電腦或文字處理器的學生在 SHSAT 不需要這一項照顧，因為測驗不考文章寫作。

拉瓜地亞高中表演面試特別照顧

如果對某個表演面試是否允許某項照顧有疑問，請找學校輔導員直接與拉瓜地亞高中聯絡，聯絡電話：212-496-0700；電子郵箱：admissions@laguardiahs.org。

關於安排拉瓜地亞高中表演面試的照顧資訊，請參看下一節。

SHSAT 測驗和拉瓜地亞高中表演面試特別照顧的確認

■ 在 SHSAT 報名期間，學生目前所在學校（包括非公立學校，即私立學校和教會學校）負責在紐約市教育局的入學管理系統中輸入及/或確認正確的測驗特別照顧。有 504 計劃或同類的學校內特別照顧計劃的學生（僅適用於不在紐約市教育局系統的學校的學生），其所有證明文件必須在報名截止日之前至少三 (3) 遊遞交紐約市教育局審核。在此截止日之後收到的證明文件可能無法及時得到審核，因而無法趕上學生的預定測驗日期。如有關於 SHSAT 測驗特別照顧方面的問題，學生和家長應聯絡學生目前所在學校的輔導員。

■ 需要安排拉瓜地亞高中表演面試照顧的公立和非公立學校學生，必須要求其學校輔導員在報名截止日之前將證明文件（如學生的個別教育計劃 (IEP)、504 計劃或者一份有學校正式信頭及簽了名的信，說明學生在學校環境中接受英語學習生支援）直接送交拉瓜地亞高中。送交拉瓜地亞高中的材料可以傳真到 212-724-5748；也可電郵到 admissions@laguardiahs.org。如有任何關於表演面試特別照顧的問題，學校輔導員應直接聯絡拉瓜地亞高中。

■ 不具有說明其測驗特別照顧需要的個別教育計劃 (IEP) 或 504 計劃的非公立學校殘障學生，必須與其學校輔導員一起填寫一份紐約市教育局「特別照顧申請」 (Request for Accommodations) 表格，並在 2018 年 9 月 20 日前將表格和有關證明文件遞交給紐約市教育局審核和批准。家長/監護人可從子女目前就讀的學校獲得表格。子女的學校輔導員負責在 2018 年 9 月 20 日前遞交表格。紐約市教育局可能需要有關如何確定學生特別照顧的額外資訊，並核實所申請特別照顧的有過去記錄及需要。

選擇退出測驗特別照顧

在報名截止日之前，英語學習生和有個別教育計劃 (IEP) 或 504 計劃的學生的家長/監護人可以選擇自己的子女不接受 SHSAT 或拉瓜地亞高中表演面試的測驗照顧。在報名截止日之前，家長/監護人必須書面通知子女的學校輔導員，說明自己不希望子女接受測驗照顧。學校輔導員和學生都不能決定學生不接受測驗照顧；家長/監護人必須出具書面同意書。

如果不可能在報名截止日之前出具選擇不接受測驗照顧的書面同意書，家長/監護人必須在測驗當日出具書面同意書，表示選擇不接受其子女測驗或面試准考證上列出的測驗照顧。

在測驗當日，對其測驗或面試准考證上列出的測驗照顧，學生既不能更改，也不能選擇不接受，除非出其具家長在測驗或面試准考證上提供的書面同意。
申請特殊高中 繼...
測驗和表演面試特別照顧

獲得延長時間的學生在其延長時段結束之前完成測試和表演面試的特別照顧

- 除了需要去洗手間之外，在整個標準測試時間（180 分鐘）內，所有學生都必須一直待在測試教室裡。

- 標準測試時間（180 分鐘）一旦結束，凡有特別照顧的測試延長時間的學生，如果已完成考試，可以離開。

- 在延長時間繼續考試的學生，在此時間內至少有兩次 15 分鐘的休息時間。

- 學生如果要在其延長時間結束之前離開，則必須書面說明自己雖有機會利用全部的延長時間，但是自己選擇了提早離開。

- 如果家長/監護人不希望自己的子女在全部延長時間結束之前離開測試教室，則必須負責在測試開始之前與自己的子女做好溝通。

- 學生若在延長時間結束之前選擇離開，則不會得到重新測試的機會。

測試和/或表演面試的緊急特別照顧

測試的緊急照顧適用於那些在報名截止日之後但在其指定的測試/表演面試日期之前出現殘障或受傷並且沒有足夠時間制定一份個別教育計劃 (IEP) 或 504 計劃的學生。如果是 SHSAT，學生和家長應與學校輔導員一起填寫緊急測試申請表格，並在測試日之前要求學校輔導員儘快發電子郵件到紐約市教育局。

如果學生家庭提出特別照顧要求，但是紐約市教育局沒有足夠時間在正常 SHSAT 測試日期之前審核該要求，則可能將學生的 SHSAT 測試時間另作安排，以確保這一特別照顧要求得到正確審核。

如果學生要求拉瓜地亞高中表演面試的緊急特別照顧，學生家長或學校輔導員必須直接聯絡拉瓜地亞高中，要求獲得特別照顧。

有關測試照顧的更多資訊，學生和家長應與自己目前的學校輔導員聯絡。

大樓是否有行動不便人士的設施

紐約市教育局致力於確保員工、學校社區成員、學生和有殘障的家庭成員可使用其課程、服務和活動。紐約市教育局不斷對其所有大樓進行評估，以確定殘障人士可使用哪些學校。如需有關每所學校是否設有行動不便人士的設施的最新訊息，請直接與學校聯絡。鼓勵家庭參觀學校，瞭解行動不便人士的設施的水準。有關更多資訊，請造訪 http://schools.nyc.gov/Offices/OSP/Accessibility。
SHSAT 考查的是学生在教育课程上掌握的知识和技能。这些技能包括：理解英文散文和说明书；展示对英文写作至关重要的修改和编辑技能；在数学方面使用问题解决技巧的能力。

2018年SHSAT测验设计

SHSAT 测验分两个部分：英语(ELA) 和数学。完成测验的标准测验时间是 180 分钟。

每部分总共有 57 道试题，其中 47 道为计分题，10 道为嵌入式预测题。

你不会知道哪些是计分题，哪些是预测题。你最好完成每部分的所有试题。

英语部分 (57个问题)

英语(ELA)部分由以下两部分组成：修改/编辑和阅读理解，如下所述。

<table>
<thead>
<tr>
<th>部分</th>
<th>2017年SHSAT</th>
<th>2018年SHSAT</th>
</tr>
</thead>
<tbody>
<tr>
<td>修訂校訂</td>
<td>20个问题</td>
<td>9-11个问题</td>
</tr>
<tr>
<td>閱讀理解</td>
<td>5-6篇说明文</td>
<td>3-4篇说明文、1-2篇文学散文、1篇诗歌</td>
</tr>
</tbody>
</table>

数学习题 (57个问题)

数学习题包含多项选择题或填空形式的应用题和计算题。有5个数学填空题和52个多项选择题。

学生无论是先完成英语部分，还是先完成数学部分，都是可以的。提早做完的学生可以回头检查每一个部分的考题，以检查答题情况。

测验结束时，不会为学生提供额外时间将考卷上的答案抄写到答题纸上。所有答案必须在测验结束之前记录到答题纸上。

SHSAT 测验设计的变更

数学部分包含多项选择题或填空形式的应用题和计算题。

2018年SHSAT

1. 修訂/校訂：9-11个问题
2. 閱讀理解：5-6篇说明文
3. 3-4篇说明文、1-2篇文学散文、1篇诗歌

说明文可能包含中学生应有相关经验的任何文章类型，例如：说明文、议论文，以及个人论文形式的功能性文本、演讲稿、评论、艺术或文学论文、传记、自传、新闻报道，以及受众广泛的科学、技术或经济报道。

文学散文可能包括中学生应有相关经验的任何文章类型，例如：探险故事、历史小说、秘传、神话、科幻小说，现实主义小说、寓言、滑稽模仿作品或讽刺作品。
測試材料

學生必須攜帶下列物品進入考場:

- SHSAT 准考證（上面有家長/監護人的簽名和學生的特殊高中選擇排序）
- 削尖的 2 號鉛筆（圓珠筆或其他墨水筆無法用於機器評分）
- 橡皮
- 輔助技術（如果個別教育計劃（IEP）和准考證上有相關指示）

考場將提供:

- 一份附有答題紙和草稿紙的考卷

草稿紙可用於做記錄或數學計算，在測試結束時將被收回。

SHSAT 測試程序

學生須知：一定要與你的家長/監護人一起查閱以下說明，以確保在測試之前瞭解這些問題。

到達考場

- 務必按照 SHSAT 准考證上指定的時間準時到達考場。
- 考場可提供學生預計結束測試的時間的資訊。
- 請注意，測試不一定會在指定的到達時間之後立即開始。准考證上列出的時間是到達考場的時間，不是考試開始的時間。
- 測試開始前，你將被要求閱讀並簽署答題紙上的一份聲明。這份聲明表示你是紐約市的居民，且身體狀況良好，可以參加測試，並且你參加的是適合你年級水平的測試。如果學生簽署這份聲明，但是並不符合這些具體要求，則學生將不能參加任何一所特殊高中的入學安排。
- 在測試開始之前，紐約市教育局員工將給每個測試教室的學生拍照或拍影像。這些照片僅用於測試保安目的。
- 如果你覺得身體不適，但是沒有別批准的醫療 504 計劃，則你應立即告知監考官；你不應該開始做題，也不應該簽署該聲明。你一旦開始測試，就不能提出因病而要求補考的申請。你在開始測試之後而提出的任何補考要求都不會得到允許。

應該做的事情不得將相機或計算器、有計算功能的手錶、智慧手錶、MP3 播放器/iPod、平板電腦/iPad 或電子書閱讀器之類的個人電子用品帶到考場。

允許攜帶無計算功能的無聲手錶。

根據紐約市教育局的測試政策，手機和其他電子裝置將在所有學生進入測試教室時被收繳。在學生完成測試並離開測試教室時歸還給學生。學生不可以在測試中間（包括休息時間）使用任何裝置。

考場將指定學生考前需遵循的手機收繳程序。監考員將指示學生把手機/相機/電子裝置存放到自己的書包/手袋中，或者放入學校提供的容器中。在測試結束之前，這些物品將放在教室前方。學生不能攜帶計算器進入考場。攜帶有計算器的學生，必須將計算器放入自己的書包/手袋或學校提供的容器中，直到考試結束為止。任何學生若拒絕交出被禁止帶入的裝置，不得參加測試。如果學生在測試進行中的任何時候攜帶有被禁的裝置（包括計算器）（即使處於關機狀態），其測試將被作廢。學生將不能獲得在第二天參加補考的機會。

點心/食物及飲料

學生可以帶上未包裝且不會造成干擾的零食和飲用水，但不允許攜帶汽水。

學生可以在測試開始前吃零食。學生不准在測試期間吃零食。

獲得延長時間的學生，將在指定的用餐期間吃考場提供的零食。
你只能為每一所你希望被考慮的學校填充一個圓圈。你最少
可以選擇一所學校，最多可以選擇八所學校。為了增加你被
其中一所特殊高中錄取的機會，我們建議你選擇一所以上學
校。你必須塗黑一所第一志願學校，而且對每一選擇志願，
你只能塗黑一所學校。你必須在某一行和某一欄都只填充一個
圓圈。你不能將一所學校填寫超過一次。你不能在所有志願
中都填充同一所學校。

你必須將首選學校相應的圓圈塗黑。

第 5 格正確塗寫範例

第 5 格不正確塗寫範例

請勿在一欄中塗填一個以上圓圈。

請勿在一行中塗填一個以上圓圈。

請勿在每個選項中都塗填同一所學校。
在第 7 格，你必須清楚書寫目前就讀學校的名稱。然後，你將清楚填寫學校的學校代碼，該代碼要與出現在監考官提供的准考證上的代碼完全一致。接著，你將該學校代碼中每個數字或英文字母的相應圓圈塗滿。如果你在私立學校或教會學校就讀，請填寫與字母「P」相對應的圓圈。例如，就讀布碌崙 Abraham Lincoln IS 171 的學生應依照右邊顯示的例子填寫第 7 格。

第 8 格註明「學生身分號碼」。在第 8 格寫上你的九位數學生號碼。你可在你的SHSAT准考證上找到該號碼。在每個方框的下方塗填圓圈，圓圈中包含的數字要與方框中的數字相同。在解答英語或數學題目時，你可以在考卷或草稿紙上書寫答案，但你的答案必須記錄在答題紙上才能計入成績。時間到了之後就不能再在答題紙上寫答案了。寫在考卷或草稿紙上的答案將不計入成績。
學生不端行為

請注意，測驗保密性對 SHSAT 十分重要。不得與考場外的任何人分享試題和答案。在測驗期間，你不能試圖以任何方式與其他學生交流。這包括但不限於：說話、書寫和傳遞紙條；共用試卷或答題紙；看其他學生的答案；錄製試題及/或擁有相機或個人電子用品。學生如被發現有其中任何一項行為，其測驗將被作廢，並將被禁止再次參加該測驗，直到下一學年為止（適用於目前就讀 8 年級的學生；9年級學生將不再有任何額外機會在 9 年級之後再參加測驗）。

對於測驗不當情況進行彙報

如果你認為在 SHSAT 測驗期間受到了干擾或有測驗異常情況的出現，你應立即向監考人員報告情況。這可能是試卷印錯、過分注意分散或者學生行為不當。監考人員將努力彌補這一情形，可能在結束時需要獲得你的書面聲明。

學生和家長/監護人亦可採取以下一種方式報告任何可疑的監考或測驗異常情況：

1) 遞交一份電子版申請至 HS_Enrollment@schools.nyc.gov
2) 以掛號郵件（可獲送達證明）邮寄一份書面申請到評估辦公室（Office of Assessment）：

Office of Student Enrollment
52 Chambers Street, Room 415
New York, NY 10007

所有申請的遞交時間不得遲於測驗舉行日期後一週。

在所有報告中，請一定要寫上家長/監護人和學生的姓名、電話號碼和/或電子郵箱聯絡資訊。所有關於測驗異常情況的報告，如果郵戳日期遲於測驗日期之後一個星期以上的信件將不予受理。有關報告均將以個案得到分別回應。

SHSAT 評分

SHSAT 分數取決於計分試題上所標記正確答案的數目，即原始分數。\(^1\) 計算正確數目時，每道題目的計數都相同——一個原始分數。哪些問題答對或答錯不重要。因此，你不應在任何一道題目上花過多的時間，因為你覺得「較難」的題目不會讓你獲得比你覺得「較簡單」的題目更多的原始分數。答錯不扣分。如果你無法確定某個答案，你應盡最大努力猜測一個並標記該答案。盡你最大努力做好每道題，或跳過去繼續回答其它題目。如果你最後還有時間，應回過頭來回答此前未做好的題目。

每張答題紙都接受電子儀器掃描和計分，由此確定每一名考生的原始分數。由於特殊高中入學測驗有幾種形式，因此不同測驗形式的原始分數無法直接互相比較。這些測驗形式設計得尽可能類似，但並不完全相同。

要進行有效的分數比較，必須將原始分數轉換成另一種能夠對不同測驗形式之間的差異加以考慮的分數類型。SHSAT 採用兩種轉換方法將英語和數學原始分數轉換成量表分數。第一種轉換考慮了不同測驗形式之間的任何微小差異；這個步驟稱為校正。第二種轉換將分數作了調整，以適合常態（高斯）分佈；這個步驟稱為歸一化。這兩種轉換都是非線性的。因此，原始分數與量表分數並不成比例。這表示原始分數增加一分，量表分數不總是會隨之增加一分。例如，在分數範圍的中段，原始分數增加一分，量表分數可能會相應地增加三或四分。在分數範圍的最高或最低部分，原始分數每增加一分，量表分數可能會相應地增加 10 到 20 分。一個部分越接近於每道題目都答對（或答錯），該部分增加的量表分數就越多（或越少）。轉換後，量表分數的度量是常見於所有測驗形式的，可以直接對這些分數進行比較。

每個部分（英語和數學）的原始分數轉換成量表分數都是單獨完成的。之後，各部分的量表分數會相加起來。綜合分數是英語和數學量表分數的總和。綜合分數將決定你是否被特殊高中錄取。關於如何確定特殊高中入學資格的說明，請參閱第 13 頁。

每年都會專門為當年的測驗重新完成 SHSAT 評分流程（校正及歸一化）。這可確保計算學生的分數及只與同年參加 SHSAT 測驗的其他學生進行比較。因此，不能直接比較不同年份的 SHSAT 分數，也不存在固定的最低分或最高分。最高綜合分數通常在 700 分左右；但實際的最高分和最低分年年都不同。

\(^1\)我們將預先指定一小部分試題作為預測試題，這些題目不會計入學生考試分數內。
審核程序

在收到測驗結果之後，學生及其家長/監護人可以要求與評估辦公室 (Office of Assessment) 的一名代表預約會面日期審核自己的答題紙。答題紙不能分發給家長，但是在約定的日期接受審核。審核預約可以下面的一種方式安排：

1) 在下面的 SHSAT 網站上遞交一份電子版申請：www.nyc.gov/schools/Accountability/resources/testing/SHSAT，
或

2) 以掛號郵件（附加送達證明）郵寄一份書面申請到：

Office of Assessment, SHSAT Review
131 Livingston Street, Room 401A
Brooklyn, New York 11201

網上遞交電子申請的日期和郵寄信函的郵戳日期不得晚於2019年3月30日。申請必須包含：

■ 學生姓名、出生日期和 OSIS 號碼
■ 家長/監護人姓名、電話號碼和電子郵箱

申請遞交後，評估辦公室將提供安排細節。學生及至少一名家長/監護人必須出席預約。除學生外，只有家長/監護人被准許出席預約。可根據要求提供翻譯服務。
探索計劃

根據紐約州法律，特殊高中可以主辦一項「探索計劃」(Discovery Program)，讓明顯具有很大潛力的貧困家庭學生也有機會就讀特殊高中課程。2019年春季，學生將收到關於哪些高中將主辦一項「探索計劃」以及自己是否有資格參加的通知。

要參加該計劃，學生必須符合下列條件：

1. 得分在SHSAT錄取分數線以下的某個範圍內。符合資格的分數每年都有所不同，且視乎學校是否有名額；以及
2. 學生在其2018年SHSAT答題紙上的特殊高中學校選擇中的一所學校計劃將主辦一項2019年「探索計劃」；並且
3. 被其目前所在學校證明來自弱勢家庭的學生；以及
4. 由其目前所在學校推薦為有很大潛力就讀特殊高中課程的學生。

學生一旦收到其符合資格的通知，家長應該與學校輔導員見面，討論探索計劃的申請。並非所有符合資格的學生都能獲得「探索計劃」的批准。那些在該暑期計劃中成功地達到要求的學生將獲得主辦探索計劃的學校的入學名額。那些未能成功達到要求的學生將入讀之前為其分配的學校。學生如有任何疑問應諮詢其學校輔導員。有關資格要求的更多資訊，請造訪http://schools.nyc.gov/SHS。

特殊高中多元化增進計劃

紐約市教育局實施了一連串計劃，旨在提升不具代表性社區中高潛力學生的考試率、錄取率以及保持率。

■ SHSAT上課日舉行試驗計劃— — 2018年秋季，50所中學的八年級學生將有機會在上課日期間在自己的學校參加SHSAT測試。上課日舉行考試是為了消除週末參加考試的障礙，增加不具代表性學生參加SHSAT測試的人數。SHSAT上課日試驗計劃亦向參加的學校和學生提供考試準備及家庭參與活動。學生及其家人應諮詢其學校輔導員，詢問其學校是否參加了SHSAT上課日試驗計劃。

■ DREAM-SHSI — 夢想— — 特殊高中預備學校(DREAM—SHSI)是紐約市教育局提供的一項測試準備計劃，旨在幫助符合資格的六年級學生準備好在八年級參加SHSAT測試。學生需達到學業標準及聯邦收入標準方能有資格參加DREAM-SHSI計劃。該計劃自六年級2月起實施，至八年級秋季止。學校將通知符合資格的學生在其六年級學年的11月申請。

■ 夢想強化(DREAM Intensive) — 夢想暑期/秋季強化(Intensive)計劃透過採取嚴格的課程作業和考試策略讓即將入讀八年級的學生做好SHSAT測試的準備。學生需達到學業標準並居住或就讀於有最少學生就讀於特殊高中的學區方能有資格參加夢想強化計劃。該計劃自學生七年級學年的暑期開始，至八年級學年的秋季SHSAT測試日結束。學校將通知符合資格的學生在其七年級學年的冬末/初春申請。

有關多元化計劃的更多資訊，請造訪：

schools.nyc.gov/SHS

schools.nyc.gov/Offices/SHSI
建議家長/監護人與其子女一起查閱以下說明，以便為測驗做好準備。

測驗日之前

了解考試內容，並進行一些考試練習，有利於取得好成績。本手冊描述了測驗的每個部分，並包含兩套樣本試題；特定的9年級樣本試題及額外的數學填空樣本試題，用於練習。每套樣本試題均已更新，以體現2018年測驗的要求。每套試題均附有正確答案表及解析。

熟悉相關指示。由於樣本測驗中的指示與測驗當天的指示相同，因此，請通讀相關指示，以便在測驗前熟悉。務必確保您理解任務的要求。如在測驗日前已通讀手冊中的指示，實際測驗期間只需將內文略過即可。

模擬實際測驗場景，有助於更好地應對測驗。完成測驗的時間為三小時（180分鐘）。如果你有核准的特別照顧（請參閱第18頁）或英語學習生，將有360分鐘時間完成測驗。測驗期間，你可以自由分配完成英語和數學部分的時間。你可以任意選擇一部分開始測驗。透過練習測驗，決定每部分所需時間，以便在測驗當天合理安排時間，順利完成測驗。例如，每部分均花費90分鐘，還是某一部分多分配一些時間？是否將某些試題留到最後作答？完成另一部分後，如有剩餘時間，可返回至前一部分進行檢查。

將答案填在本手冊提供的答題紙上。本手冊背面提供了兩張可撕樣本SHSAT答題紙（第197頁及第199頁）。一張用於樣本試題A，另一張用於樣本試題B。切記，在實際測驗時，時間到了之後，你將沒有額外時間將答案標記在答題紙上。

完成第一個樣本試題後，對照正確答案表檢查你的答案。查看正確答案的解釋，瞭解可能出錯的類型。是否讀得太快而看錯試題？是否存在計算粗心的情況？選擇的答案是否接近正確答案，但並不是最佳答案？答錯的題目很多是靠猜的嗎？是否有留空答案的情況？你還應該查看一下是否存在答錯某類試題的情況。例如，是否所有的不等式題均答錯？找機會多加練習不熟悉的領域。

幾天不看手冊，然後按照相同流程，完成第二套樣本試題。注意，你完成這些樣本試題的情況不能預測你在實際測驗的得分。但是，這些測驗能讓你瞭解SHSAT的考試內容。

測驗前一晚，務必睡個好覺。

測驗當天

調整好心態。攜帶你的已簽過名的准考證到你的指定考場，一定要確保上面有你的一名家長/監護人的簽名，並且你已在上面將特殊高中選擇排了次序。按時到達指定的考場。穿著舒適，帶上一塊沒有計算功能的手錶，以便查看時間。務必帶上數支削好的2號鉛筆以及一塊可以擦乾淨的橡皮擦。必要時，還可攜帶筆記本、握筆器或放大鏡。

不得將個人電子用品帶到考場。這些用品包括但不限於iPod、計算器、平板電腦/iPad或電子書閱讀器。你可以將手機帶到考場，但在考試時，必須關機，並由監考人員收走。

安排好時間。SHSAT測驗共有114個題目，測驗時間為180分鐘。仔細作答，但要掌握好合適的進度，並查看時間。每道問題的分值均相同，請勿花過多時間在任何一道問題上。認真聆聽監考官的說明和所有時間相關提示。

確保將所有答案填寫在答題紙上。時間到了後，你將沒有額外時間將答案從考卷或草稿紙謄寫到答題紙上。

仔細填寫答覆。本次測驗由機器評分，如果答錯問題，將無法得分。如果某題標記了兩個答案，該題即被扣分為錯誤。確保填在答題紙上的編號與考卷上的問題編號一致。如需更改答案，將原標記完全擦除，避免在答題紙上劃上任何散亂的鉛筆標記。

將根據需要在考卷或草稿紙上回答每道題目。在解答英語或數學題目時，你可以在考卷或草稿紙上書寫答案，但記住，只有填寫在答題紙上的答案才能計入成績。

答錯不扣分。你的分數取決於答題紙上所標記的正確答案的數目。由於答錯不扣分，因此不作答沒有任何好處。時間快到了的時候，抓緊時間填寫所有空格。

不知道選的答案時，可作出有根據的猜測。透過排除肯定錯誤的選項，然後從剩餘答案中選擇一個，來進行這樣的猜測。

在測驗時，要考慮其他學生。不得嚼口香糖、製造任何可能干擾他人的噪音或動作。
如提前完成測驗，請檢查一遍，確保遵守要求，沒有遺漏任何問題，避免粗心大意。學生必須在整個測驗期間（180分鐘）一直留在測驗教室裏。
The English Language Arts section consists of 57 multiple choice questions. There is a Revising/Editing section and a Reading Comprehension section. These questions are aligned to the Common Core Learning Standards. The pages that follow provide tips for completing each of the sections.

**REVISING/EDITING Part A**

The first part of the Revising/Editing section assesses your ability to identify specific errors in language conventions, to select the correction for an error in language conventions, or to improve the quality of the writing presented in sentences or short paragraphs. The language skills assessed in this section are based on the Language section of the Common Core Learning Standards for Grade 7, as well as skills that are introduced at lower grade levels.

Each question directs you to read a sentence, a list of sentences, or a paragraph with numbered sentences. Then you are asked to address issues related to conventions of language or punctuation. Examples include:

- identifying a sentence with an error
- selecting the best correction for an error
- improving the writing by combining sentences or revising part of a sentence

**TIPS FOR REVISING/EDITING PART A**

**READ THE QUESTION FIRST**, so you know what type of analysis to do.

**READ THE TEXT IN THE BOX** and take note of any issues. Consider the following:

- Are there words, phrases, or sentences that are difficult to read due to an error in language usage or punctuation?
- Is there any part of the text that could be written more clearly, concisely, or precisely?

**THINK** about possible ways to correct or improve the text before reading the answer options.

Time permitting, it is highly recommended that you re-read the text in the box and the question at least once after you read the answer options.

The following sample questions show different types of items you may encounter in Part A of the Revising/Editing section.

**Identify a sentence with an error**

Read this paragraph.

(1) Established in 1946, the National Air and Space Museum (NASM) contains the most prominent collection of historical aircraft in the world. (2) As one of the many museums and landmarks of the Smithsonian Institution, millions of people from around the world visit NASM each year. (3) Over the years, NASM has undergone several renovations and major reconstruction to accommodate more visitors and exhibits. (4) In addition to being a popular Washington, DC, tourist destination, NASM is home to a research center for terrestrial and planetary science.

Which sentence should be revised to correct an error in sentence structure?

A. sentence 1  
B. sentence 2  
C. sentence 3  
D. sentence 4

**Correct Answer: B**

Sentence 2 begins with the phrase "As one of the many museums and landmarks of the Smithsonian Institution." The phrase is intended to describe NASM, but because of the structure of the sentence, it describes "millions of people" instead. It is nonsensical to describe "millions of people" as "one of the many museums and landmarks of the Smithsonian Institution." A revised version of this sentence could be, "Millions of people from around the world visit NASM, one of the many museums and landmarks of the Smithsonian Institution, each year." In this revised version, the modifying phrase immediately follows "NASM."
Read this paragraph.

(1) With its luscious trees and grassy fields stretching like a green ribbon across Manhattan, New York City’s Central Park is a natural oasis amid the bustling city. (2) While more than 25 million people visited the park each year, they are also a temporary home to an abundance of migratory birds. (3) During the spring and fall migrations, the park becomes a bird watcher’s paradise, prompting scores of avid birders with binoculars in hand to flock to it. (4) More than 270 species of birds, including swallows, thrushes, and at least 25 different species of warblers, have been observed making the park their home in the big city.

How should the paragraph be revised?

A. Sentence 1: Change its to their, AND change is to was.
B. Sentence 2: Change visited to visit, AND change they are to it is.
C. Sentence 3: Change becomes to became, AND change it to them.
D. Sentence 4: Change have been to had been, AND change their to its.

Correct Answer: B

Sentence 2 of the paragraph should be revised to correct the errors in verb tense and pronoun agreement. The paragraph is in the present tense, and so the past tense visited needs to be changed to visit. Additionally, the plural pronoun they needs to be changed to the singular pronoun it because the pronoun refers to the park, which is a singular noun. Option B is correct because the revisions in the option correct these errors.

Read these sentences.

(1) Monarch butterflies travel thousands of miles from southern Canada and the United States to Mexico.
(2) Monarch butterflies migrate every year in the fall, seeking warmer climates.

What is the best way to combine the sentences to clarify the relationship between the ideas?

A. While monarch butterflies travel to seek warmer climates every fall, they migrate thousands of miles from southern Canada and the United States to Mexico.
B. Monarch butterflies migrate thousands of miles from southern Canada and the United States to Mexico, but they are seeking warmer climates.
C. Monarch butterflies, although they seek warmer climates every year in the fall, migrate thousands of miles from southern Canada and the United States to Mexico.
D. Every fall, monarch butterflies migrate thousands of miles from southern Canada and the United States to Mexico, seeking warmer climates.

Correct Answer: D

Option D is the best way to combine these sentences because it presents the ideas clearly and precisely, and it shows the relationship between the key ideas of when, why, how far, and to/from where monarch butterflies migrate.
The second part in the Revising/Editing section assesses your ability to read a passage and then make decisions that improve the overall quality of the writing. There is one passage in Part B, and it will be either argumentative or informative. An argumentative passage presents an argument for a claim by offering supporting evidence. An informative passage introduces a topic and explains the topic by offering supporting details. Subjects include historical and current events, people, places, technology, and phenomena in the biological sciences, physical sciences, and social sciences.

Passages may contain errors in language usage, missing or extraneous supporting details, missing or inappropriate transitions, a missing or an unclear introductory statement or concluding statement, and other errors that are typical in student writing. Each sentence is numbered so that you can quickly locate and refer to specific parts of the passage.

**TIPS FOR REVISING/EDITING PART B**

**READ THE PASSAGE CAREFULLY** rather than skimming it. Make sure that you understand the content of the text so that you can answer questions about how the text is developed and organized.

As you read, be aware of specific sentences and paragraphs that seem illogical, extraneous, redundant, imprecise, informal, or difficult to read. There are most likely questions that ask you to correct or improve those sentences or the organization of ideas in those paragraphs.

**WHEN YOU FINISH READING THE PASSAGE**, read each question carefully. Refer back to the passage and re-read the relevant sentences or paragraphs as you work through each question. Keep in mind that it is usually important to read the sentences that appear both before and after the sentence or paragraph stated in the question.

While considering the issues you have noted in the relevant sentences or paragraphs, read each answer option and choose the best one.

The following sample passage and questions show the types of items you may encounter in Part B of the Revising/Editing section.
Studying Religions

(1) According to the National Council for the Social Studies, “knowledge about religions is not only a characteristic of an educated person but is necessary for effective and engaged citizenship in a diverse nation and world.” (2) In support of this idea, the world history standards in most states in this country include a basic overview of the five major world religions. (3) While public schools are not allowed to promote one religion over another, school officials should understand that the study of world religions through an academic lens is an essential component of history and social studies instruction and needs to be part of every student’s education.

(4) It is impossible to deny the role that religion plays in history, literature, and current events. (5) Some schools and teachers are hesitant to educate students about world religions. (6) The First Amendment to the United States Constitution guarantees the separation of church and state, which makes the discussion of religion in public schools seem problematic to some school districts and teachers. (7) A 2010 survey by Pew Research Center found that more than half of those polled thought teachers were prohibited from teaching classes about religions.

(8) An understanding of different world religions enriches a student’s education in several ways. (9) The politics, economics, and laws of countries are often a by-product of religious ideas, and literary and cultural references are better understood through the context of religion. (10) The benefits of this knowledge extend beyond the classroom. (11) Students who get world religions do better when they start working with people who come from different backgrounds. (12) They can appreciate the traditions and values of their neighbors and co-workers and can form educated opinions regarding current events and world issues. (13) A comprehensive study of world religions will help students become informed adults.

1. Which sentence would best follow sentence 6 to support the argument presented in the passage?
   A. Some educators avoid the topic altogether, and as a result, many students are not studying the founding ideas of culture and society.
   B. Many teachers are worried about the risk of introducing ideas or concepts that may lead to controversy.
   C. Schools tend to spend more resources teaching mathematics and the physical sciences than teaching the humanities.
   D. In order to protect students’ personal beliefs, many teachers think that they should teach only limited ideas about world religions.

2. Which transition phrase should be added to the beginning of sentence 10?
   E. In addition to being more aware of the world
   F. With so many global ideas being based around a religious framework
   G. While awareness and understanding of world religions is important
   H. On top of gaining a better academic understanding of the world
USEFUL TIPS ENGLISH LANGUAGE ARTS continued...

QUESTION 1

(A) Sentence 6 states that there is a constitutional foundation for the separation of church and state in the United States and suggests that because of this separation, some educators are unsure of how to address religion in the classroom. The question asks for a sentence that would follow and further expand on the ideas in sentence 6 and relate to the main claim in the passage. Option A is the only option that explains and makes a connection between educators avoiding the topic of religion and the subsequent impact on a student’s education.

QUESTION 2

(H) Sentence 10 is leading into the idea that having an understanding of world religions is also important outside of the classroom. By explaining the benefits of understanding world religions outside of an educational context (sentences 11 and 12), the author is providing further support for the argument that learning about world religions is important. The transition phrase in Option H best conveys that sentence 10 is transitioning to new supporting evidence for the argument “on top of” what is stated in sentence 9.

QUESTION 3

(C) Sentence 11 uses vague and imprecise language and needs to be corrected. Of all the available options, Option C uses the most precise language (“understand,” “better equipped,” “diverse colleagues and customers”).

3. Which revision of sentence 11 uses the most precise language?

A. Students who are clued into world religions are likely to get along better with the people they work with who are from different places.

B. Students who know about world religions are likely to understand more about doing business with new people.

C. Students who understand world religions are better equipped to work with diverse colleagues and customers from around the world.

D. Students who are familiar with world religions may be more aware of how to do business with acquaintances from other countries.
READ THE TEXT CAREFULLY rather than skimming it, in order to ensure that you thoroughly understand the text. This will help prevent you from making inaccurate assumptions based on only a few details.

TAKE NOTES while actively reading the text in its entirety.

READ THE QUESTION CAREFULLY. If time permits, re-read the relevant part or parts of the text.

TRY TO DETERMINE THE ANSWER BEFORE reading the answer choices. Then read each answer option and choose the best one.

Base your answers only on the content of the text (and associated images or graphics where relevant). Do not depend on your prior knowledge of the topic.

The following sample text and questions show the types of items you may encounter in the Reading Comprehension section.
Finding Flavor

1. When you eat an orange, your experience of its flavor comes from the combination of its aroma and its taste. Taste buds, the sensory receptors on the tongue, convey information to the brain about chemicals in food while the food dissolves in saliva. The sense of smell comes into play when the olfactory nerve in the nasal passages senses even very low concentrations of food chemicals in gaseous form. The sense of smell has a larger role in tasting flavors than most people realize—that is, until they have a stuffy nose and nothing tastes good.

2. If taste and smell depend on our detection of food chemicals, one might expect that chemists would be able to duplicate the flavors of foods. In fact, a surprising number of popular food flavors can now be reproduced in the laboratory, and even more are on the way. Orange, perhaps the most popular flavor worldwide, has been reproduced successfully. So have some national favorites, including cashew (Latin America) and paprika (Hungary). Synthetic flavors are not limited to flavoring food; they are also added to mouthwashes, toothpastes, beverages, and other consumer products.

3. Only a small proportion of the chemical components occurring naturally in foods actually contributes to their flavor. To identify these critical components, scientists use a gas chromatograph to separate a food into its basic chemical constituents. Flavor experts, called flavorists, then attempt to isolate those chemicals that are essential to the distinctive flavor of a food. Mechanical techniques have been developed to capture the aromas of food as it is being prepared—such as the smell of baking bread—and distill the essential chemicals from these essences. Flavorists use their highly developed senses of taste and smell to attempt to produce acceptable flavorings that are chemically identical to, but purer than, flavors that are naturally present in unprocessed food.

4. Although American consumers claim to want “natural” flavors in their food, taste tests demonstrate that they often prefer the synthetically produced counterparts. Artificial flavors tend to be stronger and less subtle than natural flavors. For example, many Americans prefer a soft drink created with artificial flavors, such as orange soda, over an “all-natural” soda flavored with real oranges, which may taste weak in comparison. In fact, some flavorists worry that consumers will develop such a strong taste for artificial flavors that natural flavorings, usually more expensive than their artificial counterparts, will become scarce.

5. Researchers have not always been successful in their efforts to duplicate natural flavors. Some popular flavors, such as coffee, strawberry, and chocolate, have proved to be virtually impossible to reproduce. The difficulty in creating a flavor like chocolate, experts say, is its complexity—a mysterious combination of sweet and bitter that excites the taste buds in an unusual and satisfying way.
1. What is the principal goal of the scientific research described in paragraph 3?
   A. to predict consumer taste preferences in food
   B. to develop food with strong flavors
   C. to produce synthetic equivalents of natural food flavors
   D. to improve the natural flavors in unprocessed food

2. Which conclusion is best supported by the information about the collection of aromas during food preparation?
   E. Creating artificial flavors from captured aromas is a difficult process.
   F. Certain chemical components of a food’s flavor are present in its aroma.
   G. Most people cannot tell the difference between natural flavors and artificial flavors.
   H. The natural flavor of a food is usually enhanced during the cooking process.

3. Why does the author mention orange soda in paragraph 4?
   A. to suggest that consumer preferences for natural or artificial flavors vary
   B. to explain why natural flavors are more expensive than artificial substitutes
   C. to demonstrate that consumers sometimes prefer artificial flavors to natural flavors
   D. to give an example of a natural flavor that may become difficult to find in the future

4. The author includes details about the uses for synthetic flavors in paragraph 2 in order to
   E. show that synthetic flavors are easy to create.
   F. demonstrate that many items are made with the same synthetic flavor.
   G. suggest that synthetic flavors are healthier than natural flavors.
   H. highlight that synthetic flavors are found in a variety of everyday items.

**QUESTION 1**

(C) Paragraph 3 describes a technique for separating a food into its basic chemical components. Option C best summarizes the goal of this research. Option A and Option D are not supported by the passage as goals of the research. Option B is incorrect because the goal of the research is to capture and reproduce the flavor, not to develop food.

**QUESTION 2**

(F) The process of collecting aromas during food preparation is described in paragraph 3. Option F is the best answer: the aroma of food as it is being prepared can be captured and distilled to synthesize the food’s flavor (paragraph 3). Option E is not supported because the process of capturing aromas has been successful and only certain flavors present difficulties. The idea that most people cannot tell the difference between natural and synthetic flavors (Option G) is not a conclusion that can be made from the collection of aromas.
during food preparation. Option H is incorrect because aromas are collected during the cooking process to isolate essential chemicals that make up flavor (paragraph 3), not to enhance the natural flavor.

**QUESTION 3**

(C) Orange soda is mentioned in paragraph 4 to provide an example of a product that uses a synthetic flavor that some consumers prefer to its natural counterpart (Option C). The idea that consumer preferences for artificial or natural flavors vary could be true, but this is not suggested by the author's discussion of one flavor (orange soda), ruling out Option A. Option B is incorrect because even though the passage states that natural flavors may be more expensive than artificial flavors, the author does not use the details about orange soda to make this point. The author states that some natural flavors may become scarce in the future (paragraph 4), but this is not exemplified by the discussion of orange soda in paragraph 4, ruling out Option D.

**QUESTION 4**

(H) The author describes the uses of synthetic flavors in items such as “mouthwashes, toothpastes, beverages” (paragraph 2) to demonstrate that synthetic flavors are found in many everyday household products. This is best stated in Option H. Option E may seem like an attractive option because the list of everyday items with synthetic flavors could give the impression that creating synthetic flavors is easy; however, while some synthetic flavors have been successfully created (paragraph 2), efforts to duplicate other flavors have been unsuccessful (paragraph 5), ruling out Option E. The idea that the same synthetic flavor is used in many items (Option F) and the idea that synthetic flavors are healthier than natural flavors (Option G) cannot be concluded from the list of common products that use synthetic flavors (paragraph 2).
The Mathematics section consists of word problems and computational questions in either a multiple-choice or grid-in format. There are 5 grid-in questions and 52 multiple-choice questions. The mathematical terms and general concepts in these test questions can be found in the Common Core Learning Standards for Mathematics. The math questions involve application of topics covered in the Common Core. However, as one of the purposes of this test is to identify students who will benefit from an education at a Specialized High School, the SHSAT contains many questions that require using mathematical skills to respond to novel situations.

Math questions on the Grade 8 test forms are based on material covered in the Common Core Learning Standards through Grade 7. Math questions on the Grade 9 test forms are based on material through Grade 8.

**TIPS FOR TAKING THE MATHEMATICS SECTION**

To improve your mathematics skills, choose a mathematics textbook or ask your teacher for recommendations of websites appropriate for your grade level. Practice solving five to ten questions every day. Do both routine and challenging questions. Routine questions reinforce basic mathematical skills. More challenging questions help you understand mathematical concepts better. Do not limit yourself only to types of questions that test what you have learned in your mathematics class. Do not give up if you cannot complete some of the questions. Skip them and move on. You may be able to solve them after you have practiced different types of questions.

You must know the meanings of mathematical terms that are appropriate to your grade level, such as “parallel” and “perpendicular,” as well as the customary symbols that represent those terms. You also need to know various formulas learned in your mathematics class, such as those for the perimeter and area of different figures. You can find these mathematical terms, symbols, and formulas in your mathematics course materials. These terms, symbols, and formulas will NOT be given in the test booklet. Practice using them to solve questions until you are comfortable with them. Do not use a calculator when solving questions. Calculators are not allowed on the test.

Read each question carefully and work out the answer on scrap paper or in your test booklet. Do not write on your answer sheet except to fill in your answer.

**YOU MAY DRAW FIGURES OR DIAGRAMS** for questions that do not have them. This will help you visualize the context of the question.

**SOME QUESTIONS ASK YOU TO COMBINE A SERIES OF SIMPLE STEPS.** Take one step at a time, using what you know about mathematics and what the question is asking or telling you to do.

**TIPS FOR MULTIPLE-CHOICE QUESTIONS**

Most multiple-choice questions should be done by working out the answer. This is more efficient than trying out the options to see which one fits the question. The only exception is when you are explicitly asked to look at the options, as in, “Which of the following is an odd number?”

If the question is a word problem, it is often helpful to express it as an equation or expression. When you obtain an answer, look at the choices listed. If your answer is included among the choices, mark it. If it is not, reread the question and solve it again.

If your answer is not among the answer choices, write your answer in a different form. For example, 10(x + 2) is equivalent to 10x + 20. Or reduce (simplify) the fraction to lowest terms, if your answer is in fraction form.

**THE INCORRECT CHOICES** are answers that students often get if they misread the question or make common computational errors. For this reason, it is unwise to solve a question in your head while looking at the possible choices. It is too easy to be attracted to a wrong choice.
TIPS FOR GRID-IN QUESTIONS

The Mathematics section includes five grid-in questions in which students must solve computational questions and provide the correct numerical answer rather than selecting the answer from multiple-choice options. For each grid-in question, you will write your answer in the boxes at the top of the grid and fill in the circles within the grid that match the numbers or symbols that you wrote.

The grid for each question is made up of five columns. When you record your answer in the grid, begin on the left.

Print only one number or decimal symbol in each box. Use the “.” symbol if your response includes a decimal point.

Fill in the circle under the box that matches the number or symbol that you wrote.

Example A shows the acceptable way to grid an answer of 5.
Example B shows the acceptable way to grid an answer of 3.2.

The first column on the left of the grid is ONLY for recording a negative sign, as in Example C. If your answer is positive, leave the first column blank and begin recording your answer in the second column. Example C shows the acceptable way to grid an answer of −1.5.
When your answer includes a decimal, make sure to fill in the circles that match all parts of your answer. For example, if your answer is 0.78, fill in the circles under the 0, “.”, 7, and 8, like in Example D. Note that an answer displaying .78 will also be accepted as correct, like in Example E.

Do not leave a box blank in the middle of an answer. If there is a blank in the middle of your answer, it will be scored as incorrect. For example, if your answer is 308, Example F is the acceptable way to grid in your response. In Example G, there is a space between the 3 and the 8 rather than a 0—this is an unacceptable way to grid in your response and will be scored as incorrect.
Do not fill in a circle under an unused box, as in Example H. The answer recorded in Example H will be scored as 3,080 because the circle in the last column for 0 is filled in, even though the intended response is 308.

EXAMPLE H

IMPORTANT NOTES

For your answer to be scored, the circles in the grid that match your answer must be filled in. If you write an answer in the boxes but do not fill in the circles in the grid, your answer will not be scored.

A complete numerical response that is correct will be scored as correct, even if you accidentally begin recording in the wrong column.

If you accidentally add a decimal point (with no additional values or zeros) after a whole number, your answer will be scored as that whole number. For example, if your answer is 5, as in Example A, an answer that is filled in as "5." or "5.0" will be considered an answer of "5" in scoring.

**Double-check how you have filled in the circles for each grid.** If there is more than one circle filled in for a column, your answer will be scored as incorrect. If your answer written in the boxes does not match how you have filled in the circles, your score will be based on how you have filled in the circles, like in Example H.
SAMPLE TESTS
AND PRACTICE QUESTIONS

The sample tests in this handbook are Grade 8 forms.

If you are taking the Grade 9 test, work the math questions on pages 184-186 as well as the sample tests for Grade 8. These questions cover topics that are introduced in the Grade 8 curriculum.

Additional grid-in questions are found on pages 189-191.

Two detachable sample SHSAT answer sheets are provided in the back of this handbook. Use one to mark your answers for Sample Test A, and use the other to mark your answers for Sample Test B.

Now you are ready to try sample test Form A. Begin by carefully reading the Directions on pages 44 and 45 and filling out side 1 of the answer sheet (page 197). To fill in your answers for Form A, use side 2 of the answer sheet. When you are ready for Form B, use the second detachable answer sheet (page 199).
Identifying Information

Turn to Side 1 of the answer sheet. Line 1 says, “I am well enough to take this test and complete it. I understand that once I break the seal of the test booklet, I may not be eligible for a make-up test. I am a New York City resident and a Grade 8 student taking a Grade 8 test. I understand that a student who is not a New York City resident, who takes the test more than once in a given school year, or who takes the test at the wrong grade level will be disqualified from acceptance to any of the specialized high schools.” Sign your name in the space following the word “signature.” Do not print your name. Notify the proctor immediately if you are ill or should not be taking this test. Do not sign the statement or begin the test. Return your answer sheet to the proctor.

On Line 2, print today’s date, using the numbers of the month, the day, and the year. On Line 3, print your birth date with the number of the month first, then the number of the day, then the last two digits of the year. For example, a birth date of March 1, 2004, would be 3-1-04.

In Grid 4, print the letters of your first name, or as many as will fit, in the boxes. Write your name exactly as you did on the application. If you have a middle initial, print it in the box labeled “MI.” Then print the letters of your last name, or as much as will fit, in the boxes provided. Below each box, fill in the circle that contains the same letter as the box. If there is a space or a hyphen in your name, fill in the circle under the appropriate blank or hyphen. Make dark marks that completely fill the circles. If you change a mark, be sure to erase the first mark completely.

Grid 5 is for your choice of specialized high schools. If Grid 5 is not marked correctly, your admission to a specialized high school will be affected because your admission is based on the score you achieve and the order in which you rank your school preferences in this grid. The school choices indicated on your answer sheet are final. Therefore, carefully copy the order in which you ranked the schools on your Test Ticket onto Grid 5.

Fill in one and only one circle for each school for which you wish to be considered. You may make as few as one or as many as eight choices. To increase your chances of being assigned to one of the specialized high schools, you are encouraged to make more than one choice. You must fill in a first choice school. Do not fill in a school more than once. Do not fill in the same school for each choice. Fill in only one circle in a row and only one circle in a column.

Grid 6 asks for your date of birth. Print the first three letters of the month in the first box, the number of the day in the next box, and the year in the last box. Then fill in the corresponding circles.

In Grid 7:
1. Print the name of the school where you are now enrolled in the space at the top of the grid.
2. In the boxes marked “SCHOOL CODE,” print the six-digit code that identifies your school and fill in the circle under the corresponding number or letter for each digit of the school code. (You can find your school code on your Test Ticket. If it is not there, tell the proctor, and the proctor will get the school code for you.)
3. If you attend a private or parochial school, fill in the circle marked “P.”

Grid 8 is labeled “STUDENT ID NUMBER.” All test-takers should print their student ID number in Grid 8. The student ID number is found on your Test Ticket. In the boxes, print your nine-digit student ID number. Below each box, fill in the circle containing the same number as in the box.

NEW YORK CITY PUBLIC SCHOOLS
2018 Specialized High Schools
ADMISSIONS TEST

GENERAL DIRECTIONS
GENERAL DIRECTIONS, continued

Identifying Information, continued

Grid 9 is labeled “BOOKLET LETTER AND NUMBER.” In most cases, Grid 9 is already filled in for you. If it is not, copy the letter and numbers shown in the upper-right corner of your test booklet into the boxes. Below each box, fill in the circle containing the same letter or number as the box.

Now review Side 1 to make sure you have completed all lines and grids correctly. Review each column to see that the filled-in circles correspond to the letters or numbers in the boxes above them.

Turn your answer sheet to Side 2. Print your test booklet letter and numbers, and your name, first name first, in the spaces provided.

Marking Your Answers

Mark each of your answers on the answer sheet in the row of circles corresponding to the question number printed in the test booklet. Use only a Number 2 pencil. If you change an answer, be sure to erase it completely. Be careful to avoid making any stray pencil marks on your answer sheet. Each question has only one correct answer. If you mark more than one circle in any answer row, that question will be scored as incorrect. See the example of correct and incorrect answer marks below.

You can use your test booklet or the provided scrap paper to take notes or solve questions; however your answers must be recorded on the answer sheet in order to be counted. You will not be able to mark your answers on the answer sheet after time is up, and answers left in the test booklet will not be scored.

DO NOT MAKE ANY MARKS ON YOUR ANSWER SHEET OTHER THAN FILLING IN YOUR ANSWER CHOICES.

Planning Your Time

You have 180 minutes to complete the entire test. How you allot the time between the English Language Arts and Mathematics sections is up to you. If you begin with the English Language Arts section, you may go on to the Mathematics section as soon as you are ready. Likewise, if you begin with the Mathematics section, you may go on to the English Language Arts section as soon as you are ready. If you complete the test before the allotted time (180 minutes) is over, you may go back to review questions in either section.

Be sure to read the directions for each section carefully. Each question has only one correct answer. Choose the best answer for each question. When you finish a question, go on to the next, until you have completed the last question. Your score is determined by the number of questions you answer correctly. Answer every question, even if you may not be certain which answer is correct. Don’t spend too much time on a difficult question. Come back to it later if you have time. If time remains, you should check your answers.

Students must stay for the entire test session.

DO NOT OPEN THIS BOOKLET UNTIL YOU ARE TOLD TO DO SO
REvising/EDITing

QuestioNs 1–9

IMPORTANT NOTE

The Revising/Editing section (Questions 1-9) is in two parts: Part A and Part B.

REvising/EDITing Part A

DIRECTIONS: Read and answer the following questions. You will be asked to recognize and correct errors so that the sentences or short paragraphs follow the conventions of standard written English. You may write in your test booklet as needed to take notes. You should re-read relevant parts of the sentences or paragraphs before marking the best answer for each question.

1. Read this sentence.

   During a nightly news segment about a cooking contest, a reporter talked to some people who did the best in the contest.

Which revision uses the most precise language for the words *talked to some people who did the best in the contest*?

A. conversed with some of the people who won the contest
B. spoke to the three contestants who did well
C. discussed the contest with some of the winners
D. interviewed the top three contestants
2. Read this paragraph.

(1) When coal was used to heat homes, it frequently left soot stains on the walls. (2) Brothers Cleo and Noah McVicker, who owned a cleaning product company created a doughy substance to help people remove this soot. (3) Over time, as natural gas becomes more common, people had little need for soot cleansers, and the McVickers’ family company struggled to stay in business. (4) Then one day Joe McVicker, Cleo’s son, learned that his sister-in-law had been using the substance for art projects in her classroom, so he remarketed the product as the toy known today as Play-Doh.

Which pair of revisions need to be made in the paragraph?

E. Sentence 1: Delete the comma after homes.
   Sentence 3: Change becomes to became.

F. Sentence 1: Delete the comma after homes.
   Sentence 4: Change remarkeeted to had remarkeeted.

G. Sentence 2: Insert a comma after company.
   Sentence 3: Change becomes to became.

H. Sentence 2: Insert a comma after company.
   Sentence 4: Change remarkeeted to had remarkeeted.

3. Read this paragraph.

(1) Walking dogs, cleaning kennels, hand-feeding newborn kittens, and supporting the pet-adoption process, the animal shelter is looking for volunteers to help with a variety of tasks. (2) Working at the animal shelter is a great way for young people, especially those who aspire to care for and protect animals, to gain valuable work experience. (3) In addition to hands-on training with animal care, volunteers will learn important job skills, such as punctuality, responsibility, and personal initiative. (4) Caring for animals can also help volunteers develop empathy, which is the awareness and understanding of the feelings of others.

Which sentence contains an error in its construction and should be revised?

A. sentence 1
B. sentence 2
C. sentence 3
D. sentence 4
Moving through Mountains

(1) An age-old proverb says that necessity is the mother of invention. (2) Centuries of human ingenuity in the face of obstacles prove this to be true. (3) For many years the Swiss Alps, a mountain range spanning southern Switzerland and northern Italy, were such an obstacle. (4) Roads and railways had to navigate around the mountains or through winding tunnels inside the mountains, making the transportation of people and goods difficult and time consuming. (5) In 2016 these burdens were eased with the completion of the Gotthard Base Tunnel.

(6) Construction of the high-speed railway tunnel began in 1996. (7) The tunnel was created through the use of tunnel-boring machines, which are giant drills with a flat rotating head called a cutter head. (8) Each of the tunnel-boring machines used during the construction of the tunnel was about the length of four football fields arranged end-to-end. (9) During the seventeen-year construction period, 28 million tons of rock were removed, enough to rebuild the Great Pyramid of Giza five times. (10) This massive construction project is reported to have cost $12 billion. (11) After that, 4 million cubic meters of concrete, or enough concrete to build eighty-four Empire State Buildings, were used to construct and support the tunnel.

(12) By 2020 the high-speed railway will carry more than 250 freight trains and 55 passenger trains a day, with most traveling at speeds of around 100 to 125 miles per hour. (13) It will be faster for people to travel between northern and southern Europe. (14) The travel time between the European cities of Zurich, Switzerland, and Milan, Italy, will be reduced by an hour. (15) Many European leaders compare the Gotthard Base Tunnel to the Channel Tunnel, a 33-mile underwater tunnel that connects the United Kingdom and France. (16) While there is no roadway in the Channel Tunnel, people can drive their cars onto special trains that will carry vehicles through to the other side.

(17) Just as traffic congestion in major cities led to the construction of underground local transportation, natural formations, such as mountain ranges, have also sent people underground for faster, easier, and cheaper methods of transportation across larger areas. (18) There is renewed interest in constructing innovative methods of transportation that will help eliminate problems associated with traveling to and from certain areas.
4. Which sentence should be added after sentence 5 to introduce the main topic of the passage?

- E. The construction of the Gotthard Base Tunnel was approved by Swiss voters in 1992 and was funded by tolls, fuel taxes, and government loans.
- F. Leaders from several European countries attended the opening ceremonies for the Gotthard Base Tunnel, a Swiss tunnel.
- G. The Gotthard Base Tunnel is the world’s longest and deepest railway tunnel, stretching 35.5 miles straight through the base of the Swiss Alps.
- H. The Gotthard Base Tunnel continues to help reduce the number of freight trucks on the roadways in the Swiss Alps.

5. Which sentence should be added to follow and support sentence 7?

- A. The tunnel-boring machine is helpful to tunnel builders in the modern era and has been an improvement over dynamite.
- B. These enormous tunnel-boring machines function somewhat like a cheese grater, with the cutter head grinding slowly through rock and stone.
- C. Engineers had considered making a tunnel under the mountains for many years, but it was impossible to do without modern tunnel-boring machines.
- D. Different types of cutter heads are used with tunnel-boring machines depending on the geology of the area where the tunnel is being created.

6. Where should sentence 11 be moved in order to improve the organization of the second paragraph (sentences 6–11)?

- E. to the beginning of the paragraph (before sentence 6)
- F. between sentences 6 and 7
- G. between sentences 8 and 9
- H. between sentences 9 and 10

7. Which sentence presents information that shifts away from the main topic of the third paragraph (sentences 12–16) and should be removed?

- A. sentence 13
- B. sentence 14
- C. sentence 15
- D. sentence 16
8. Which transition phrase should be added to the beginning of sentence 18?
   
   E. Although the Gotthard Base Tunnel is mainly for freight trains
   F. With the Gotthard Base Tunnel taking ten years to complete
   G. Because of the successful completion of the Gotthard Base Tunnel
   H. As the number of trains using the Gotthard Base Tunnel increases

9. Which concluding sentence should be added after sentence 18 to support the topic presented in the passage?

   A. There is proof that underground tunnels such as the Gotthard Base Tunnel are beneficial to the economy of the surrounding area.
   B. The Gotthard Base Tunnel is an extraordinary example of how human ingenuity and persistence can overcome great obstacles.
   C. The completion of the Gotthard Base Tunnel shows that people can work together to achieve important goals.
   D. The Swiss government is confident that the economic impact of the Gotthard Base Tunnel will be worth its construction cost.
READING COMPREHENSION
QUESTIONS 10–57

DIRECTIONS: Read each of the following six texts, and answer the related questions. You may write in your test booklet as needed to take notes. You should re-read relevant parts of each text before marking the best answer for each question. Base your answers only on the content within the text.
An Early Warning

1 One of the books that has done the most to alert the world to the dangers of environmental degradation is George Perkins Marsh’s *Man and Nature*. Its message—that Western society is in the process of causing irreparable harm to the environment—greatly influenced ecologists during the beginning of the modern environmentalist movement in the 1960s. Marsh was not, however, part of this movement. Surprisingly, *Man and Nature* was first published in 1864.

2 Marsh first observed the environmentally destructive effects of human activities while growing up in Vermont in the early nineteenth century. The heavy demand for firewood had depleted the forests, and extensive sheep grazing had stripped the land. The result was flooding and soil erosion. Furthermore, streams were fouled by wastes dumped from numerous mills and dye houses.

3 Much later in his life, after careers in law, business, farming, and politics, Marsh served as ambassador to Italy. There he noticed land abuse similar to what he had seen in Vermont. Overgrazing and forest mismanagement had rendered areas that had been productive farmland since the days of the Roman Empire desolate. Marsh attributed this to what he called “man’s ignorant disregard for the laws of nature.”

4 In Italy, Marsh began to organize his observations and theories. He wrote in a way intended to educate readers about the impact of industrial and agricultural practices on the environment. In *Man and Nature*, he evaluated the important relationships between animals and plants, discussed forestry practices in great detail, and analyzed the ways natural water supplies are affected by human use.

5 *Man and Nature* challenged the popular belief that nature can heal any damage that people inflict upon it. Marsh argued that people may use and enjoy, but not destroy, the riches of the earth.

6 Furthermore, he asserted that everything in nature is significant and that even the tiniest organism affects the fragile environmental balance. His belief that drastic alteration of this balance would be dangerous is now accepted as a fundamental principle of modern environmental science.

7 Although he pointed out environmental damage caused by irresponsible human activities, Marsh did not oppose every human alteration to the environment. To him, the goal was proper management, not a return to wilderness conditions. People should consider the consequences of their actions, he wrote, and become “co-worker[s] with nature.” Marsh praised the Suez Canal, the human-made waterway between the Mediterranean Sea and the Gulf of Aden, as “the greatest and most truly cosmopolite physical improvement ever undertaken by man.” He believed that the advantages of the canal—improved transportation and commerce—would outweigh any environmental damage. Yet he also warned of possible unintended consequences, such as destructive plants and animals spreading from one body of water to the other.

8 Marsh was considered a radical thinker during his lifetime. By the late nineteenth century, however, his writings, along with those of John Muir, Henry David Thoreau, and others, had inspired what became known as the conservation movement. The conservationists of that time sought to educate the public that wilderness areas were worth preserving and were responsible for creating the National Park Service and the National Forest Service.
10. Which statement best describes the central idea of the passage?
   
   E. Marsh's experience growing up on a farm allowed him to witness firsthand how human demands on nature can lead to problems, and as an adult he wrote one of the first books about conservation.
   
   F. Marsh challenged the notion that nature can repair the damage people cause to it, but he also supported human-made modifications to nature that improve transportation and commerce.
   
   G. Marsh's ideas about the environment were considered radical in his lifetime, but they later gained popularity during the environmental movement in the twentieth century.
   
   H. Marsh was a radical thinker who believed that people's actions could dramatically affect nature, and his writings are considered foundational to the conservation movement.

11. Marsh believed that the people of his time caused harm to the environment because

   A. they assumed that future generations would solve any environmental problems.
   
   B. they thought industrial progress was more important than protecting nature.
   
   C. they were unwilling to change farming and waste-disposal practices.
   
   D. they lacked knowledge of nature and natural processes.

12. What is the most likely reason the author uses the word “surprisingly” in paragraph 1?

   E. to argue that Marsh's ideas are more applicable in the present than they were during his lifetime
   
   F. to show that Marsh introduced ideas a century before they became widely accepted
   
   G. to emphasize that Marsh was unaware that his ideas would help begin a conservation movement
   
   H. to prove that there would be fewer issues with the environment today if people had accepted Marsh's ideas earlier

13. Which evidence supports the accuracy of Marsh's theories about nature?

   A. the details about Marsh's observations of environmental degradation
   
   B. the details about how Marsh's writing inspired a conservation movement
   
   C. the details about how Marsh's ideas are essential to modern environmental science
   
   D. the details about Marsh's opinions on human alterations to the environment
14. Which detail about Marsh provides support for the author's statement in paragraph 5?

   E. his reputation as a radical thinker
   F. his contribution to the conservation movement
   G. his experience working as an ambassador
   H. his approval of beneficial human-made projects in nature

15. Which of Marsh's ideas most influenced the environmental movement of the 1960s?

   A. Some human alterations to the environment are necessary.
   B. People lack an understanding of the environment.
   C. Human activities could damage the environment.
   D. Environmental degradation has been occurring for many years.
Champion of the Channel

In 1926 an editor at the *London Daily News* predicted that Gertrude Ederle, an American swimmer with eighteen world records and three Olympic medals, would fail in her attempt to swim across the English Channel. He claimed that “even the most uncompromising champion of the rights and capacities of women must admit that in contests of physical skill, speed and endurance they must remain forever the weaker sex.” Yet, at only nineteen years old, Ederle not only became the first woman to accomplish this feat, she also broke the men’s record by two hours. Gertrude Ederle’s triumphant swim across the English Channel was a testimony to her determination, innovative spirit, and passion for swimming.

Crossing the English Channel is a daunting task for any swimmer. At its narrowest point, the channel measures twenty-one miles across. Its icy waters hover around sixty degrees Fahrenheit, and its unruly tides and currents toss swimmers about like bobbing corks. Stinging jellyfish, seaweed, and floating debris from shipwrecks and lost cargoes present added hazards.

For decades the channel’s perils have defeated countless swimmers. Ederle, too, failed in her first attempt to cross the channel in 1925. Just six miles short of finishing, she became ill, and her coach had to haul her out of the water. Undeterred, Ederle decided to try again. Ederle knew that if she did not complete the challenge this time, she might never get the opportunity to set this record, because a rival female swimmer was preparing to make her second attempt at the crossing as well.

To prepare for the marathon swim, Ederle found ways to improve her equipment. She and her sister Meg discovered that melted candle wax perfectly sealed goggle edges, effectively waterproofing Ederle’s goggles against hammering waves. The sisters also designed a two-piece silk swimsuit for Ederle. During her first channel-crossing attempt she had worn a standard one-piece swimsuit that, after the lengthy hours of swimming across the channel, had stretched out, filling with water and creating drag, making an already challenging task almost insurmountable. Unlike the cumbersome typical bathing suit, this silk invention weighed little and allowed for easy movement.

On August 6, 1926, Ederle waded into the channel near Cape Gris-Nez, France. At first she shivered in the bone-chilling water even though she had covered her body in eight layers of grease for insulation. Her limbs felt stiff. Her strokes were irregular. Driving forward, she fought to clear her mind and find what she called her “sphere,” a place where the sea became her only companion and the shrieks of gulls and the humming of boat engines faded away. Using a new overhand stroke called the American crawl, Ederle eventually settled into a steady pace, briskly breaking through waves.

Throughout Ederle’s swim, two tugboats accompanied her. One carried newspaper reporters who wired dispatches of her progress to shore. The other, displaying a sign that read “This way, ole kid!” with an arrow pointing forward, transported her coach, family, and friends. Her coach played songs, such as “Yes, We Have No Bananas,” on a phonograph so that Ederle could time her strokes to the rhythm. Using a net, her coach also passed her baby bottles of broth for nourishment.

For hours Ederle swam, dodging debris with an amused smile. However, as she neared the English shore, a sudden fierce storm erupted. The tides and waves forced Ederle backward, and she fought the stubborn swells for several hours. The salty water caused her tongue to swell and inflamed her ears. Yet Ederle felt indescribably happy as she churned through the sea. Finally, as she neared the English shore, the storm abated, and the tide turned. No longer fighting against her, the sea pushed her toward the shore and victory.
After fourteen hours and thirty-one minutes, Ederle, on wobbly legs, stepped onto the English shore. The waiting crowd roared, honked their automobile horns, blasted their tugboat whistles, and set off flares that flashed in the sky. Ederle had swum into history.

When Ederle returned to New York, she received a parade, where thousands of people shouted “Trudy!” Not only were everyday American citizens proud of Ederle, but she also inspired them to be more active. Over the next few years, more than 60,000 people credited her with motivating them to earn their American Red Cross swimming certificates. Gertrude Ederle’s accomplishment proved to the world that with determination and passion, it was possible for a person to achieve his or her goals.

16. Read this sentence from paragraph 1.

**In 1926 an editor at the London Daily News predicted that Gertrude Ederle, an American swimmer with eighteen world records and three Olympic medals, would fail in her attempt to swim across the English Channel.**

What does the editor’s comment reveal about the challenges Ederle faced in attempting her feat?

- **E.** Regardless of her ability, being an American put Ederle at a serious disadvantage over a Londoner, who would be more familiar with the English Channel.
- **F.** At the time, Ederle still needed more training in order to succeed in the daunting task of swimming the English Channel.
- **G.** While Ederle could participate in athletic competition, some people were not comfortable with her attempt to swim the channel because no woman had ever attempted it before.
- **H.** In spite of her previous achievements, Ederle still experienced social as well as physical obstacles in attempting to swim the channel.
17. Which sentence is the best summary of the steps that Ederle took to prepare for her second attempt to swim across the English Channel?

A. Working with her sister, Ederle waterproofed her goggles using melted candle wax to seal the edges and designed a two-piece silk bathing suit that was lightweight and would not stretch out during the long swim.
B. Ederle covered her body in numerous layers of grease for insulation and focused on finding her “sphere” during her swim.
C. Ederle began training with her coach, who played music while she swam to help her time her strokes to the music.
D. Ederle focused on developing better equipment than the standard swimsuit that proved cumbersome during her first attempt to cross the channel.

18. Read this sentence from paragraph 3.

Ederle knew that if she did not complete the challenge this time, she might never get the opportunity to set this record, because a rival female swimmer was preparing to make her second attempt at the crossing as well.

How does this sentence fit into the overall structure of the passage?

E. It emphasizes that Ederle’s attempt to swim across the channel led other female swimmers to attempt the challenge.
F. It presents the reason why Ederle prepared to cross the channel again immediately after her initial failure.
G. It shows Ederle’s realization that she had to rethink her methods if she wanted to be the first woman to cross the channel.
H. It indicates that Ederle had learned from her mistakes and was working to fix them before her next attempt.

19. Which sentence best supports the idea that Ederle succeeded in swimming across the channel because of her innovative approach to the challenge?

A. “Yet, at only nineteen years old, Ederle not only became the first woman to accomplish this feat, she also broke the men’s record by two hours.” (paragraph 1)
B. “At first she shivered in the bone-chilling water even though she had covered her body in eight layers of grease for insulation.” (paragraph 5)
C. “Using a new overhand stroke called the American crawl, Ederle eventually settled into a steady pace, briskly breaking through waves.” (paragraph 5)
D. “No longer fighting against her, the sea pushed her toward the shore and victory.” (paragraph 7)
20. In paragraph 4, the word “insurmountable” is used to highlight
   
   E. how the bathing suit made it impossible for Ederle to make it across the channel.
   F. how Ederle and her sister decided to improve Ederle’s swimming equipment in a creative way.
   G. that the flaws in Ederle’s bathing suit made a difficult task even more complicated.
   H. that the swimming equipment Ederle used needed to be custom made for her attempt.

21. Which statement describes how the author’s use of problem-and-solution in paragraph 5 contributes to the development of ideas in the passage?
   
   A. Detailing the challenges that the cold channel waters presented highlights how effective Ederle’s training was.
   B. Describing Ederle’s physical difficulties during her swim provides evidence of the team effort required in order to ensure her safety.
   C. Explaining the difficulties that arose early in the effort helps predict the additional problems that occurred during Ederle’s attempt.
   D. Illustrating Ederle’s process of blocking out her discomfort shows that swimming the channel was both a mental and a physical challenge.

22. Paragraph 7 contributes to the development of the central idea of the passage by
   
   E. illustrating that Ederle’s physical strength and mental fortitude allowed her to stay focused on her goal.
   F. conveying that Ederle pushed herself to the edge of her physical capabilities in order to complete the swim.
   G. highlighting the impact the severe weather had on Ederle’s emotions during her swim.
   H. emphasizing the surge of emotions Ederle felt as she came closer to achieving a personal goal.

23. Ederle’s victorious swim across the English Channel influenced American attitudes mainly by
   
   A. sparking interest in physical activity and in seeking swimming certification.
   B. encouraging other swimmers to seek out and achieve challenging feats.
   C. demonstrating that women could achieve and even surpass feats accomplished by men.
   D. showing that determination and perseverance are necessary to overcome previous failures.
24. Which sentence from the passage best conveys the author’s perspective regarding the impact of Ederle’s accomplishment?

E. “Gertrude Ederle’s triumphant swim across the English Channel was a testimony to her determination, innovative spirit, and passion for swimming.” (paragraph 1)
F. “For hours Ederle swam, dodging debris with an amused smile.” (paragraph 7)
G. “Yet Ederle felt indescribably happy as she churned through the sea.” (paragraph 7)
H. “Ederle had swum into history.” (paragraph 8)

25. The table contributes to the development of the topic of the passage mainly by

A. emphasizing that people have continued to swim across the channel and have significantly reduced the speed record.
B. suggesting that Ederle inspired women to swim across the channel in an attempt to break the current speed record.
C. revealing that Ederle is not the only woman who has set a record time for swimming across the English Channel.
D. providing a comparison between channel-swimming records of the early twentieth century and current records.
Excerpt from *A Tramp Abroad*

by Mark Twain

1 Now and then, while we rested, we watched the laborious ant at his work. I found nothing new in him—certainly nothing to change my opinion of him. It seems to me that in the matter of intellect the ant must be a strangely overrated bird. During many summers now I have watched him, when I ought to have been in better business, and I have not yet come across a living ant that seemed to have any more sense than a dead one. I refer to the ordinary ant, of course; I have had no experience of those wonderful Swiss and African ones which vote, keep drilled armies, . . . and dispute about religion. Those particular ants may be all that the naturalist paints them, but I am persuaded that the average ant is a sham.

2 I admit his industry, of course; he is the hardest working creature in the world—when anybody is looking—but his leather-headedness is the point I make against him. He goes out foraging, he makes a capture, and then what does he do? Go home? No; he goes anywhere but home. He doesn't know where home is. His home may be only three feet away; no matter, he can't find it. He makes his capture, as I have said; it is generally something which can be of no sort of use to himself or anybody else; it is usually seven times bigger than it ought to be; he hunts out the awkwardest place to take hold of it; he lifts it bodily up in the air by main force, and starts—not toward home, but in the opposite direction; not calmly and wisely, but with a frantic haste which is wasteful of his strength; he fetches up against a pebble, and, instead of going around it, he climbs over it backwards, dragging his booty after him, tumbles down on the other side, jumps up in a passion, kicks the dust off his clothes, moistens his hands, grabs his property viciously, yanks it this way, then that, shoves it ahead of him a moment, turns tail and lugs it after him another moment, gets madder and madder; then presently hoists it into the air and goes tearing away in an entirely new direction; comes to a weed; it never occurs to him to go around it. No; he must climb it, and he does climb it, dragging his worthless property to the top—which is as bright a thing to do as it would be for me to carry a sack of flour from Heidelberg to Paris by way of Strasburg steeple; when he gets up there he finds that that is not the place; takes a cursory glance at the scenery, and either climbs down again or tumbles down, and starts off once more—as usual, in a new direction. At the end of half an hour he fetches up within six inches of the place he started from, and lays his burden down. Meantime, he has been over all the ground for two yards around, and climbed all the weeds and pebbles he came across. Now he wipes the sweat from his brow, strokes his limbs, and then marches aimlessly off, in as violent a hurry as ever. He traverses a good deal of zig-zag country, and by and by stumbles on his same booty again. He does not remember to have ever seen it before; he looks around to see which is not the way home, grabs his bundle, and starts. He goes through the same adventures he had before; finally stops to rest, and a friend comes along.

3 Evidently the friend remarks that a last year's grasshopper leg is a very noble acquisition, and inquires where he got it. Evidently the proprietor does not remember exactly where he did get it, but thinks he got it “around here somewhere.” Evidently the friend contracts to help him freight it home. Then, with a judgment peculiarly antic (pun not intentional), they take hold of opposite ends of that grasshopper leg and begin to tug with all their might in opposite directions. Presently they take a rest, and confer together. They decide that something is wrong, they can't make out what. Then they go at it again, just as before. Same result. Mutual recriminations follow. Evidently each accuses the other of

---

1 *we*: the author and his fictional travel companion
being an obstructionist. They warm up, and the dispute ends in a fight. They lock themselves together and chew each other’s jaws for a while; then they roll and tumble on the ground till one loses a horn or a leg and has to haul off for repairs. They make up and go to work again in the same old insane way, but the crippled ant is at a disadvantage; tug as he may, the other one drags off the booty and him at the end of it. Instead of giving up, he hangs on, and gets his shins bruised against every obstruction that comes in the way. By and by, when that grasshopper leg has been dragged all over the same old ground once more, it is finally dumped at about the spot where it originally lay. The two perspiring ants inspect it thoughtfully and decide that dried grasshopper legs are a poor sort of property after all, and then each starts off in a different direction to see if he can’t find an old nail or something else that is heavy enough to afford entertainment and at the same time valueless enough to make an ant want to own it.

Science has recently discovered that the ant does not lay up anything for winter use. . . . He does not work, except when people are looking, and only then when the observer has a green, naturalistic look, and seems to be taking notes. This amounts to deception, and will injure him for the Sunday schools. He has not judgment enough to know what is good to eat from what isn’t. This amounts to ignorance, and will impair the world’s respect for him. . . . He cannot stroll around a stump and find his way home again. This amounts to idiocy, and once the damaging fact is established, thoughtful people will cease to look up to him. It is strange beyond comprehension that so manifest a humbug as the ant has been able to fool so many nations and keep it up so many ages without being found out.

From A TRAMP ABROAD by Mark Twain—Public Domain

26. The phrase “those wonderful Swiss and African ones which vote, keep drilled armies, . . . and dispute about religion” in paragraph 1 shows that the author

E. believes that the behavior of the ants is reflected in other living creatures.
F. acknowledges that his observations of a few do not necessarily apply to all.
G. knows that disproving a commonly held belief is challenging.
H. accepts that there are flaws in his interpretation of the behavior of the ants.

27. The central idea that “the average ant is a sham” (paragraph 1) is conveyed mainly through the

A. comical descriptions of the inability of the ants to accomplish the task at hand.
B. comparison between ants from other countries and the ants being observed.
C. keen observations that the level of intelligence of ants is mostly overstated.
D. conclusion that ants value objects that are of little practical use to them.
28. In paragraph 2, how do the words “grabs,” “yanks,” and “tearing away” contribute to the meaning of the excerpt?

   E. They highlight the ant’s belief that his work is important.
   F. They illustrate that the ant is more efficient working on his own.
   G. They indicate the speed with which the ant completes his tasks.
   H. They emphasize the ant’s anxious efforts to be productive.

29. Read this text from paragraph 2.

   He . . . comes to a weed; it never occurs to him to go around it. No; he must climb it, and he does climb it, dragging his worthless property to the top—which is as bright a thing to do as it would be for me to carry a sack of flour from Heidelberg to Paris by way of Strasburg steeple;

These details convey the central idea in the excerpt by showing that the ant

   A. often wastes his strength when working on a task.
   B. is surprised by the effort he needs in order to move the object.
   C. is oblivious to the most practical solution to his problem.
   D. focuses more on obtaining the object than getting it back home efficiently.

30. Which of the following best explains the author’s fascination with the ants?

   E. “During many summers now I have watched him, when I ought to have been in better business, and I have not yet come across a living ant that seemed to have any more sense than a dead one.” (paragraph 1)
   F. “I admit his industry, of course; he is the hardest working creature in the world—” (paragraph 2)
   G. “Science has recently discovered that the ant does not lay up anything for winter use.” (paragraph 4)
   H. “It is strange beyond comprehension that so manifest a humbug as the ant has been able to fool so many nations and keep it up so many ages without being found out.” (paragraph 4)
31. Read this sentence from paragraph 2.

At the end of half an hour he fetches up within six inches of the place he started from, and lays his burden down.

How does the sentence contribute to the development of the central idea of the excerpt?

A. It reveals that the ant is aware of the purposelessness of his efforts and that he does not enjoy his work.
B. It highlights how little the ant accomplishes despite the great amount of effort he exerts.
C. It suggests that the ant has an industrious attitude and does not easily give up.
D. It emphasizes that the ant does not thoughtfully consider how difficult it would be to carry his capture for such a long period of time.

32. Which sentence from paragraph 2 best supports the idea that sheer “leather-headedness” (paragraph 2) amounts to “ignorance” and “idiocy” (paragraph 4)?

E. “He goes out foraging, he makes a capture, and then what does he do?”
F. “He lifts it bodily up in the air by main force,“
G. “When he gets up there he finds that that is not the place;”
H. “Now he wipes the sweat from his brow, strokes his limbs, and then marches aimlessly off, in as violent a hurry as ever.”

33. Read this sentence from paragraph 3.

Evidently the friend remarks that a last year’s grasshopper leg is a very noble acquisition, and inquires where he got it.

Which statement best describes how the sentence fits into the overall structure of the excerpt?

A. It indicates a shift to the realization that the ants place great importance on an item that has little value.
B. It emphasizes a shift from an analysis of the actions of the individual ant to a commentary on the actions of the ants working together.
C. It introduces a transition to the idea that specific observations about one ant allow for generalizations about all ants.
D. It provides a transition to the observation that the ant’s friend is just as purposeful in his efforts toward a futile ending as the first ant.
34. Read this sentence from paragraph 3.

The two perspiring ants inspect it thoughtfully and decide that dried grasshopper legs are a poor sort of property after all, and then each starts off in a different direction to see if he can’t find an old nail or something else that is heavy enough to afford entertainment and at the same time valueless enough to make an ant want to own it.

How does the word choice in the sentence contribute to the overall meaning of the excerpt?

E. It creates a humorous critique of the ants’ intense attitude toward their pointless work.
F. It illustrates the ants’ confusion over their lack of positive results compared with their level of effort.
G. It highlights the ants’ frustration as they repeatedly chose a difficult task over one that could be accomplished more easily.
H. It illustrates the ants’ stubborn determination to hold on to the worthless object.

35. How does the presence of the friend in paragraph 3 influence the first ant’s behavior?

A. The friend distracts the ant from finding the correct path home.
B. The friend inspires the ant to consider a new approach to the situation.
C. The friend encourages the ant to continue his worthless efforts.
D. The friend tries to prevent the ant from finishing his task.
Ruins of a Fabled City

The African country of Zimbabwe took its name from the Shona word meaning “stone enclosures” or “venerated houses.” In fact, today dozens of stone ruins are scattered throughout Zimbabwe and other areas in southeastern Africa. One of these ruins, known as Great Zimbabwe, was once a fabled city that inspired tales that circulated throughout Europe. Where was this remarkable city, and who had built it? For centuries the mystery occupied the minds of explorers and treasure seekers.

The first reports to Europeans of Great Zimbabwe were spread a thousand years ago by Arab traders sailing between the Middle East and the east coast of Africa. The traders told of the fabulous wealth of a mysterious stone city in the African interior. In the trader's tales, that city became associated with the Europeans’ understanding of Middle Eastern history—the Queen of Sheba, King Solomon and his legendary gold mines, long since lost to the world. By the sixteenth century, Portuguese explorers regularly visited East Africa, searching for King Solomon’s gold, but they never found Great Zimbabwe. In 1552, a Portuguese historian, João de Barros, recorded a story told by Arabs about a city with a “square fortress of masonry within and without, built of stones of marvelous size, and there appears to be no mortar joining them.”

In fact, Great Zimbabwe was a marvel. In one area a massive wall more than thirty feet high and twenty feet thick created a great enclosure. Another area contained a fortress-like series of walls, corridors, and steps built into the bluff that overlooks the ruins. Throughout the city, each stone was precisely fitted to the others without the use of mortar.

In the 1870s Karl Mauch, a German geologist, was the first European to see Great Zimbabwe, by then in ruins. Mauch realized that he had “rediscovered” the fabled city from de Barros’s story. He jumped to the conclusion that Great Zimbabwe had been built by the Queen of Sheba. British authorities sent a British journalist, Richard Hall, to Great Zimbabwe to investigate Mauch’s report. Archaeology was still in its infancy, and Hall, convinced that the structures had been built by ancient people from the Middle East, dug up and discarded archaeological deposits that would have revealed much about the true history of Great Zimbabwe. Later European excavations destroyed even more valuable evidence.

In the twentieth century, after excavating areas that had not been disturbed, David Randall-MacIver, a Scottish Egyptologist, and Gertrude Caton-Thompson, an English archaeologist, concluded that the ruins were unmistakably African in origin. Great Zimbabwe was most likely built during the fourteenth or fifteenth century by the ancestors of the present-day Shona people. Recent carbon-14 dating supports their conclusion. Great Zimbabwe was once home to an estimated 20,000 people, the center of a great Shona kingdom. Wealthy Shona kings traded their ivory and gold in coastal towns for other goods, thus accounting for the discovery of beads and other foreign wares in the ruins.

One mystery of Great Zimbabwe had been solved. Another mystery remains: why was the settlement at Great Zimbabwe abandoned, leaving the magnificent stone architecture to fall into ruins?
36. Which statement best describes the central idea of the passage?
   
   E. Great Zimbabwe was an enormous stone city thought to be home to some of the greatest treasure of ancient history.
   
   F. Mysteries related to Great Zimbabwe continue to interest historians and explorers even though archaeologists have confirmed its origins.
   
   G. The history of Great Zimbabwe was subject to much speculation until modern archaeologists definitively determined its origins.
   
   H. Early missteps in the study and excavation of the Great Zimbabwe ruins led to the loss of valuable evidence about the city.

37. What was the main way that Karl Mauch’s conclusions about Great Zimbabwe in paragraph 4 affected later archaeological investigations?
   
   A. Archaeologists from all over Europe became interested in excavating the area.
   
   B. Archaeologists made assumptions about the history of the ruins before excavating.
   
   C. Archaeologists started to believe that many of the past accounts recorded about the ruins were true.
   
   D. Archaeologists realized it was unlikely that an ancient culture could build such grand structures.

38. Which statement best describes Portuguese explorers’ experience searching for Great Zimbabwe?
   
   E. They routinely visited East Africa but never located the city.
   
   F. They were motivated by the hope of finding a mysterious city.
   
   G. They used details from de Barros’s story in order to determine the city’s exact location.
   
   H. They studied history books in order to gather information about the city.

39. What was “one mystery of Great Zimbabwe” (paragraph 6) that had been solved?
   
   A. why the settlement was abandoned
   
   B. where the ivory and gold from the city went
   
   C. why the ruins remained undiscovered until the 1870s
   
   D. who had built the settlement
40. Which statement about the Shona people is best supported by the passage?

   E. They live along the east coast of Africa.
   F. They are descendants of the people who built Great Zimbabwe.
   G. They lived in the Middle East before settling in Africa.
   H. They were once ruled by King Solomon and the Queen of Sheba.

41. The conclusions of David Randall-MacIver and Gertrude Caton-Thompson were significant because they

   A. proved that Great Zimbabwe was much older than previously thought.
   B. questioned why the Shona people left Great Zimbabwe.
   C. supported the idea that the ancient Shona had a robust society at Great Zimbabwe.
   D. revealed that Great Zimbabwe was African in origin.
Cross-Purposes

What I am is built: concrete and steel.
I defy gravity. I am what every athlete
wants: to remain at the apex of the leap,
up in the air. And yet I am useful, too:
cars, trucks, people, even trains
make their way across my broad back.
Swallows and ospreys\(^1\) nest in my trusses.

What I am is motion. I am water, and I am older
than anything else you know. No human
built me. I am gravity’s best friend; I pool
and flow wherever gravity takes me.
I am the blood flowing in the runner’s chest,
and I catch everything: from the hills,
the mountains. It all washes down through me.

What you are is an accident,
what happens to rain when rain gives in
to Earth’s gravitational pull.
You are some tears dribbling from a mountain’s
eye, running down the pavements
of small towns, into the cities, to the sea.
You are the path of least resistance.

What I am is power. You, of course,
have none: you are a static lump, an artifact
slowly decaying. But my regal flow
nourishes grasses, permits empires to rise.
Those who made you will break you,
in time, replacing you with yet another
clumsy structure. I have seen. I know.

“Clumsy”? Being rebuilt makes me
a friend of time, does it not? And it means
that I have siblings—those “clumsy” structures,
my sisters and brothers.
We stitch across the rip you make.
We are steel thread to the human needle.
We bind you up. We sew you.

\(^1\)ospreys: large birds
And I sow into you; in every cranny
of your superstructure my vapors cling.
They bring out your softness, your rust.
Boast your best, and boast better yet.
I am listening to the bright hum
of the wind in your wires. Because I am,
above all else, patient. I will wait for you.

42. How does the similar construction of the sentence in line 1 and the sentence in line 8 contribute to the meaning of the poem?

E. It introduces the intended permanence of the structure and the ever-changing fluidity of the water.
F. It shows that the structure can bridge the gap caused by the water.
G. It suggests that the structure has more limitations than the water.
H. It contrasts the stability of the structure with the instability of the water.

43. Read lines 2–4 and lines 12–14 from the poem.

I am what every athlete
wants: to remain at the apex of the leap,
up in the air.

I am the blood flowing in the runner's chest,
and I catch everything: from the hills,
the mountains.

How do the lines contribute to the development of a central idea of the poem?

A. They establish that both the structure and the water have endurance and control.
B. They highlight that both the structure and the water are powerful and impressive.
C. They suggest that the structure and the water are unaware of how similar they are.
D. They reveal that the structure and the water are surprised that they are interrelated.

44. Read line 7 from the first stanza.

Swallows and ospreys nest in my trusses.

How does the line contribute to the development of ideas in the stanza?

E. The line supports the structure's claim that it is beneficial to nature.
F. The line reveals that the structure secretly envies the water's importance in nature.
G. The line emphasizes that the structure is more valuable to nature than the water is.
H. The line reveals the kinship that nature shares with the structure.
45. Read lines 18–20 from the poem.

You are some tears dribbling from a mountain's eye, running down the pavements of small towns, into the cities, to the sea.

What impact do the phrases “some tears dribbling” and “running down” have on the meaning of the poem?

A. They suggest that naturally flowing water is a problem in populated areas.
B. They highlight the different types of naturally flowing water.
C. They imply that the flow of water is weak and influenced by the landscape.
D. They highlight that the flow of water from the mountains is minimal compared with that of the seas.

46. The comparison to sewing in lines 33–35 helps show that the structure

E. enhances the beauty of the natural landscape.
F. brings people together more effectively than nature does.
G. provides clear boundaries for natural environments.
H. serves as a means for people to overcome an obstacle created by nature.

47. The last stanza (lines 36–42) conveys a central idea of the poem by

A. demonstrating that both the structure and the water depend on each other to fulfill their functions.
B. implying that a stronger structure would be able to resist the degradation caused by the water.
C. revealing that the passage of time will render both the structure and the water obsolete.
D. suggesting that the water will eventually weaken the structure and will continue to exist after the structure is gone.

48. Read lines 41–42 from the poem.

Because I am, above all else, patient. I will wait for you.

Which of the following supports what is implied in these lines?

E. “I am older / than anything else you know.” (lines 8–9)
F. “No human / built me.” (lines 9–10)
G. “It all washes down through me.” (line 14)
H. “Those who made you will break you,” (line 26)
49. How does the poet develop the points of view of the structure and the water?
   A. by relating a discussion between them about the future of human civilization
   B. by narrating a debate they have over their impact on the environment
   C. by illustrating the unique power they each possess over nature
   D. by using personification to allow them to debate who is more important

50. How does the form of the poem contribute to its meaning?
   E. The use of an equal number of lines in each stanza emphasizes that both speakers are equally important.
   F. The use of italics in some of the stanzas indicates the increasing tension between the structure and the water.
   G. The alternating positions of the stanzas highlight the opposing points of view of the speakers.
   H. The lack of a regular rhyme scheme or meter reflects the way the water changes the structure and the way the water itself changes.
The eruption of the Philippine volcano Mount Pinatubo in June 1991 sent a huge cloud of gas and dust encircling the globe. The dust and ash from Mount Pinatubo was blamed for a two-year decrease in global temperature, changes in weather patterns, and damage to the ozone layer. The situation brings to mind a time now remembered as “The Year without a Summer,” a meteorological event that occurred 175 years earlier. At that time, harsh weather conditions plagued much of eastern North America and, to a lesser extent, northern Europe.

April 1816 brought typical spring weather to upstate New York and New England; trees budded, and farmers prepared to plow and plant. In May, however, the expected warm temperatures failed to arrive. Most people remained optimistic, waiting for the summer that was “just around the corner.” They waited in vain. During the first week of June, ten inches of snow fell on New England. Throughout the month, temperatures rarely rose above the 30s. Many farmers replanted crops several times, only to see them stunted or destroyed by sleet, hail, and icy winds. July and August brought little improvement. During most days the temperature stayed in the 40s. Farmers' diaries document the farmers’ daily struggles with near-freezing temperatures, failing crops, and dying farm animals. The few crops that managed to survive were killed by frost in mid-September. Winter came early in New England and was unusually severe. Even the South was affected; on July 4, the high temperature for Savannah, Georgia, was only 46 degrees Fahrenheit!

Some religious leaders warned their congregations that the unusual weather meant that the end of the world was drawing near. Other leaders attributed the cool weather to unusual sunspot activity. The proliferation of the newly invented lightning rod was also blamed as some people believed that lightning rods had interrupted the natural temperature balance of Earth, causing the cooler temperatures.

It was not until October that the first plausible explanation for “The Year without a Summer” was suggested. Friedrich Bessel, a German astronomer, reported seeing thick clouds of dust in the upper atmosphere. He theorized that these dust particles screened portions of Earth from the warming rays of the sun. It was discovered that in April 1815, Mount Tambora, an Indonesian volcano, had erupted with such force that it had sent an estimated 100 cubic miles of fine dust into the atmosphere. Witnesses to the eruption reported that the sky remained dark for two days. The dust then rose high into the stratosphere, where it encircled the world for several years to come.

Skeptics in 1816 doubted that a faraway volcano could steal their summer. However, most present-day researchers believe Bessel's explanation to be generally correct, demonstrating the global nature of weather. The dust in the atmosphere eventually settled, and the spring of 1817 was back to normal.

51. Which of the following best tells what this passage is about?

A. the belief of some religious leaders that the end of the world was coming in 1816
B. a summer of strange weather and its probable cause
C. the importance of summer weather to agriculture in New England
D. a comparison of the weather of 1816 and 1991
52. What is the most likely reason farmers persisted in replanting their crops?
   E. They believed that the cold weather could not continue all summer long.
   F. They thought that crops would be able to survive even though the weather remained cold.
   G. They believed that the improved weather conditions of July would last.
   H. They thought the June snowfalls would provide needed moisture.

53. In the winter that followed the summer of 1816, New Englanders most likely experienced
   A. new weather events that they had not encountered before.
   B. temperatures that were warmer than usual for that time of year.
   C. shortages of fruits, vegetables, and other essential crops.
   D. difficulty adjusting to a different timeline for planting crops.

54. How does paragraph 3 contribute to the passage?
   E. It presents the most probable cause of the 1816 weather.
   F. It shows how nineteenth-century people explained the 1816 weather.
   G. It presents a theory about the 1816 weather that some skeptics doubted.
   H. It includes eyewitness reports to describe the source of the 1816 weather.

55. The author includes the details in paragraph 4 about the eruption of Mount Tambora in order to
   A. suggest that the aftermath of the eruption still affects the environment today.
   B. highlight the severe impact that the eruption had on the atmosphere.
   C. provide a description of what happens during a volcanic eruption.
   D. emphasize how differently people perceive natural events in various parts of the world.
56. Which of the following is implied by the phrase “the global nature of weather” (paragraph 5)?

E. Understanding weather events around the world is important for making weather predictions.
F. Extreme weather conditions in some parts of the world can have a lasting impact on a geographical area.
G. Natural disasters tend to occur in different parts of the world at the same time.
H. Conditions in one part of the world can affect weather in another part of the world.

57. The cold summer of 1816 was most likely caused by

A. unusual sunspot activity.
B. the excessive use of lightning rods.
C. damage to the ozone layer.
D. an increase of dust in the atmosphere.
PART 2 — MATHEMATICS

57 QUESTIONS

IMPORTANT NOTES

(1) Formulas and definitions of mathematical terms and symbols are not provided.

(2) Diagrams other than graphs are not necessarily drawn to scale. Do not assume any relationship in a diagram unless it is specifically stated or can be figured out from the information given.

(3) Assume that a diagram is in one plane unless the question specifically states that it is not.

(4) Graphs are drawn to scale. Unless stated otherwise, you can assume relationships according to appearance. For example, (on a graph) lines that appear to be parallel can be assumed to be parallel; likewise for concurrent lines, straight lines, collinear points, right angles, etc.

(5) Reduce (simplify) all fractions to lowest terms.
GRID-IN QUESTIONS

QUESTIONS 58–62

DIRECTIONS: Solve each question. On the answer sheet, write your answer in the boxes at the top of the grid. Start on the left side of each grid. Print only one number or symbol in each box. Under each box, fill in the circle that matches the number or symbol you wrote above. DO NOT FILL IN A CIRCLE UNDER AN UNUSED BOX. DO NOT LEAVE A BOX BLANK IN THE MIDDLE OF AN ANSWER.

58.

In the figure above, PQRS is a parallelogram. What is the value of $x$?

59. The owner of a tree farm plants pine trees and oak trees in a ratio of 8:3. How many oak trees are planted if 264 pine trees are planted?

60. For what value of $w$ is $4w = 2w - 8$?

61. A survey asked students what pets they have. Based on the results, the following statements are all true.

- 20 students have cats.
- 23 students have dogs.
- 3 students have both dogs and cats.
- 5 students have no dogs or cats.

How many students were surveyed?

62. The sum of two consecutive integers is $-15$. If 1 is added to the smaller integer and 2 is subtracted from the larger integer, what is the product of the two resulting integers?
**MULTIPLE Choice QUESTIONS**

**QUESTIONS 63–114**

**DIRECTIONS:** Solve each question. Select the best answer from the choices given. Mark the letter of your answer on the answer sheet. When you are solving questions, you can write in the test booklet or on the scrap paper given to you.

---

63. The set of possible values of $m$ is $\{5, 7, 9\}$. What is the set of possible values of $k$ if $2k = m + 3$?
   
   A. $\{3, 4, 5\}$  
   B. $\{4, 5, 6\}$  
   C. $\{8, 10, 12\}$  
   D. $\{10, 14, 18\}$

64. $7 + (3n + 6) - (4n + 8) =$
   
   E. $5 - n$  
   F. $5 + n$  
   G. $21 - n$  
   H. $21 + n$

---

65. In a certain school, course grades range from 0 to 100. Adrianna took 4 courses and her mean course grade was 90. Roberto took 5 courses. If both students have the same sum of course grades, what was Roberto's mean?
   
   A. 72  
   B. 80  
   C. 90  
   D. 92

66. Jenny starts a game with twice as many marbles as Keiko. Jenny gives Keiko 5 marbles, but she still has 10 more than Keiko. How many marbles did Jenny have to start with?
   
   E. 25  
   F. 30  
   G. 35  
   H. 40

67. In a scale diagram, 0.125 inch represents 125 feet. How many inches represent 1 foot?
   
   A. 0.001  
   B. 0.01  
   C. 0.1  
   D. 0.12
68.

### PEOPLE PER VEHICLE AT CHECKPOINT

<table>
<thead>
<tr>
<th>Number of People in Vehicle</th>
<th>Percent of Vehicles</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>40%</td>
</tr>
<tr>
<td>2</td>
<td>35%</td>

<td>15%</td>
</tr>
<tr>
<td>4</td>
<td>7%</td>
</tr>
<tr>
<td>5 or more</td>
<td>3%</td>
</tr>
</tbody>
</table>

A researcher recorded the number of people in each vehicle that passed through a checkpoint. The table above shows the percent distribution for the 420 vehicles that passed through the checkpoint yesterday morning. How many of the 420 vehicles contained at least 3 people?

- **E.** 42
- **F.** 63
- **G.** 105
- **H.** 315

69.

In the pyramid above, each triangular face has the same area, and the base MNPQ is a square that measures 8 centimeters on each side. If the length of RS = 6 centimeters, what is the surface area of the pyramid excluding the base?

- **A.** 48 sq cm
- **B.** 96 sq cm
- **C.** 128 sq cm
- **D.** 160 sq cm

70. The perimeter of a rectangle is 510 centimeters. The ratio of the length to the width is 3:2. What are the dimensions of this rectangle?

- **E.** 150 cm by 105 cm
- **F.** 153 cm by 102 cm
- **G.** 158 cm by 97 cm
- **H.** 165 cm by 90 cm
71. Which number line below shows the solution to the inequality \(-4 < \frac{x}{2} < 2\)?

A. 

\[ \begin{array}{cccccccc}
-10 & -5 & 0 & 5 & 10 \\
\hline
\end{array} \]

B. 

\[ \begin{array}{cccccccc}
-10 & -5 & 0 & 5 & 10 \\
\hline
\end{array} \]

C. 

\[ \begin{array}{cccccccc}
-10 & -5 & 0 & 5 & 10 \\
\hline
\end{array} \]

D. 

\[ \begin{array}{cccccccc}
-10 & -5 & 0 & 5 & 10 \\
\hline
\end{array} \]

72. 1 dollar = 7 lorgs
   1 dollar = 0.5 dalt

Kevin has 140 lorgs and 16 dalts. If he exchanges the lorgs and dalts for dollars according to the rates above, how many dollars will he receive?

E. $28
F. $52
G. $182
H. $282

73. A box of colored pencils contains exactly 6 red pencils. The probability of choosing a red pencil from the box is \( \frac{2}{7} \). How many of the pencils in the box are not red?

A. 5
B. 15
C. 21
D. 30

74. The sum of the numbers \( x, y, \) and \( z \) is 50. The ratio of \( x \) to \( y \) is 1:4, and the ratio of \( y \) to \( z \) is 4:5. What is the value of \( y \)?

E. 4
F. 8
G. 10
H. 20

75. What is the area of the shaded region in the graph above?

A. 0.25 square unit
B. 0.5 square unit
C. 1 square unit
D. 1.5 square units

76. In Centerville, 45% of the population is female, and 60% of the population commutes to work daily. Of the total Centerville population, 21% are females who commute to work daily. What percentage of the total Centerville population are males who do not commute to work daily?

E. 15%
F. 16%
G. 24%
H. 39%
77. Mrs. Cranston bought five bottles of water for $0.90 each and 8 pounds of meat. She paid a total of $26.90 for these items, not including tax. What was the price per pound of the meat?

A. $2.80  
B. $3.25  
C. $14.40  
D. $22.40

78. In a sample of 10 cards, 4 are red and 6 are blue. If 2 cards are selected at random from the sample, one at a time without replacement, what is the probability that both cards are not blue?

E. $\frac{2}{15}$  
F. $\frac{4}{25}$  
G. $\frac{3}{10}$  
H. $\frac{1}{3}$

79. 1 sind = 4 lorgs  
2 plunks = 5 dalts  
5 sinds = 2 harps  
1 plunk = 3 harps

A nation has five types of coins: sinds, dalts, lorgs, harps, and plunks. The relationship between the coins is shown above. Which coin is most valuable?

A. sind  
B. dalt  
C. harp  
D. plunk

80. 

<table>
<thead>
<tr>
<th>Score</th>
<th>Number of Students</th>
</tr>
</thead>
<tbody>
<tr>
<td>85</td>
<td>4</td>
</tr>
<tr>
<td>75</td>
<td>4</td>
</tr>
<tr>
<td>65</td>
<td>2</td>
</tr>
</tbody>
</table>

What is the mean score of the 10 students in the table above?

E. 22.5  
F. 75  
G. 77  
H. 85
81. How many more people in Center City walk to work than ride their bicycle to work?

A. 2,500  
B. 2,700  
C. 2,800  
D. 3,000

82. Which of the following numbers has factors that include the smallest factor (other than 1) of 91?

E. 30  
F. 35  
G. 39  
H. 44

83. In a scale drawing of a triangular banner, one side measures 16 centimeters and the other two sides each measure 12 centimeters. On the actual banner, these two sides each measure 36 feet. What is the length of the remaining side of the actual banner?

A. 16 ft  
B. 32 ft  
C. 40 ft  
D. 48 ft

84. The faculty of a certain four-year college consists of 179 teachers. There are 663 first-year students. The student-to-faculty ratio for the entire college is 15 to 1. What is the total number of second-, third-, and fourth-year students?

E. 1,989  
F. 2,022  
G. 2,652  
H. 2,685

85. What is the value of the expression shown above?

\[ \frac{2}{5} + \frac{3}{10} + \frac{4}{5} + \frac{5}{2} \]

What is the value of the expression shown above?

A. 14 \frac{7}{20}  
B. 14 \frac{2}{5}  
C. 15 \frac{7}{20}  
D. 15 \frac{2}{5}
86. A car is traveling 55 miles per hour, and 1 mile = 5,280 feet. Which of the following calculations would give the car’s speed in feet per second?

E. \( \frac{55 \times 5,280}{1} \)

F. \( \frac{55 \times 5,280}{3,600} \)

G. \( \frac{55 \times 3,600}{5,280} \)

H. \( \frac{55 \times 5,280}{60} \)

87. Today, Tien’s age is \( \frac{1}{4} \) of Jordan’s age. In 2 years, Tien’s age will be \( \frac{1}{3} \) of Jordan’s age. How old is Jordan today?

A. 4 years old
B. 6 years old
C. 12 years old
D. 16 years old

88. How many positive even factors of 48 are greater than 24 and less than 48?

E. 0
F. 1
G. 2
H. 12

89. The least of 5 consecutive integers is \( l \), and the greatest is \( g \). What is the value of \( \frac{l + g}{2} \) in terms of \( l \)?

A. \( 2l \)
B. \( 3l \)
C. \( l + 2 \)
D. \( l + 5 \)

90. Johan leased a car for three years. He paid a one-time fee of $1,000, and an additional $300 per month for the full three years. At the end of the three years, what is the total amount Johan paid for leasing this car?

E. $1,900
F. $4,600
G. $10,800
H. $11,800

91. There are 6 different cookies on a plate. Aiden will choose 2 of these cookies to pack in his lunch. How many different pairs of 2 cookies can he choose from the 6?

A. 12
B. 15
C. 30
D. 36

92. For a presentation, Deion can create 5 slides in 20 minutes, working at a constant rate. Kyra can create 3 slides in 10 minutes, working at her own constant rate. What is the total number of slides the two of them can create in one hour?

E. 16
F. 30
G. 33
H. 55
93. On the number line above, \( LN = \frac{1}{8} \). Point M (not shown) is located between point L and point N. Which value below is a possible value for M?

A. 4.26  
B. 4.31  
C. 4.35  
D. 4.58

94. An unmarked straight stick will be laid end over end to measure a distance of exactly 72 feet. The same stick will be used in the same way to measure a distance of exactly 30 feet. What is the length of the longest possible stick that can be used for both measurements?

E. 3 ft  
F. 4 ft  
G. 6 ft  
H. 8 ft

95. Ryan must read 150 pages for school this weekend. It took him 30 minutes to read the first 20 pages. At this rate, how much additional time will it take him to finish the reading?

A. \( 2\frac{1}{6} \) hr  
B. \( 3\frac{1}{4} \) hr  
C. \( 3\frac{3}{4} \) hr  
D. \( 7\frac{1}{2} \) hr

96. Suppose \( M = \frac{w}{x} \), \( N = \frac{y}{z} \), and \( w, x, y, \) and \( z \) do not equal 0. What is \( \frac{M}{N} \) in terms of \( w, x, y, \) and \( z \)?

E. \( \frac{wx}{yz} \)  
F. \( \frac{wy}{xz} \)  
G. \( \frac{wz}{xy} \)  
H. \( \frac{xy}{wz} \)

97. In the set of consecutive integers from 12 to 30, inclusive, there are four integers that are multiples of both 2 and 3. How many integers in this set are multiples of neither 2 nor 3?

A. 5  
B. 6  
C. 13  
D. 15
98. The graph above shows the number of schools per city for five small cities. Cities M and N each have 500 students per school. City P has 400 students per school. Cities Q and R each have 700 students per school. Which of the five cities has the greatest number of students?

E. City M  
F. City P  
G. City Q  
H. City R

99. A box contains 5 strawberry candies, 3 banana candies, and 2 orange candies. If Braden selects 2 candies at random from this box, without replacement, what is the probability that both candies are not banana?

A. \( \frac{1}{15} \)  
B. \( \frac{9}{100} \)  
C. \( \frac{7}{15} \)  
D. \( \frac{49}{100} \)

100. In the equation above, \( w \), \( x \), \( y \), and \( z \) are positive numbers. Which of these is equal to \( z \)?

E. \( x \)  
F. \( xy \)  
G. \( \frac{w}{xy} \)  
H. \( \frac{xy}{w} \)

101. On the number line above, points W, X, Y, and Z are integers, and WX:XY:YZ = 4:2:3. What is the value of WY?

A. 8  
B. 11  
C. 12  
D. 18
102. A metal square used in an electronic device must have a thickness of 0.02 inch, with an allowable error of 1 percent. What is the greatest allowable thickness of the metal square?

E. 0.0002 in.
F. 0.02 in.
G. 0.0202 in.
H. 0.03 in.

103. Mr. Blake's biology class is divided into three sections. The same test was given to each section. The table above shows both the lowest score and the range of scores on this test for each section. What is the overall range of all scores in all three sections?

<table>
<thead>
<tr>
<th>Section</th>
<th>Lowest Score</th>
<th>Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>65</td>
<td>28</td>
</tr>
<tr>
<td>II</td>
<td>62</td>
<td>25</td>
</tr>
<tr>
<td>III</td>
<td>67</td>
<td>22</td>
</tr>
</tbody>
</table>

A. 25
B. 27
C. 28
D. 31

104. If $3n$ is a positive even number, how many odd numbers are in the range from $3n$ up to and including $3n + 5$?

E. 2
F. 3
G. 4
H. 5

105. \[ \frac{10}{13} = 0.769230 \]

In the infinitely repeating decimal above, 7 is the first digit in the repeating pattern. What is the 391st digit?

A. 0
B. 3
C. 6
D. 7

106. A car travels at 4,400 feet per minute. The radius of each tire on the car is 1 foot. How many revolutions does one of these tires make in 1 minute? (Use the approximation $\frac{22}{7}$ for $\pi$.)

E. 700
F. 1,925
G. 13,828
H. 15,400

107. \[ 100(2 + 0.1)^2 - 100 = \]

A. 101
B. 200
C. 301
D. 341
108. A sports store has a container of handballs: 4 blue, 5 red, 8 yellow, 9 white, and 11 green. If one ball is picked from the container at random, what is the probability that it will be yellow?

E. \( \frac{1}{37} \)  
F. \( \frac{1}{8} \)  
G. \( \frac{8}{37} \)  
H. \( \frac{8}{29} \)

109. Each week, Leon has fixed expenses of $1,250 at his furniture shop. It costs him $150 to make a chair in his shop, and he sells each chair for $275. What is Leon’s profit if he makes and sells 25 chairs in 1 week?

A. $1,875  
B. $2,500  
C. $3,125  
D. $4,375

110. Using the approximation 2.54 centimeters = 1 inch, how many centimeters are in 4 feet 7 inches?

E. 21.65  
F. 119.38  
G. 121.92  
H. 139.70

111. On the number line above, JK = 3 \( \frac{1}{2} \), JM = 9 \( \frac{3}{4} \), and LM = 1 \( \frac{1}{8} \). What is the position of point L?

A. 5 \( \frac{1}{8} \)  
B. 5 \( \frac{1}{4} \)  
C. 5 \( \frac{1}{2} \)  
D. 6 \( \frac{1}{4} \)

112. If \( 4x - 3y = 12 \), what is \( x \) in terms of \( y \)?

E. \( x = \frac{3}{4}y + 12 \)  
F. \( x = -\frac{3}{4}y + 12 \)  
G. \( x = \frac{3}{4}y + 3 \)  
H. \( x = -\frac{3}{4}y + 3 \)
### 113.

**SERVINGS OF FRUITS AND VEGETABLES**

<table>

There are 20 students in a class. The frequency table above shows the number of students in this class who ate 0, 1, 2, 3, 4, or 5 servings of fruits and vegetables yesterday. What is the mean number of servings of fruits and vegetables eaten yesterday per student in this class?

- **A.** $1 \frac{1}{2}$
- **B.** 3
- **C.** $3 \frac{1}{3}$
- **D.** 4

### 114.

A paste used to cover a billboard is made by mixing the following ingredients by weight: 4 parts powder, 3 parts water, 2 parts resin, and 1 part hardener. To cover one billboard requires 30 pounds of this paste. How many total pounds of resin are required to cover 4 billboards?

- **E.** 6
- **F.** 8
- **G.** 24
- **H.** 48
REVISING/EDITING PART A

1. (D) The question asks for the most precise revision for the words “talked to some people who did the best in the contest.” Option D is the correct response because the revision precisely states both the reporter’s action (“interviewed”) and whom the reporter interviewed (“the top three contestants”). Option A is an incorrect response because the revision does not provide precise information about the number of people interviewed. Option B is an incorrect response because the revision uses the imprecise phrase “who did well.” Option C is an incorrect response because the revision does not provide precise information about the number of people interviewed.

2. (G) The question asks for the pair of revisions needed to correct the errors in the paragraph, which appear in sentence 2 and sentence 3. Option G is correct because it is the only choice that revises the errors in both sentence 2 and sentence 3. In sentence 2 (Option G and Option H), a comma needs to follow the word “company” to set off the phrase “who owned a cleaning product company.” A comma is necessary because the phrase is a nonrestrictive clause: the phrase provides extra information about Cleo and Noah McVicker’s line of work, but the phrase is not necessary in order to understand the meaning of the sentence. The second error is in sentence 3 (Option E and Option G), which incorrectly shifts the verb into the present tense. The clause “as natural gas becomes more common” should be “as natural gas became more common.” The comma after the word “homes” in sentence 1 (Option E and Option F) is necessary for separating the subordinate clause “When coal was used to heat homes” from the main clause. In sentence 4 (Option F and Option H), the word “remarketed” is in the past tense established in the rest of the paragraph and should not change to the past perfect tense “had remarke.ted.”

3. (A) The question asks for the identification of the sentence in the paragraph that has an error in its construction and should be revised. Option A (sentence 1) is the correct response because sentence 1 contains a structural error. The sentence begins with a list of modifying phrases: “Walking dogs, cleaning kennels, hand-feeding newborn kittens, and supporting the pet-adoption process.” As written, this list modifies the closest noun phrase, “the animal shelter,” which is illogical because the list describes tasks at the animal shelter, not the shelter itself. The list should follow the word “tasks” at the end of the sentence, so that it is closer to the word that it modifies. Option B, Option C, and Option D are incorrect responses because sentence 2, sentence 3, and sentence 4 do not contain structural errors. For Option B, the phrase “especially those who aspire to care for and protect animals” in sentence 2 correctly modifies “young people.” For Option C, the structure of sentence 3 allows the words “In addition to hands-on training with animal care” to correctly modify “volunteers will learn.” For Option D, the phrase “which is the awareness and understanding of the feelings of others” in sentence 4 correctly modifies the word “empathy.”

REVISING/EDITING PART B

Moving through Mountains

4. (G) The question asks which sentence should be added to the end of the first paragraph in order to introduce the topic of the passage, which is the description, construction, and use of the Gotthard Base Tunnel. Option G correctly presents and describes the Gotthard Base Tunnel. Option E is incorrect because it offers overly detailed information about the funding used to build the Gotthard Base Tunnel, and it does not provide a description of the tunnel. Option F is incorrect because it gives details about the opening ceremony of the tunnel, and it does not provide a description of the tunnel. Option H is incorrect because it offers a result of completing the Gotthard Base Tunnel, rather than offering an introductory statement presenting and describing the tunnel.

5. (B) The question asks for a sentence that provides additional details about the tunnel-boring machines used to build the Gotthard Base Tunnel in order to support the description of the machines in sentence 7. Option B is correct because it offers specific details about how tunnel-boring machines, such as the ones used to create the Gotthard Base Tunnel, drill through rock. Option A is incorrect because it offers information about how tunnel-boring machines were an improvement over previous methods but does not include information about how the machines work. Option C is incorrect because it presents the idea that the tunnel could not be built until advances were made in tunnel-boring machine technology and does not describe how the machines function. Option D is incorrect because, though it explains that there are different types of cutter heads used for different geologies, the geology of the tunnel area is not discussed in sentence 7, nor in the rest of the paragraph.

6. (H) The question asks where sentence 11, which completes the detailed steps of how the tunnel was
built, should be moved within the second paragraph in order to improve the organization of the paragraph. Option H, placing the sentence between sentences 9 and 10, is correct because placing the sentence there helps the reader understand the full sequence of steps performed in constructing the tunnel before the cost of the project is introduced. Similarly, Option F is incorrect because placing the sentence after sentence 6 would not make sense since the process of building the tunnel has not yet been introduced. Similarly, Option E is incorrect because placing the sentence between sentences 8 and 9 would also be incorrect because the use of concrete did not take place before the removal of “28 million tons of rock” (sentence 9).

7. (D) The question asks which sentence should be removed because it presents an idea that shifts away from the main idea of the third paragraph, which is about the transportation benefits of the Gotthard Base Tunnel. Option D (sentence 16) is the correct response because, even though the sentence provides additional information about the Channel Tunnel, it does not help the reader understand the benefits of the Gotthard Base Tunnel, so it should be removed. Option A (sentence 13) is incorrect because the idea of faster travel times is important to the development of the main idea of the paragraph. Option B (sentence 14) is incorrect because the sentence provides a specific example of decreased travel time between two cities when traveling through the Gotthard Base Tunnel, supporting the development of ideas in the paragraph. Option C (sentence 15) is incorrect because the sentence compares the Gotthard Base Tunnel to another tunnel that provides an important connection between places, and the sentence supports the idea that transportation innovations are beneficial.

8. (G) The question asks for a transition that bridges the ideas between sentences 17 and 18 and accurately presents the relationship. Option G is correct because it bridges the sentences by referring to the Gotthard Base Tunnel as a solution to the problems described in sentence 17 and logically introducing sentence 18. Option E is incorrect because the use of the word “although” and the mention of freight trains suggest that sentence 18 will be about other types of vehicles that use the Gotthard Base Tunnel, and the transition phrase does not logically precede the sentence. Option F is incorrect because the reference to the amount of time it took to build the tunnel does not help lead into the idea presented in sentence 18. Option H is incorrect because it suggests that sentence 18 is related to the increasing number of trains using the Gotthard Base Tunnel, which is not accurate.

9. (B) The question asks for a concluding sentence that supports key ideas about the topic developed earlier in the passage. Option B is correct because it supports the points made in the introductory paragraph by affirming the idea that the Gotthard Base Tunnel is an example of a way people have improved life by overcoming obstacles. Option A is incorrect because the economies of surrounding areas were never mentioned in the passage. Option C is incorrect because, although the construction of the Gotthard Base Tunnel appears to have required many people to work together, the passage does not explicitly mention people or groups working together. Option D is incorrect because it focuses on the cost of the Gotthard Base Tunnel, which is referred to only in sentence 10 of the passage.

10. (H) The question asks for the statement that best illustrates the central idea of the passage. Paragraphs 2 through 5 focus on Marsh’s personal experiences and his ideas about nature, and paragraph 8 explains how his ideas are the basis for the conservation movement. These two aspects comprise the central idea of the passage and are best stated in Option H. Option E is incorrect because it focuses mainly on Marsh’s early life and does not address his influence. Option F is incorrect because, while it describes specific details about Marsh’s beliefs, it does not explain who he was or how he affected the conservation movement. Option G is incorrect because it emphasizes that Marsh’s ideas were radical and influential but does not provide any information about what Marsh’s beliefs were.

11. (D) The question asks for the specific reason Marsh believed people caused harm to the environment. Marsh credited the land abuse he observed in Vermont and Italy to people’s lack of understanding, or ignorance, of nature (paragraph 3) and “the popular belief that nature can heal any damage that people inflict upon it” (paragraph 5). This concept is stated in Option D. Option A is incorrect because, although people are currently working to improve the environment, the passage does not state that Marsh believed that people in his time expected...
future generations to solve environmental problems. Option B is incorrect because, while the people of Marsh’s time made advances in industry, Marsh did not indicate that he believed that people thought industrial progress outweighed efforts to protect the environment. Option C is incorrect because, while many people at the time participated in “environmental degradation” (paragraph 1), none of the evidence in the passage suggests that Marsh believed that people were unwilling to change their practices.

12. (F) The question asks for the reason the word “surprisingly” was used in paragraph 1. The beginning of paragraph 1 leads the reader to expect that Marsh was part of the modern environmental movement that began in the 1960s. Therefore, the fact that Marsh’s influential book was published one hundred years earlier is surprising, and so Option F is correct. Option E is incorrect because, while Marsh’s ideas have had a resurgence in popularity since the 1960s (paragraph 1), Marsh’s observations about deforestation in Vermont (paragraph 2) and land mismanagement in Italy (paragraph 3) indicate that his ideas were just as applicable in his time as they are today. Option G is incorrect because, while Marsh could not have been aware that his ideas would lead to the start of a conservation movement, paragraph 1 indicates that Marsh introduced the principles of the environmentalist movement before it became popular. Option H is incorrect because, while it is possible that a greater awareness of human impact on the environment during Marsh’s time could have prevented certain environmental issues today, this idea is conjecture and does not explain the author’s reason for using the word “surprisingly.”

13. (C) The question asks for evidence that supports Marsh’s theories about nature, based on the passage. The passage states that ideas from Marsh’s book are now considered basic knowledge in the field of environmental science (paragraph 6). This statement supports the idea that his theories about nature were accurate, making Option C correct. Option A is incorrect because, while Marsh made observations of the harm that people were causing to the environment (paragraphs 2 and 3), the details about his observations do not provide evidence that his theories were accurate. Option B is incorrect because, while Marsh’s writing did inspire a conservation movement (paragraph 8), these details do not call attention to the accuracy of his ideas. Option D is incorrect because it refers to Marsh’s personal opinions (paragraph 7), not his theories.

14. (H) The question asks for a specific detail that supports the author’s statement in paragraph 5. In paragraph 5, the author states that “Marsh argued that people may use and enjoy, but not destroy, the riches of the earth.” Marsh’s approval of the Suez Canal shows that Marsh did not oppose certain human innovations, because the advantages—improved transportation and commerce—enriched human life and outweighed environmental damage (paragraph 7). Option H describes that idea. Option E is incorrect because it is not relevant to the statement in question. Option F is incorrect because, while it acknowledges Marsh’s contributions to the conservation movement, it does not relate to his attitudes about certain alterations to the environment. Option G is incorrect because it relates to a time when Marsh observed environmental degradation in Italy.

15. (C) The question asks for the idea Marsh had that was the most influential on the movement in the 1960s. Marsh’s main contribution to the modern environmental movement—the idea that Western society is causing irreversible harm to the environment—is given in paragraph 1, making Option C correct. Option A is incorrect because, while Marsh did believe that some human alterations to the environment are necessary (paragraph 7), the negative impact of human activity was his most influential idea. Option B is incorrect because, while Marsh believed that people lacked an understanding of nature (paragraph 3), this belief is a detail in support of his overall claim. Option D is incorrect because, while Marsh observed firsthand that environmental degradation had been occurring for many years (paragraph 3), that was not the focus of his most influential idea.

Champion of the Channel

16. (H) The question asks what the sentence reveals about Ederle’s challenges leading up to her attempt to swim across the channel. Option H is correct because the sentence implies a lack of social support since many people believed that a woman, no matter how skilled a swimmer, did not have the strength to overcome the physical challenges that the dangerous channel waters presented (paragraph 1: “He claimed that ‘even the most uncompromising champion of the rights and capacities of women must admit that in contests of physical skill, speed and endurance they must remain forever the weaker sex.’”). Option E is incorrect because the idea that Ederle was at a disadvantage because she was American rather than English, and thus less familiar with the channel, was not the basis for the newspaper editor’s
prediction about the outcome of her swim. Option F is incorrect because the passage establishes that Ederle was a highly accomplished swimmer who had won major world competitions (paragraph 1: “. . . Gertrude Ederle, an American swimmer with eighteen world records and three Olympic medals . . .”). Option G is incorrect; the newspaper editor’s point was that it would be impossible for Ederle to complete the swim because she was a woman, not because people were uncomfortable with the idea since no woman had attempted it before.

17. (A) The question asks for the best summary of Ederle’s steps to prepare for her second attempt to swim across the English Channel. Ederle’s preparation is outlined in paragraph 4. Option A is correct because it acknowledges the idea that Ederle involved her sister in this process, and it details the efforts the two took to improve Ederle’s equipment, including waxing her goggles and designing a better swimsuit. Option B is incorrect because it focuses on Ederle’s actions in the moments before (covering her body with grease for insulation) and during her swim (finding her “sphere”), not her overall preparation methods. Option C is incorrect because it refers to a practice that was employed to help Ederle keep her strokes in rhythm during her swim. Option D is incorrect because it does not refer to the series of steps that Ederle took to prepare for her swim but rather to just one of the efforts made (improving equipment) without acknowledging her sister’s contributions.

18. (G) The question asks how the sentence from paragraph 3 fits into the overall structure of the passage. Option G is correct because it explains that Ederle’s awareness of another female swimmer preparing to make an attempt to swim the channel directly influenced Ederle’s decision to make her second attempt as quickly as possible. Ederle wanted to be the first woman to successfully swim across the channel. Option E is incorrect because the passage does not provide information about other female swimmers who were inspired by Ederle to swim across the channel. Option F is incorrect because, although Ederle did rethink her methods between her first and second attempts, the sentence does not show any sort of realization nor does it address her reasoning for rethinking her methods. Option H is incorrect because the sentence is not related to Ederle’s process for learning from her mistakes.

19. (C) The question asks for the best support for the idea that Ederle’s swim across the channel was successful because of her innovative approach to the challenge. Option C is correct because the sentence from paragraph 5 explains that Ederle employed a newly developed type of stroke that allowed her to maintain her pace through the rough water. Option A is incorrect because the sentence from paragraph 1 shows that her performance was groundbreaking but not necessarily creative. Option B is incorrect because the layers of grease primarily served to help maintain Ederle’s body temperature in the water, and there is nothing in the passage to suggest that this was an innovative practice. Option D is incorrect because the sentence from paragraph 6 simply states that Ederle fought against the waves and completed her swim, and it does not describe how Ederle employed innovative techniques.

20. (G) The question asks about the effect of the word “insurmountable,” which means “incapable of being overcome,” in paragraph 4. Option G is correct because the suit Ederle wore during her first attempt to swim the channel “stretched out, filling with water and creating drag” (paragraph 4), which likely contributed to her failed attempt to swim across the channel. Option E is incorrect; Ederle did not complete her first swim because she became ill (paragraph 3: “Just six miles short of finishing, she became ill, and her coach had to haul her out of the water.”), not because the suit made it impossible for Ederle to complete her swim. Option F is incorrect because the author uses the word “insurmountable” to draw attention to the increased difficulty caused by the swimsuit, not to draw attention to the sisters’ creativity in solving the problem. Option H is incorrect because the passage does not address whether the original swimsuit was custom made, simply that the swimsuit created additional difficulties for Ederle in a situation that was already difficult.

21. (D) The question asks how a problem-and-solution structure in paragraph 5 contributes to the ideas presented in the passage. Option D is correct because the paragraph describes how the water’s temperature made Ederle uncomfortable and made it difficult for her to regulate her stroke. The paragraph continues with the explanation of how she overcame these issues by focusing her mind on the sea and tuning out the distractions in her surroundings (paragraph 5: “. . . the sea became her only companion and the shrieks of gulls and the humming of boat engines faded away.”). Option A is incorrect because the details in paragraph 5 do not provide a connection between the cold temperature of the water and the effectiveness of Ederle’s training. Option B is incorrect because the difficulties Ederle encountered were only partially relieved by her team, and her team’s efforts to ensure Ederle’s safety is not explained in the
passage. Option C is incorrect because the paragraph does not focus on the relationship between the problems Ederle encountered at the start of her swim and the problems she encountered during or near the end of her swim.

22. (H) The question asks for an explanation of how paragraph 7 contributes to the development of a central idea of the passage. Paragraph 7 is mainly about Ederle's physical and emotional state as she pushed through a difficult portion of her swim and realized her goal was in sight. A central idea of the passage is that Ederle's passion and determination allowed her to accomplish her goal of being the first woman to cross the English Channel. Option H is correct because it emphasizes her passion by referring to the overwhelming emotions Ederle felt as she progressed during her swim, despite the unfavorable conditions (paragraph 7: “For hours Ederle swam, dodging debris with an amused smile” and “Yet Ederle felt indescribably happy as she churned through the sea.”). Option E is incorrect because, although Ederle needed physical strength and mental fortitude to complete the swim, the paragraph contributes to a central idea because it highlights her emotion as she swam, not her physical strength or mental fortitude. Option F is incorrect because the paragraph focuses on Ederle’s emotional response to the challenging circumstances and not the idea that Ederle was at the “edge of her physical capabilities.” Option G is incorrect because Ederle’s feelings of happiness and amusement were caused by her anticipation and excitement as she approached achieving her goal, not by the severe weather.

23. (A) The question asks for an explanation of how Ederle’s successful swim across the channel affected American attitudes. Option A is correct because the passage indicates that there was a large increase in the number of American men and women who became physically active and who obtained swimming certificates shortly after Ederle’s swim (paragraph 9: “Over the next few years, more than 60,000 people credited her with motivating them to earn their American Red Cross swimming certificates.”). Option B is incorrect because, although there was an increase in the number of people learning to swim, the passage does not provide details about people who were inspired by Ederle to take on extreme challenges such as swimming across the channel. Option C is incorrect because, although Ederle did, in fact, surpass the men’s time for the swim by two hours, the passage does not provide information about how this achievement affected the American people’s perception of the capabilities of men and women. Option D is incorrect because, although the passage does explain how Ederle’s determination and perseverance led to her eventual success, it does not demonstrate how this affected American attitudes toward overcoming failures.

24. (H) The question asks for the sentence from the passage that best conveys the author’s perspective about the impact of Ederle’s swim. Option H is correct because, throughout the passage, the author emphasizes that Ederle’s accomplishment was memorable and great, which is best stated in the sentence from paragraph 8. The sentence presented in Option E is incorrect because it focuses on Ederle’s personal attributes that allowed her to successfully complete her swim, not the author’s perspective about the impact of her achievement. The sentence presented in Option F is incorrect because the details in the sentence relate to Ederle’s state of mind as she came closer to achieving her goal and does not provide details about the author’s opinion of the impact of Ederle’s accomplishment. The sentence presented in Option G is incorrect because it simply presents Ederle’s emotional state as she nears her goal and does not provide information about the author’s perspective.

25. (A) The question asks for an explanation of how the table at the end of the passage contributes to the development of the topic of the passage. The table provides information about the earliest speed records set for crossing the channel, including Ederle’s, and information about present-day records, which are much faster. Option A is correct because the information in the table develops the topic of Ederle’s historic swim across the channel by indicating that people have continued to swim the channel and have found new ways to set speed records over time. Option B is incorrect because, even though the table presents the time for the current female record holder, there is no indication in the passage or in the table that the record holder was inspired by Ederle. Option C is incorrect because the passage does not provide information about other female swimmers’ successful swims across the channel. Option D is incorrect because, although the table allows for the comparison of times, the topic of the passage is related to Ederle’s record in comparison with other swimmers of her time, not present-day swimmers.

Excerpt from A Tramp Abroad

26. (F) The question asks about the phrase, which highlights the behavior of ants from different parts of the world, and about what the inclusion of the phrase shows about the author. Option F is correct because the
phrase is meant to communicate a caution that while the author believes most ants are foolish, his observations in the excerpt do not apply to all types of ants. Option E is incorrect because, in the excerpt, the author is comparing species of ants to one another and not to other living creatures. Option G is incorrect because the author never comments in the excerpt that challenging common or strongly held beliefs is, in general, difficult. Option H is incorrect because the author never expresses in the excerpt the idea that the conclusions drawn about the ants’ behavior are flawed; the reference to Swiss and African ants is meant to show that those ants are an exception.

27. (A) The question asks how the central idea that “the average ant is a sham” (paragraph 1) is expressed in the excerpt. The excerpt focuses on the author's humorous explanation of the ineffective struggles of two ants to accomplish a task, and the excerpt concludes with the statement that ants are not as smart as people think: “the ant has been able to fool so many nations” (paragraph 4). This point is stated in Option A. Option B is incorrect because the reference to ants in other locations is a detail mentioned only in paragraph 1 and is not directly related to the central idea mentioned in the question. Option C is incorrect because, while the narrator does observe the ants, the observations made are highly opinionated and not characterized as especially insightful or perceptive. Option D refers to the detail in paragraph 2 that states that the objects ants seek out are “generally something which can be of no sort of use to himself or anybody else” (paragraph 2), but this is not the main way the author conveys the premise that ants are a sham or false, and therefore, Option D is incorrect.

28. (H) The question asks for an explanation of how the words “grabs” “yanks,” and “tearing away” (paragraph 2) contribute to the meaning of the excerpt. Option H is correct because these words convey sudden movements as the ant becomes more upset in his efforts to transport the grasshopper leg. Option E is incorrect because the ant is never described in the excerpt as believing his work to be important. Option F is incorrect because the ant’s inability to make progress while transporting the grasshopper leg by himself demonstrates the ant’s inefficiency (paragraph 2: “At the end of half an hour he fetches up within six inches of the place he started from”). Option H is incorrect because the ant does not complete his tasks despite moving in a hurried and determined way (paragraph 2: “not calmly and wisely, but with a frantic haste which is wasteful of his strength”).

29. (C) The question asks for an explanation of how the details in the sentence convey the central idea, which is that the ant makes poor choices because of his lack of intelligence and his inability to understand even the most basic problem or obstacle. Option C is correct because the author’s description of the ant climbing up and over the weed rather than simply going around the weed supports the central idea. Option A is incorrect because, although the ant does waste much of his strength, the idea conveyed in the sentences is more related to the ant’s inability to solve a problem in the simplest way (paragraph 2: “which is as bright a thing to do as it would be for me to carry a sack of flour from Heidelberg to Paris by way of Strasburg steeple”). Option B is incorrect because the idea that the ant is surprised by the amount of effort needed to carry the object is not a central idea of the excerpt; nor does the excerpt suggest that the ant is surprised by this in the first place. Option D is incorrect because the ant has already acquired the object, and the details in the sentence do not convey an idea about the ant’s unnecessary effort.

30. (H) The question asks for the text from the passage that explains why the author finds the behavior of the ants fascinating. The author’s purpose in describing the excessively foolish actions of the ants is to prove his argument that in spite of what people have long believed, ants are completely lacking in intelligence. Option H is correct because the quoted text in Option H shows the author’s interest in the difference between public opinion and observed truth. Option E is incorrect because the quoted text in Option E provides details that reflect the author’s basic interest, but this observation does not extend to the level of fascination. Option F is incorrect because the author’s main message in the excerpt is that the ant, however industrious, is foolish. Option G is incorrect because the quoted text in Option G also provides details that would reflect a basic interest and observation but that do not extend to fascination.

31. (B) The question asks how the sentence, which states that the ant ends up only six inches from his original starting point, contributes to the central idea of the excerpt. Option B is correct because it explains how the idea in the sentence supports the central idea that “the average ant is a sham” (paragraph 2) by emphasizing his lack of progress and wasted effort. Option A is incorrect because, while the author recognizes the pointlessness of the efforts, the ant never becomes aware that his efforts are purposeless. Option C is incorrect because the ant ending up only six inches from his starting point suggests pointless effort, not an industrious or productive attitude. Option D is incorrect because the emphasis of
32. (G) The question asks for a sentence in the excerpt that supports the idea that the ant's "leather-headedness" (paragraph 4), or the ant's stubborn determination to engage in foolish and worthless actions, amounts to ignorance and idiocy. Option G is correct because, in the sentence in Option G, the ant realizes he is in the wrong place only after wasting effort and strength, which reveals his stupidity and lack of awareness. Option E is incorrect because the sentence in Option E poses the question that the ant should ask himself and does not demonstrate the ant's ignorance and idiocy. Option F is incorrect because the sentence in Option F simply describes the ant's action of lifting the grasshopper leg into a position to carry it. Option H is incorrect because, while the sentence in Option H describes the ant's exhaustion, which is caused by his stubborn determination, the sentence does not provide a connection to the ant's leather-headedness.

33. (B) The question asks for an explanation of how the sentence, which highlights the second ant's interest in the grasshopper leg, fits into the structure of the excerpt. Option B is correct because the sentence shows a shift from paragraph 2, which analyzes the actions of the first ant alone, to paragraph 3, which comments on the conversation between the two ants and the ensuing efforts of the two ants together. Option A is incorrect because the idea that the ant seeks out worthless items, such as a grasshopper leg, is established in paragraph 2 ("it is generally something which can be of no sort of use to himself or anybody else"). Option C is incorrect because paragraph 3 is a continuation of the author's tale and not an expansion of the focus of his commentary. Option D is incorrect because the author does not compare the purposefulness of the two ants.

34. (E) The question asks for an explanation of how the word choice in the sentence adds to the meaning of the excerpt. The image the author creates of two sweating ants abandoning the grasshopper leg to look for "an old nail," which an ant would want because it is "valueless," is comical, as suggested in Option E. Option F is incorrect because it is a misinterpretation of the excerpt, as the ants are not confused but are acting decisively (paragraph 3: "Then they go at it again, just as before"). Option G is incorrect because the ants find moving heavy objects to be an amusing way to spend their time and are not aware enough to feel frustrated (paragraph 3: "something else that is heavy enough to afford entertainment and at the same time valueless enough to make an ant want to own it"). Option H is incorrect because the ants are willingly giving up on their object (paragraph 3: "decide that dried grasshopper legs are a poor sort of property after all").

35. (C) The question asks how the second ant, a friend, influences the first ant. Option C is correct because the friend's complimentary remark about the grasshopper leg serves to encourage the first ant to continue his efforts to drag the useless object home (paragraph 2: "Evidently the friend remarks that a last year's grasshopper leg is a very noble acquisition"). Option A is incorrect because the first ant does not know where his home is (paragraph 2: "He doesn't know where home is. His home may be only three feet away; no matter, he can't find it"). Option B is incorrect because, while the friend offers to help the first ant (paragraph 3: "Evidently the friend contracts to help him freight it home"), he does not inspire a new approach to resolving the situation. Option D is incorrect because, while the friend does make it difficult for the first ant to transport the grasshopper leg, the friend is not intentionally trying to prevent the first ant from reaching home (paragraph 3: "Then, with a judgment peculiarly antic [pun not intentional], they take hold of opposite ends of that grasshopper leg and begin to tug with all their might in opposite directions").

Ruins of a Fabled City

36. (G) The question asks for the sentence that best summarizes the central idea of the passage. The idea that there was much speculation about Great Zimbabwe is explained at the end of paragraph 1 and in paragraph 2, and the details about how modern archaeologists determined its origins are explained in paragraph 5. Option G best represents the central idea that is developed and supported throughout the passage. Option E is incorrect because it does not fully express the central idea of the passage: it includes facts from only the beginning of the passage and does not take into account the discoveries revealed about Great Zimbabwe in paragraph 5. Option F is incorrect because it focuses mainly on the idea that archaeologists are still interested in the mysteries of Great Zimbabwe (paragraph 6) and does not fully explain the central idea. Option H is incorrect because the fact that early excavations of Great Zimbabwe caused the destruction of valuable evidence is a detail from paragraph 4, and the option does not fully convey the central idea of the passage.
37. (B) The question asks for an explanation of how Mauch’s conclusions influenced later investigations. Option B is the best option because Mauch’s conclusion that Great Zimbabwe “had been built by the Queen of Sheba” (paragraph 4) affected later investigations of the ruins by causing archaeologists to destroy evidence without examining it, as they assumed that Mauch’s conclusions were accurate (paragraph 4). Option A is incorrect because, while archaeologists were interested in the area, this was not the main effect of Mauch’s conclusions, as described in the passage. Option C is incorrect because people searched for Great Zimbabwe because they already believed the stories told by Arab traders and historians like de Barros (paragraph 2), not because of Mauch’s conclusions. Option D is incorrect because, although the city was considered impressive (paragraph 3), Mauch’s conclusions did not influence whether people believed an ancient culture could have built the city.

38. (E) The question asks for the statement that best summarizes the Portuguese explorers’ experience. Option E is correct; the Portuguese repeatedly searched for King Solomon’s gold, which they associated with East Africa, but they never found the city (paragraph 2). Option F is incorrect because, while they did hope to find a city, the explorers’ overall experience was focused on finding wealth. Option G is incorrect because the information in paragraph 2 does not support the idea that the explorers used details from de Barros’s story to find the city’s location. Option H is incorrect because the explorers heard stories about the possible wealthy city, but they did not study “history books in order to gather information about the city.”

39. (D) The question asks for the specific conclusion that was able to be drawn from the excavations at Great Zimbabwe. Option D is the correct answer because paragraph 5 states that carbon-14 dating proved Randall-Maclver and Caton-Thompson’s conclusion that Great Zimbabwe was built by ancestors of the Shona people during the fourteenth or fifteenth century. Option A is incorrect because the mystery behind “why the settlement was abandoned” has not been solved. Option B is incorrect because the disappearance of the city’s ivory and gold is a mystery that has not been solved. Option C is incorrect because the reason that Europeans did not discover Great Zimbabwe until the 1870s has not been explained.

40. (F) The question asks for the best supported evidence the passage provides about the Shona people. The Shona people are discussed in paragraph 5, where it is explained that Great Zimbabwe was discovered to have been built by the ancient ancestors of the Shona people, making Option F correct. Option E is incorrect because the ancient Shona people lived in the African interior, not on the coast, and the passage does not give specific details about where the Shona people live presently. Option G is incorrect because the passage does not give a detailed history about the origins and locations of the Shona people in Africa. Option H is incorrect because, while early explorers were looking for King Solomon’s gold and evidence of the Queen of Sheba in Africa, the Shona people were not found to be linked to these people.

41. (D) The question asks for the impact of Randall-Maclver and Caton-Thompson’s discovery. David Randall-Maclver and Gertrude Caton-Thompson’s conclusions were significant because their excavation of the ruins revealed that Great Zimbabwe was most certainly built by the ancestors of modern-day Africans (paragraph 5), discrediting the long-standing idea that the structure was Middle Eastern in origin. This conclusion is stated in Option D. Option A is incorrect because paragraph 5 states that Randall-Maclver and Caton-Thompson determined that the city was likely built in the fourteenth or fifteenth century, which was later than earlier explorers had assumed. Option B is incorrect because the question of why the great city was abandoned was not part of Randall-Maclver and Caton-Thompson’s discovery. Option C is incorrect because, while paragraph 5 also indicates that the Shona society was strong and healthy, this idea was not the main focus of Randall-Maclver and Caton-Thompson’s discovery.

Cross-Purposes

42. (E) The question asks how the similarity in the construction of lines 1 and 8 contribute to the meaning of the poem. By beginning lines 1 and 8 with “What I am is,” each speaker establishes its defining feature, both of which are stated in Option E. Option F is incorrect because the focus of the lines is defining the speakers’ individuality, not how one speaker resolves a problem created by the other. Option G is incorrect because the structure is not stating in line 1 that it is limited because it was built to stand in place; on the contrary, the structure is stating that this sense of purpose and permanence is its strength. Option H is incorrect because, in these lines, each speaker is trying to establish its stability, which for the structure is based on strength and for the water is based on longevity.
43. (B) The question asks how the lines contribute to the development of a central idea in the poem. The lines “I am what every athlete / wants” (lines 2–3) and “I am the blood flowing in the runner’s chest” (line 12) communicate that each speaker is an object of admiration and a powerful force, so Option B is correct. Option A is incorrect because nothing in the language of the lines communicates control. Option C is incorrect because the lines describe opposing characteristics: the structure’s description conveys stillness—remaining “up in the air” (line 4)—while the water’s description conveys movement—“flowing in the runner’s chest” (line 12). Additionally, the idea that the speakers fail to recognize similarities is not part of a central idea. Option D is incorrect because there is no evidence in the poem that the two speakers understand that they are interrelated.

44. (E) The question asks how the line contributes to the development of ideas in the stanza. The line mentions swallows and ospreys, birds that use the structure’s trusses as their home; this reference supports the claim that the structure is beneficial to nature, so Option E is correct. Option A is incorrect because the lines describe opposing characteristics: the structure’s description conveys stillness—remaining “up in the air” (line 4)—while the water’s description conveys movement—“flowing in the runner’s chest” (line 12). Additionally, the idea that the speakers fail to recognize similarities is not part of a central idea. Option D is incorrect because there is no evidence in the poem that the two speakers understand that they are interrelated.

45. (C) The question asks for the impact that the phrases have on the meaning of the poem. The phrases “some tears dribbling” and “running down” (lines 18–19) imply weakness in form and being influenced by the landscape, making Option C correct. Option A is incorrect because the lines do not describe the water in populated areas, they do not describe the water as a problem for the people living there. Option B is incorrect because the lines do more than bring attention to different types of water; the lines make a judgment about the strength and importance of the water. Option D is incorrect because a comparison is not made based on the volume of water streaming from the mountains and the volume of water in the seas.

46. (H) The question asks what the comparison in lines 33–35 shows about the structure of the poem. The speaker states, “We are steel thread to the human needle” (line 34), which illustrates that the structure (and others like it) is a tool used by humans to “bind . . . up” (line 35) or overcome “the rip” (line 33) that the water creates in the earth, making Option H correct. Option E is incorrect because the language in the lines is used only to imply the flaw that the water creates—“the rip you make” (line 33). Option F is incorrect because, while the water states that it enables “empires to rise” (lines 25), implying that it is needed for society to thrive, it never shares a purpose of bringing people together through its existence. Option G is incorrect because the language used for sewing (“We stitch across the rip you make” [line 33]) indicates the repair of a flaw and not the establishment of boundaries.

47. (D) The question asks how the last stanza conveys a central idea of the poem. In lines 36–38, the speaker (the water) describes how its “vapors cling” to the structure, bringing out the structure’s “softness” and “rust,” thus destroying the structure over time. Also, in line 42, the speaker says it is “patient” and “will wait for you,” suggesting that the speaker will be around after the structure is gone. These phrases in the last stanza indicate that Option D is correct. Option A is incorrect because the last stanza includes no indication that the structure and the water depend on each other. Option B is incorrect because the last stanza refers to the opposing speaker (the structure) and not to any other structure. Option C is incorrect because the last stanza addresses only the idea that the structure will grow weak and obsolete over time.

48. (E) The question asks how the implication in lines 41–42 is supported by other lines in the poem. The words “patient” and “wait” in line 42 suggest that the speaker (the water) has the ability to outlast the other speaker because the water doesn’t weaken as it ages, making Option E (lines 8–9) the correct response. Option F is incorrect because the promise made in line 42 is not affected by whether the water was built by humans (lines 9–10). Option G is incorrect because, in line 14, the water’s ability to wait longer than the structure is not enhanced by what flows through the water. Option H is incorrect because, in line 26, the water’s knowledge does not make its ability to wait any stronger—rather, it seemsly unending lifespan does.

49. (D) The question asks how the poet develops the two points of view. The poet develops the two
speakers’ points of view by personifying (giving human characteristics to something nonhuman, such as an object or animal) the structure and the water, allowing them to debate by criticizing each other and declaring their own importance. Thus, Option D is correct. Option A is incorrect because future civilizations do not play a significant role in the development of points of view. Option B is incorrect because, while the speakers do discuss their impact on the environment, there is no narrator speaking for them. Option C is incorrect because these details do not convey points of view.

50. (G) The question asks how the form of the poem contributes to its meaning. The alternating positions of the stanzas create the appearance of a conversation in which the speakers share their opposing points of view, making Option G correct. Option E is incorrect because the number of lines for each stanza does not emphasize the importance of the two speakers. Option F is incorrect because italics are used mainly to designate the voice of the second speaker (the water). Option H is incorrect because the lack of rhyme scheme or meter is intended to create a conversational tone, rather than reflect the changes the water causes or experiences.

A Year without a Summer

51. (B) The question asks for the best summary sentence for the passage. The passage is mostly about the strange, cold summer of 1816 and speculation around its cause, which is best stated in Option B. Option A is incorrect because it is a detail in paragraph 3 about one theory regarding the cause of the weather. Option C is incorrect because the passage is about more than agriculture in New England (paragraphs 1 and 2). Option D is incorrect because it is a detail in the passage mentioned only in paragraph 1.

52. (E) The question asks for the sentence that provides the best reason for the farmers replanting their crops. Paragraph 2 states that “farmers prepared to plow and plant” because they “expected warm temperatures” and were “optimistic.” This suggests that the farmers kept replanting their crops because they expected the weather to return to normal, which is reflected in Option E. Option F is incorrect because the cold weather and the snow actually worsened growing conditions (paragraph 2). Option G is incorrect because, while “July and August brought little improvement” (paragraph 2), it is throughout the month of June that farmers replanted crops. Option H is incorrect because, while the farmers kept replanting their crops with the expectation of normal weather to return, the passage does not state that was because the farmers thought the snow would provide moisture.

53. (C) The question asks for the outcome that is best implied by the situation the New Englanders faced in 1816. Option C is the correct answer because, with many crops “stunted or destroyed” (paragraph 2) in the summer of 1816, one would expect food shortages the following winter. Option A is incorrect because cold weather was familiar to the population in New England, just not for such an extended period of time. Option B is incorrect because there is no evidence in the passage that people experienced warmer temperatures. Option D is incorrect because, although some farmers did replant their crops, there is no evidence in the passage that they struggled to adjust to a different timeline for farming.

54. (F) The question asks for the purpose and importance of paragraph 3 to the passage. Paragraph 3 describes how nineteenth-century religious and other leaders tried to account for the cooler weather in 1816. Some leaders thought it was “the end of the world,” “sunspot activity,” or the proliferation of a new invention. How this information contributed to the passage is stated in Option F. Option E is incorrect because the causes described in paragraph 3 were not the most probable cause, as “the first plausible explanation”—Bessel’s—is described later in the passage. Option G is incorrect because more than one theory is presented in paragraph 3. Option H is incorrect because the ideas described are not included in paragraph 3.

55. (B) The question asks why the details about the eruption of Mount Tambora are included in the passage. The details in paragraph 4 about the eruption highlight the severity of the eruption and how it clouded the atmosphere and eventually encircled the world, making Option B the correct answer. Option A is incorrect because the passage does not support the idea that the effects are still present today. Option C is incorrect because the details may include information about what happens during an eruption, but the author is specifically describing the event at Mount Tambora as the inception of weather issues all over the world. Option D is incorrect because, while it is possible that people perceive natural events in various parts of the world differently, the specific details about the force and magnitude of the eruption do not emphasize this idea.

56. (H) The question asks for the implied meaning behind the phrase “the global nature of weather”
(paragraph 5). This phrase refers to how conditions in one part of the world can affect weather in another part of the world. Option H is correct because it clarifies “global” by explaining the relationship between weather and conditions all over the world. Option E is incorrect because the phrase in paragraph 5 is about the effects of weather conditions around the world, not about making weather predictions. Option F is incorrect because it discusses the lasting impact on specific geographical areas, while the phrase “the global nature of weather” refers to events that affect the entire world. Option G is incorrect because, while weather events (the unusually cold summer in New England in 1816) can be related to natural disasters (a volcano eruption), there is no support in the passage for the idea that natural disasters tend to occur at the same time.

57. (D) The question asks for the likely cause of the cold summer of 1816, based on the reason given in the passage. Researchers today believe that Bessel’s theory that “dust particles screened portions of Earth from the warming rays of the sun” is the most logical and probable (paragraph 5). His ideas are summarized in paragraph 4, and Option D restates his theory, making Option D the correct answer. Option A is incorrect because this was a possibility considered by some leaders, but there is no evidence in the passage that this theory was supported by thorough scientific research. Option B is incorrect because this theory was thought to be a possible cause by some people, but Bessel’s theory is the most probable. Option C explains damage that was caused by the Mount Pinatubo eruption in 1991 (paragraph 1), but that damage is not the cause of the cold summer of 1816.
58. (162) First, find the measure of angle PQR. The measure of angle PQR is equal to the measure of angle PSR. 
\[ m\angle PSR = 180 - 72 = 108. \]
So, the measure of angle PQR is also 108.

\[
108 + 90 + x = 360 \\
x = 162
\]

59. (99) Let \( x \) be the number of oak trees when 264 pine trees are planted. Set up a proportion and solve for \( x \):

\[
\frac{x}{264} = \frac{3}{8} \\
x \cdot 8 = 762 \\
x = 99
\]

60. (−4) \( 4w = 2w - 8 \)
\[ 2w = -8 \]
\[ w = -4 \]

61. (45) Let \( x \) = number of students with only cats as pets.
Let \( y \) = number of students with only dogs as pets.
Calculate \( x \) and \( y \) using the given information: There are 20 students who have cats, and of those 20 students, 3 have both cats and dogs. Thus, \( x = 20 - 3 = 17 \). There are 23 students who have dogs, and of those 23 students, 3 have both cats and dogs. Thus \( y = 23 - 3 = 20 \). To find the total number of students surveyed, add the number of students who only have cats \((x)\), the number of students who only have dogs \((y)\), the number of students who have both \((3)\), and the number of students who have neither \((5)\):

\[
3 + 5 + x + y = 8 + 17 + 20 = 45
\]

62. (63) If \( x \) is the smaller consecutive integer, then \( x + 1 \) is the larger consecutive integer. Use their sum \((-15)\) to find \( x \):

\[
x + (x + 1) = -15 \\
2x + 1 = -15 \\
2x = -16 \\
x = -8
\]
The two consecutive integers are \(-8\) and \(-7\).

One is added to the smaller integer:
\[-8 + 1 = -7, \text{ and } 2 \text{ is subtracted from the larger integer: } -7 - 2 = -9.\]
Find the product: \(-7 \times -9 = 63.\)

63. (B) \( 2k = m + 3 \) so \( k = \frac{m + 3}{2}. \)
Substitute each value of \( m \) to find the values of \( k \):

\[
k = \frac{5 + 3}{2} = \frac{8}{2} = 4 \\
k = \frac{7 + 3}{2} = \frac{10}{2} = 5 \\
k = \frac{9 + 3}{2} = \frac{12}{2} = 6
\]
The set \( k \) is \( \{4, 5, 6\} \).

64. (E) \( 7 + 3n + 6 - 4n - 8 = \)
\[ (7 + 6 - 8) + (3n - 4n) = \]
\[ 5 - n \]

65. (A) The sum of Adrianna’s course grades equals 4 times the mean (average) of her grades: \( 90 \times 4 = 360. \) Roberto has the same sum \((360)\) as Adrianna. Find the mean of his course grades:

\[ 360 \div 5 = 72 \]
66. (H) Set up some equations.
Jenny \((J)\) has twice as many marbles as Keiko \((K)\): \(J = 2K\)
Jenny gives Keiko 5 marbles, so now they each have: \(J - 5\) and \(K + 5\) marbles.
Jenny still has 10 more than Keiko:
\(J - 5 = (K + 5) + 10\)
To find how many marbles Jenny had to start with, solve \(J = 2K\) for \(K\) and substitute that into the second equation:
In equation \(J = 2K\), solve for \(K\): \(K = \frac{J}{2}\).
Substitute \(\frac{J}{2}\) in for \(K\).
\(J - 5 = (\frac{J}{2} + 5) + 10\)
\(J - 5 = \frac{J}{2} + 15\)
\(J = \frac{J}{2} + 20\)
\(\frac{J}{2} = 20\)
\(J = 40\) marbles

67. (A) Let \(x\) be the number of inches representing 1 foot. Set up a proportion and solve for \(x\):
\(\frac{x}{1} = \frac{0.125}{125}\)
\(x = 0.001\) in.

68. (G) First, add the percentage of cars containing 3 people, 4 people, and 5 or more people:
\(15\% + 7\% + 3\% = 25\%\)
Thus, 25\% of the cars contained at least 3 people, so use that to calculate the number of cars:
\(420 \times 0.25 = 105\) cars.

69. (B) Line segment \(\overline{RS}\) is the altitude, or height, of triangle QRP. The length of \(\overline{QP}\) is 8 cm. Use that information to find the area of triangle QRP:
\(A = \frac{1}{2}bh = \frac{1}{2}(8)(6) = 24\) sq cm.
There are 4 congruent triangles in the pyramid, so the surface area is \(4 \times 24 = 96\) sq cm.

70. (F) Let \(2x = \) the width and \(3x = \) the length.
Draw the rectangle to help visualize.
\[
\begin{array}{c}
2x \\
3x \\
2x \\
3x
\end{array}
\]
Since 2 times width + 2 times length = perimeter, we get
\(2(2x) + 2(3x) = 510\)
\(4x + 6x = 510\)
\(10x = 510\)
\(x = 51\)
\(2x = 102\) cm and \(3x = 153\) cm

71. (D) Multiply each term by 2 to eliminate the fraction, and isolate \(x\):
\(-4(2) < \left(\frac{x}{2}\right)(2) < 2(2)\)
\(-8 < x < 4\)
Therefore, \(x\) must be between \(-8\) and 4.
72. (F) Use proportions to make the conversions:

**Lorgs to dollars:**

\[
\frac{140}{x} = \frac{7}{1}
\]

\[7x = 140\]

\[x = 20\]

**Dalts to dollars:**

\[
\frac{16}{x} = \frac{0.5}{1}
\]

\[0.5x = 16\]

\[x = 32\]

**Total dollars** = 20 + 32 = $52

73. (B) Let \(x\) be the total number of colored pencils in the box. Set up a proportion to find \(x\):

\[
\frac{2}{7} = \frac{6}{x}
\]

\[2x = 42\]

\[x = 21\]

If there are 6 red pencils, then the number of pencils that are not read is 21 – 6 = 15.

74. (H) Since both ratios have \(y\) in common, solve for \(x\) and \(z\) in terms of \(y\) in both equations.

Using \(x:y = 1:4\), solve for \(x\) in terms of \(y\).

\[
x = \frac{1}{4}y
\]

Using the ratio \(y:z = 4:5\), solve for \(z\) in terms of \(y\):

\[
y = \frac{4}{5}z
\]

\[z = \frac{5}{4}y\]

The question states \(x + y + z = 50\). Substitute from the two equations above and solve for \(y\).

\[
\frac{1}{4}y + y + \frac{5}{4}y = 50
\]

\[
\frac{10}{4}y = 50
\]

\[10y = 200\]

\[y = 20\]

75. (B) The shaded region is a right triangle. Each leg is 1 unit in length. So the area is

\[
A = \frac{1}{2}bh = \frac{1}{2}(1)(1) = \frac{1}{2}\text{ or }0.5\text{ sq unit}
\]

76. (F) Create a table with the information provided in the problem and use subtraction to fill in the rest of the table:

<table>
<thead>
<tr>
<th></th>
<th>Female</th>
<th>Male</th>
<th>TOTAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commutes to work</td>
<td>21%</td>
<td>39%</td>
<td>60%</td>
</tr>
<tr>
<td>(60 – 21)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Does not commute to work</td>
<td>24%</td>
<td>16%</td>
<td>40%</td>
</tr>
<tr>
<td>(45 – 21)</td>
<td>(40 – 24)</td>
<td>(100 – 60)</td>
<td></td>
</tr>
<tr>
<td>TOTAL</td>
<td>45%</td>
<td></td>
<td>100%</td>
</tr>
</tbody>
</table>

16% of the population is male and does not commute to work.
77. (A) Let $x$ be the price per pound for the meat. Set up an equation to show what Mrs. Cranston spent:

\[
5(0.90) + 8x = 26.90 \\
4.50 + 8x = 26.90 \\
x = 2.80
\]

The price per pound for the meat is $2.80.

78. (E) The probability that both cards are not blue is the same as the probability that both cards are red. There are 4 red cards out of the 10, so the probability of the first card being red is \( \frac{4}{10} \). Now there are 9 cards left, and 3 of those are red, so the probability of the second card being red is \( \frac{3}{9} \). Multiply the two probabilities to find the probability that both cards are red (not blue):

\[
\frac{4}{10} \times \frac{3}{9} = \frac{12}{90} = \frac{2}{15}
\]

79. (D) 1 sind = 4 lorgs, so 1 sind > 1 lorg.
2 harps = 5 sind, so 1 harp > 1 sind.
1 plunk = 3 harps, so 1 plunk > 1 harp, meaning that 1 plunk > 1 sind and 1 lorg.
2 plunks = 5 dalts, so 1 plunk > 1 dart.
Therefore, the plunk is the most valuable.

80. (G) For each row, multiply the number of students by the score. Then add those together and divide by the total number of students to find the mean (average) of the 10 students.

\[
\frac{85(4)+75(4)+65(2)}{10} = \frac{340+300+130}{10}
\]

\[
= \frac{770}{10} = 77
\]

81. (B) According to the chart, 22% of people walk to work and 4% ride a bicycle. Subtract to find the percentage of how many more people walk than bicycle:

\[
22\% - 4\% = 18\%
\]

To find the exact number of people, multiply 18% (0.18) by the number of people working in Center City (15,000):

\[
15,000 \times 0.18 = 2,700
\]

82. (F) To find the smallest factor of 91, list the factors: 1, 7, 13, and 91.
The smallest factor (other than 1) is 7.
Of the options listed (30, 35, 39, and 44), only 35 is a multiple of 7.

83. (D) Let $x$ be the remaining side of the actual banner. Set up a proportion:

\[
\frac{x}{16} = \frac{36}{12}
\]

\[
x = 48 \text{ ft}
\]

84. (F) Let $x$ be the number of second-, third-, and fourth-year students. Then the total number of students in the college is $663 + x$. Set up a proportion and solve for $x$:

\[
\frac{15}{1} = \frac{663+x}{179}
\]

\[
663 + x = 179(15)
\]

\[
663 + x = 2,685
\]

\[
x = 2,022
\]

85. (D) \[
2 \frac{1}{5} + 3 \frac{3}{10} + 4 \frac{2}{5} + 5 \frac{1}{2}
\]

Convert all the fractions to a common denominator (10):

\[
2 \frac{2}{10} + 3 \frac{3}{10} + 4 \frac{4}{10} + 5 \frac{5}{10}
\]

\[
= (2 + 3 + 4 + 5) + \left(\frac{2+3+4+5}{10}\right)
\]

\[
= 14 + 1 \frac{4}{10} = 15 \frac{2}{5}
\]
86. (F) Divide the rate by the number of seconds in an hour. (Since there are 60 minutes in an hour and 60 seconds in a minute, multiply $60 \times 60 = 3,600$ seconds in an hour):

$$\frac{55}{3,600} \text{ miles per second}$$

Multiply by the number of feet in a mile (5,280):

$$\frac{55 \times 5,280}{3,600} \text{ feet per second}$$

87. (D) First, set up an equation to express Tien’s age ($T$) and Jordan’s age ($J$) today:

$$T = \frac{1}{4}J$$

Two years from now, Tien’s age will be $T + 2$, and Jordan’s age will be $J + 2$. Set up an equation about the relationship between Tien’s age and Jordan’s age in two years:

$$T + 2 = \frac{1}{3}(J + 2)$$

Solve the above equation for $T$:

$$T = \frac{1}{3}(J + 2) - 2$$

Now set the two equations equal to each other and solve for $J$:

$$\frac{1}{4}J = \frac{1}{3}(J + 2) - 2$$

$$\frac{1}{4}J = \frac{1}{3}J - \frac{4}{3}$$

$$-\frac{1}{12}J = -\frac{4}{3}$$

$$J = -\frac{4}{3} \left(\frac{-12}{1}\right)$$

$$J = 16$$

88. (E) List the factors of 48:

1 and 48, 2 and 24, 3 and 16, 4 and 12, 6 and 8

There are no factors greater than 24 and less than 48.

89. (C) The first integer is $l$, so the second is $l + 1$, the third is $l + 2$, then $l + 3$, and finally $l + 4$. Since $g$ is the fifth and greatest of the integers, $g = l + 4$.

Substitute $l + 4$ for $g$ and simplify:

$$\frac{l + g}{2} = \frac{l + l + 4}{2} = \frac{2l + 4}{2} = l + 2$$

90. (H) Three years is 36 months ($12 \times 3$). Set up an expression to find the total amount Johan paid:

$$1,000 + 300(36) = $11,800$$

91. (B) Create a list of the possible pairs. Let the cookies be named A, B, C, D, E, and F.

AB, AC, AD, AE, AF
BC, BD, BE, BF
CD, CE, CF
DE, DF
EF

There are a total of 15 possible pairs of cookies that Aiden can choose.

92. (G) Set up proportions to figure out how many slides Deion and Kyra can create in 1 hour:

**Deion**

$$\frac{5}{20} = \frac{x}{60}$$

$$20x = 300$$

$$x = 15$$

Deion can create 15 slides in 1 hour.

**Kyra**

$$\frac{3}{10} = \frac{x}{60}$$

$$10x = 180$$

$$x = 18$$

Kyra can create 18 slides in 1 hour.

Add Deion and Kyra to figure out how many slides they can create together in 1 hour:

$$15 + 18 = 33.$$
93. (C) Since $LN = \frac{1}{8}$, point $N$ is located at $4\frac{5}{16} + \frac{1}{8} = 4\frac{7}{16}$. So $M$ must be between point $L$, $4\frac{5}{16}$, and point $N$, $4\frac{7}{16}$. Point $L$ can also be written as 4.3125, and point $N$ can be written as 4.4375. The only option given that lies between those two points is 4.35.

94. (G) The length of the stick must be the greatest common factor of 72 and 30. The factors of 30 are 1, 2, 3, 5, 6, 10, 15, and 30. Of those, only 1, 2, 3, and 6 are also factors of 72. The greatest of these is 6.

95. (B) Ryan has 130 pages left to read $(150 - 20)$. He read 20 pages in 30 minutes, which means he read at a rate of 40 pages per 1 hour. To find out how much longer it will take him to finish the assignment, divide the total number of pages remaining (130) by the number of pages he is able to read per hour (40):

$$\frac{130}{40} = 3 \frac{1}{4}$$

96. (G) It is easier to rewrite $\frac{M}{N}$ as $M \div N$ since they are both fractions.

$$M \div N = \frac{w}{x} \div \frac{y}{z} = \frac{w}{x} \cdot \frac{z}{y} = \frac{wz}{xy}$$

97. (B) The question asks for integers from 12 to 30 that are not divisible by 2 or 3.

The set of consecutive integers is {12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30}.

Since all even numbers are divisible by 2, eliminate all even numbers, leaving the odd numbers in the set: {13, 15, 17, 19, 21, 23, 25, 27, 29}.

Eliminate those integers that are multiples of 3 (15, 21, and 27). The remaining integers are: {13, 17, 19, 23, 25, 29}. Therefore, there are 6 numbers in the set that are multiples of neither 2 nor 3.

98. (G) Take each city’s number of schools and multiply by the number of students. It is not necessary to calculate all 5 of these. Cities M and N have the same number of students, so just calculate the number of students in City M because it has more schools than City N. The same goes for Q and R — only Q needs to be calculated because it has more schools than R.

<table>
<thead>
<tr>
<th>City</th>
<th>Schools</th>
<th>Students</th>
</tr>
</thead>
<tbody>
<tr>
<td>M</td>
<td>8</td>
<td>5,000</td>
</tr>
<tr>
<td>P</td>
<td>9</td>
<td>4,000</td>
</tr>
<tr>
<td>Q</td>
<td>6</td>
<td>4,200</td>
</tr>
</tbody>
</table>

City Q has the greatest number of students.

99. (C) The total number of candies in the box is $5 + 3 + 2 = 10$. The number of candies that are not banana is $5 + 2 = 7$.

The probability of the first candy not being banana is $\frac{7}{10}$. Now, out of 9 candies, there are 6 candies left that are not banana.

The probability of the second candy not being banana is $\frac{6}{9}$. Multiply these two probabilities to get the solution:

$$\frac{7}{10} \times \frac{6}{9} = \frac{42}{90} = \frac{7}{15}$$
100. (H) Solve the equation for \( z \):

\[
\frac{w}{x} = \frac{y}{z}
\]

\[ wz = xy \]

\[ z = \frac{xy}{w} \]

101. (C) Convert the ratios into fractions of WZ. Use the sum of the ratios for the denominator.

\[ WX:XY:YZ = 4:2:3 \]

\[ WX = \frac{4}{4+2+3} = \frac{4}{9} \]

\[ XY = \frac{2}{4+2+3} = \frac{2}{9} \]

The part of WZ that is WY is the sum of those fractions:

\[ WY = \frac{4}{9} + \frac{2}{9} = \frac{6}{9} = \frac{2}{3} \]

Find the length of WZ:

\[ WZ = 8 - (-10) = 18 \]

The value of WY is \( \frac{2}{3}(18) = 12 \).

102. (G) Find 1% of 0.02: \( 0.02 \times \frac{1}{100} = 0.0002 \)

The greatest allowable thickness would be \( 0.02 + 0.0002 = 0.0202 \) inch.

103. (D) First, calculate the highest score for each section by adding the lowest score to the range:

Section I: \( 65 + 28 = 93 \)

Section II: \( 62 + 25 = 87 \)

Section III: \( 67 + 22 = 89 \)

The overall highest score is 93, and the overall lowest score is 62. Thus the overall range is \( 93 - 62 = 31 \).

104. (F) Since \( 3n \) is even, then \( 3n + 1 \) must be odd. Thus \( 3n + 3 \) and \( 3n + 5 \) are also odd. So there are a total of 3 numbers in this range that are odd.

105. (D) There are 6 digits in the repeating decimal (769230), so 7 would be the first, seventh, thirteenth digit and so on. To find the 391st digit, divide 391 by 6.

\[ 391 \div 6 = 65R1 \]

Since the remainder is 1, that means the 391st digit is the same as the 1st digit, which is 7.

106. (E) One revolution is equal to the circumference of the tire:

\[ C = 2\pi r = 2(\pi)\left(\frac{22}{7}\right) = \frac{44}{7} \text{ ft} \]

The car travels at 4,400 ft per minute. To calculate the number of revolutions, divide the speed by the circumference:

\[ 4,400 \div \frac{44}{7} = 4,400 \times \frac{7}{44} = 700 \text{ revolutions.} \]

107. (D) \( 100(2 + 0.1)^2 - 100 = 100(2.1^2) - 100 \]

\[ = 100(4.41) - 100 = 441 - 100 = 341 \]

108. (G) The total number of handballs in the container is \( 4 + 5 + 8 + 9 + 11 = 37 \).

Since there are 8 yellow handballs, the probability of selecting a yellow handball is \( \frac{8}{37} \).

109. (A) Each chair costs Leon $150 to make, and he sells the chair for $275. His profit is found by subtracting the cost from the price:

\[ \$275 - \$150 = \$125 \text{ per chair} \]

If Leon makes and sells 25 chairs in a week, his initial profit is \( 25 \times \$125 = \$3,125 \).

However, Leon has additional fixed expenses of $1,250 per week, so this cost must also be subtracted to arrive at the profit. His final profit is \( \$3,125 - \$1,250 = \$1,875 \).
110. (H) Convert 4 ft 7 in. to inches.
Since 12 in. = 1 ft:
4(12) + 7 = 55 inches
Multiply that by the conversion
254 cm = 1 in.
55 × 2.54 = 139.70 cm

111. (C) First, use \( JK = \frac{3}{2} \) to find the location of J:
\[
\frac{3}{8} - J = \frac{3}{2}
\]
\[
J = \frac{3}{8} - \frac{3}{2} = -\frac{3}{8}
\]
Now, use \( JM = 9\frac{3}{4} \) to find the location of M:
\[
M - \left(-\frac{3}{8}\right) = 9\frac{3}{4}
\]
\[
M + 3\frac{1}{8} = 9\frac{3}{4}
\]
\[
M = 9\frac{3}{4} - 3\frac{1}{8} = 6\frac{5}{8}
\]
Finally, use \( LM = 1\frac{1}{8} \) to find the location of L:
\[
6\frac{5}{8} - L = 1\frac{1}{8}
\]
\[
L = 6\frac{5}{8} - 1\frac{1}{8} = 5\frac{4}{8} = 5\frac{1}{2}
\]

112. (G) \( 4x - 3y = 12 \)
\[
4x = 3y + 12
\]
\[
x = \frac{3}{4}y + 3
\]

113. (A) First, determine the total number of servings of fruits and vegetables that the students ate by multiplying the number of servings by the number of students in each row of the table. Then add that column to get the total number of servings:

<table>
<thead>
<tr>
<th>Number of Servings of Fruits and Vegetables</th>
<th>Number of Students</th>
<th>Number of Servings ( \times ) Number of Students</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>0</td>
<td>5</td>
<td>0</td>
</tr>
<tr>
<td>1</td>
<td>7</td>
<td>7</td>
</tr>
<tr>
<td>2</td>
<td>3</td>
<td>6</td>
</tr>
<tr>
<td>3</td>
<td>4</td>
<td>12</td>
</tr>
<tr>
<td>4</td>
<td>0</td>
<td>0</td>
</tr>
<tr>
<td>5</td>
<td>1</td>
<td>5</td>
</tr>
<tr>
<td><strong>Total:</strong> 30</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Calculate the mean by dividing the total number of servings of fruits and vegetables by the total number of students:
\[
\frac{30}{20} = 1\frac{1}{2}
\]

114. (G) The ratio is 4:3:2:1, so the total parts is 10.

Since there are two parts resin, the fraction of resin is \( \frac{2}{10} = \frac{1}{5} \).

So the amount of resin in 30 lb of paste (for 1 billboard) is \( \frac{1}{5} \times 30 = 6 \) lb. For 4 billboards, that would be \( 6 \times 4 = 24 \) lb.
## Answer Key for Sample Form A

Identifying Information

Turn to Side 1 of the answer sheet. Line 1 says, “I am well enough to take this test and complete it. I understand that once I break the seal of the test booklet, I may not be eligible for a make-up test. I am a New York City resident and a Grade 8 student taking a Grade 8 test. I understand that a student who is not a New York City resident, who takes the test more than once in a given school year, or who takes the test at the wrong grade level will be disqualified from acceptance to any of the specialized high schools.” Sign your name in the space following the word “signature.” Do not print your name. Notify the proctor immediately if you are ill or should not be taking this test. Do not sign the statement or begin the test. Return your answer sheet to the proctor.

On Line 2, print today’s date, using the numbers of the month, the day, and the year. On Line 3, print your birth date with the number of the month first, then the number of the day, then the last two digits of the year. For example, a birth date of March 1, 2004, would be 3-1-04.

In Grid 4, print the letters of your first name, or as many as will fit, in the boxes. Write your name exactly as you did on the application. If you have a middle initial, print it in the box labeled “MI.” Then print the letters of your last name, or as much as will fit, in the boxes provided. Below each box, fill in the circle that contains the same letter as the box. If there is a space or a hyphen in your name, fill in the circle under the appropriate blank or hyphen.

Make dark marks that completely fill the circles. If you change a mark, be sure to erase the first mark completely.

Grid 5 is for your choice of specialized high schools. If Grid 5 is not marked correctly, your admission to a specialized high school will be affected because your admission is based on the score you achieve and the order in which you rank your school preferences in this grid. The school choices indicated on your answer sheet are final. Therefore, carefully copy the order in which you ranked the schools on your Test Ticket onto Grid 5.

Fill in one and only one circle for each school for which you wish to be considered. You may make as few as one or as many as eight choices. To increase your chances of being assigned to one of the specialized high schools, you are encouraged to make more than one choice. You must fill in a first choice school. Do not fill in a school more than once. Do not fill in the same school for each choice. Fill in only one circle in a row and only one circle in a column.

Grid 6 asks for your date of birth. Print the first three letters of the month in the first box, the number of the day in the next box, and the year in the last box. Then fill in the corresponding circles.

In Grid 7:
1. Print the name of the school where you are now enrolled in the space at the top of the grid.
2. In the boxes marked “SCHOOL CODE,” print the six-digit code that identifies your school and fill in the circle under the corresponding number or letter for each digit of the school code. (You can find your school code on your Test Ticket. If it is not there, tell the proctor, and the proctor will get the school code for you.)
3. If you attend a private or parochial school, fill in the circle marked “P.”

Grid 8 is labeled “STUDENT ID NUMBER.” All test-takers should print their student ID number in Grid 8. The student ID number is found on your Test Ticket. In the boxes, print your nine-digit student ID number. Below each box, fill in the circle containing the same number as in the box.
GENERAL DIRECTIONS, continued

Identifying Information, continued

Grid 9 is labeled “BOOKLET LETTER AND NUMBER.” In most cases, Grid 9 is already filled in for you. If it is not, copy the letter and numbers shown in the upper-right corner of your test booklet into the boxes. Below each box, fill in the circle containing the same letter or number as the box.

Now review Side 1 to make sure you have completed all lines and grids correctly. Review each column to see that the filled-in circles correspond to the letters or numbers in the boxes above them.

Turn your answer sheet to Side 2. Print your test booklet letter and numbers, and your name, first name first, in the spaces provided.

Marking Your Answers

Mark each of your answers on the answer sheet in the row of circles corresponding to the question number printed in the test booklet. Use only a Number 2 pencil. If you change an answer, be sure to erase it completely. Be careful to avoid making any stray pencil marks on your answer sheet. Each question has only one correct answer. If you mark more than one circle in any answer row, that question will be scored as incorrect. See the example of correct and incorrect answer marks below.

You can use your test booklet or the provided scrap paper to take notes or solve questions; however your answers must be recorded on the answer sheet in order to be counted. You will not be able to mark your answers on the answer sheet after time is up, and answers left in the test booklet will not be scored.

DO NOT MAKE ANY MARKS ON YOUR ANSWER SHEET OTHER THAN FILLING IN YOUR ANSWER CHOICES.

Planning Your Time

You have 180 minutes to complete the entire test. How you allot the time between the English Language Arts and Mathematics sections is up to you. If you begin with the English Language Arts section, you may go on to the Mathematics section as soon as you are ready. Likewise, if you begin with the Mathematics section, you may go on to the English Language Arts section as soon as you are ready. If you complete the test before the allotted time (180 minutes) is over, you may go back to review questions in either section.

Be sure to read the directions for each section carefully. Each question has only one correct answer. Choose the best answer for each question. When you finish a question, go on to the next, until you have completed the last question. Your score is determined by the number of questions you answer correctly. Answer every question, even if you may not be certain which answer is correct. Don’t spend too much time on a difficult question. Come back to it later if you have time. If time remains, you should check your answers.

Students must stay for the entire test session.

DO NOT OPEN THIS BOOKLET UNTIL YOU ARE TOLD TO DO SO
The Colosseum in Rome, Italy which is considered one of the “new” Seven Wonders of the World, is the largest amphitheater ever built and could hold more than 50,000 spectators.

Which edit should be made to correct the sentence?

A. Delete the comma after Rome.
B. Insert a comma after Italy.
C. Delete the comma after World.
D. Insert a comma after built.
2. Read this paragraph.

In September 2016 the National Museum of African American History and Culture opened as part of the Smithsonian Institution, the museum is already the Smithsonian's third most popular site. Experts say that they expect this newest Smithsonian facility to welcome nearly 4 million visitors a year. The museum features more than 30,000 objects, including Muhammad Ali's boxing gloves and a dress sewn by Rosa Parks. A commemorative copy of the Emancipation Proclamation, written in 1863 during the presidency of Abraham Lincoln, is also on display at the museum.

Which revision corrects the error in sentence structure in the paragraph?

E. Institution, and the
F. year, and the
G. objects, which include
H. Proclamation, which was written

3. Read this sentence.

To promote their club, a bake sale will be sponsored by members of the debate team on Wednesday.

How should the sentence be revised?

A. To promote their club, on Wednesday a bake sale will be sponsored by members of the debate team.
B. On Wednesday to promote their club, a bake sale will be sponsored by members of the debate team.
C. To promote their club, members of the debate team will sponsor a bake sale on Wednesday.
D. Members of the debate team, on Wednesday to promote their club, will sponsor a bake sale.
4. Read this paragraph.

(1) Devon spent several hours preparing for an upcoming audition for a play at the community theater. (2) First he did vocal exercises to practice his diction and projection so that his words would carry clearly throughout the large auditorium. (3) Then he studies the text of the monologue to better understand the emotions, and motivations of the character he plans to portray. (4) Finally he recited his monologue in front of a mirror many times, making slight adjustments and improvements to his performance each time.

How should the paragraph be revised?

E. Sentence 1: Change spent to had spent, AND insert a comma after play.
F. Sentence 2: Change did to does, AND insert a comma after projection.
G. Sentence 3: Change studies to studied, AND delete the comma after emotions.
H. Sentence 4: Change recited to recites, AND delete the comma after times.
The Local Library

(1) According to a 2015 survey, more than two-thirds of Americans own a smartphone, which means that obtaining information or communicating with people is easier than ever before. (2) With the swipe of a finger, the tap of an icon, or a verbal command, people have instant access to articles, blogs, news, and social networking websites. (3) Even with all these immediately available sources of information, one of the best resources for many members of the community also happens to be one of the oldest. (4) The public library is a great place for people to get information.

(5) The public library serves a truly critical role in promoting community. (6) With the explosion of digital media in recent years, people in different locations can now communicate almost instantaneously. (7) And yet many people complain of feeling more isolated and alone than ever before. (8) The library stands in a rare position to help community members meet this universal need for human connection and companionship.

(9) Furthermore, libraries provide certain amenities, such as access to the Internet, for free to all people. (10) A student who does not have a computer at home can research and type a paper for school. (11) Similarly, an unemployed adult without access to the Internet can make use of library resources to find job opportunities. (12) The free items that are found at the library can help people get a lot done.

(13) Public libraries also offer a variety of resources to community members. (14) One important resource is the local librarian, who does far more than check out books and collect fines. (15) Other library resources include free or low-cost tutoring and training programs. (16) Additionally, lectures, book groups, and town meetings promote critical thinking and community engagement. (17) A typical librarian holds a master's degree and can help library patrons navigate through the flood of information available in print and on the Internet.

(18) The hallmark of a public library is that its materials and services are accessible to all. (19) The library connects people to a network of information and resources and is an important part of a community.
5. Which sentence should replace sentence 4 to best introduce the main claim of the passage?

A. In this age of smartphones and search engines, the public library is a valuable resource that all members of a community should use.
B. Finding information is easier than ever, but going to the public library is still a valuable learning experience.
C. Though today’s computers are highly advanced, the resources available at a public library are more useful for students.
D. Despite the proliferation of social networking sites, a public library is a great place for people who are interested in improving their community.

6. Which sentence would best follow and support sentence 8?

E. Libraries, which have been around for centuries and are found throughout the world today, help preserve the history of a community.
F. The public library is often used as a place for community leaders and organizers to host community events, such as hearings or town halls.
G. Libraries rely on a combination of local, state, and federal dollars to provide the kinds of services and programs that community members have come to expect.
H. At a public library, people can interact with others through a variety of programs, including teen book clubs, toddler story times, and senior-citizen exercise classes.

7. Which revision of sentence 12 best maintains the formal style established in the passage?

A. The free resources available at the library can help people accomplish many tasks.
B. All the free materials you can get at the library can help you do many different tasks.
C. Everything that is free at the library can help people work on a lot of different things.
D. The free resources you can find at the library can help you do whatever you need to do.
8. Where should sentence 17 be moved in order to improve the organization of the fourth paragraph (sentences 13–17)?

A. to the beginning of the paragraph (before sentence 13)
B. between sentences 13 and 14
C. between sentences 14 and 15
D. between sentences 15 and 16

9. Which concluding sentence should be added after sentence 19 to support the argument presented in the passage?

A. Therefore, patrons of the public library can grow in both their social life and their level of community engagement.
B. Clearly, it is in the best interest of community members to maintain, support, and use their public library.
C. After all, the public library has been a part of American communities since the first library was founded in 1833.
D. In fact, community leaders must work together to find ways to generate more involvement in events at the public library.
READING COMPREHENSION
QUESTIONS 10–57

DIRECTIONS: Read each of the following six texts, and answer the related questions. You may write in your test booklet as needed to take notes. You should re-read relevant parts of each text before marking the best answer for each question. Base your answers only on the content within the text.
The Tunguska Fireball

1 On June 30, 1908, an enormous fireball shot across the sky and exploded high above the remote Tunguska River Valley in the Siberian region of Russia. Twenty miles away, huts were flattened and people were flung into the air. Villagers 40 miles away felt the heat and heard explosions, and tremors were recorded at a German seismic station more than 3,000 miles away.

2 What caused the intense light and the horrendous destruction of the Tunguska Fireball, as it came to be called? Scientists and laypeople have debated the question for over 100 years. Not until 1927 did a scientific expedition, led by Russian scientist Leonid Kulik, reach the remote site. Kulik discovered a vast region of scorched and downed trees, their trunks pointing away from the center of the blast. Convinced that a meteorite was responsible, Kulik searched for evidence—a crater, a buried meteorite, even fragments of the exploded mass. He never found it.

3 Other scientists, amateur astronomers, and the public suggested alternative theories of what had happened. Some thought it was an earthquake. Perhaps, others said, a black hole—a theoretical object in space where gravity is so strong that even light cannot get out—had collided with Earth or an alien spaceship carrying nuclear material had crashed.

4 For many years Russian scientists believed that the Tunguska Fireball was a comet—a cluster of dust and frozen gases—that had exploded a few hundred feet above the ground. They pointed to the lack of meteoric evidence and the June 30 date, a time of year when Earth was passing through cometary debris. Other scientists disagreed, arguing that a comet would have burned quickly in Earth’s atmosphere and could not have created such a blast.

5 Many Western scientists believed that a meteorite was responsible, despite the lack of evidence. The pattern of fallen trees suggested that they were knocked down by a blast about 4 miles above the ground with an energy of 15 megatons of TNT, consistent with a meteoric blast. Yet repeated searches of the surrounding forest and wetlands revealed no evidence of a meteorite.

6 During the 1990s an Italian physicist named Menotti Galli became interested. Galli had previously investigated whether particles from outer space can add carbon atoms to the cellulose in trees. Perhaps the trees at the Tunguska site hid evidence of such extraterrestrial material. Galli and his colleagues traveled to the site by helicopter to gather core samples from spruce trees that had lived through the blast. They analyzed the particles trapped in the trees’ resin, and the results were remarkable. Based on studying the trees’ rings during the time period when the Tunguska Fireball occurred, the researchers found that the resin contained high levels of high-proton elements, such as copper, gold, and nickel. In fact, it contained ten times more such particles than resin dating from either before or after that time period. Some previously discovered meteorites had also contained elevated levels of these elements, suggesting that the particles had an extra-earthly origin. But then where is the crater? Is it nearby Lake Cheka, as some claim? Or was the meteorite reduced to dust in the atmosphere? Can scientists rule out a comet carrying those elements? The mystery remains unsolved.
10. What evidence best indicated the location of the blast?
   E. a lake formed from a crater
   F. tremors recorded at a seismic station
   G. damage caused to buildings
   H. the position of the trunks of fallen trees

11. The June 30 date of the Tunguska event was significant to some scientists because it
   A. suggested that the explosion may have been caused by a comet.
   B. highlighted why tree resin from the time of the blast contained high-proton elements.
   C. indicated that the blast may have resulted from Earth's impact with a black hole.
   D. explained why debris from outer space would have burned up in the atmosphere.

12. What did Galli's analysis of tree resin at the site reveal?
   E. Certain elements were unusually abundant around the time of the blast.
   F. Particles from outer space can add carbon atoms to trees.
   G. Spruce trees were able to survive the Tunguska explosion.
   H. Meteorites are composed of gold, copper, and other high-proton elements.

13. Based on the passage, what is the most likely reason it took nineteen years from the date of the
    explosion before scientists first visited the Tunguska site?
    A. The scientists feared radioactivity from a nuclear explosion.
    B. The site was far from civilization and difficult to reach.
    C. Scientists hoped to establish a cause before exploring the site.
    D. Craters from the explosion hampered travel to the area.
14. What is the primary role of paragraph 1 in the structure of the passage?
   
   E. It explains the scientific importance of the explosion.
   F. It indicates the magnitude of the explosion.
   G. It provides possible causes of the explosion.
   H. It describes the human suffering caused by the explosion.

15. The author includes a series of questions at the end of the last paragraph most likely to
   
   A. encourage further study of the Tunguska event.
   B. suggest that the Tunguska event had multiple causes.
   C. reflect a personal curiosity about the Tunguska event.
   D. emphasize that the Tunguska event has not yet been fully explained.
Excerpt from *A Voice in the Wilderness*

by Grace Livingston Hill

1. With a lurch the train came to a dead stop and Margaret Earle, hastily gathering up her belongings, hurried down the aisle and got out into the night.

2. It occurred to her, as she swung her heavy suit-case down the rather long step to the ground, and then carefully swung herself after it, that it was strange that neither conductor, brakeman, nor porter had come to help her off the train, when all three had taken the trouble to tell her that hers was the next station; but she could hear voices up ahead. Perhaps something was the matter with the engine that detained them and they had forgotten her for the moment.

3. The ground was rough where she stood, and there seemed no sign of a platform. Did they not have platforms in this wild Western land, or was the train so long that her car had stopped before reaching it?

4. She strained her eyes into the darkness, and tried to make out things from the two or three specks of light that danced about like fireflies in the distance. She could dimly see moving figures away up near the engine, and each one evidently carried a lantern. The train was tremendously long. A sudden feeling of isolation took possession of her. Perhaps she ought not to have got out until some one came to help her. Perhaps the train had not pulled into the station yet and she ought to get back on it and wait. Yet if the train started before she found the conductor she might be carried on somewhere and he justly blame her for a fool.

5. There did not seem to be any building on that side of the track. It was probably on the other, but she was standing too near the cars to see over. She tried to move back to look, but the ground sloped and she slipped and fell in the cinders, bruising her knee and cutting her wrist.

6. In sudden panic she arose. She would get back into the train, no matter what the consequences. They had no right to put her out here, away off from the station, at night, in a strange country. If the train started before she could find the conductor she would tell him that he must back it up again and let her off. He certainly could not expect her to get out like this.

7. She lifted the heavy suit-case up the high step that was even farther from the ground than it had been when she came down, because her fall had loosened some of the earth and caused it to slide away from the track. Then, reaching to the rail of the step, she tried to pull herself up, but as she did so the engine gave a long snort and the whole train, as if it were in league against her, lurched forward crazily, shaking off her hold. She slipped to her knees again, the suit-case, toppled from the lower step, descending upon her, and together they slid and rolled down the short bank, while the train . . . ran giddily off into the night.

8. The horror of being deserted helped the girl to rise in spite of bruises and shock. She lifted imploring hands to the unresponsive cars as they hurried by her—one, two, three, with bright windows, each showing a passenger, comfortable and safe inside, unconscious of her need.

1. *cinders:* track bed made from the residue of burnt coal
A moment of useless screaming, running, trying to attract some one's attention, a sickening sense of terror and failure, and the last car slatted itself past with a mocking clatter, as if it enjoyed her discomfort.

Margaret stood dazed, reaching out helpless hands, then dropped them at her sides and gazed after the fast-retreating train, the light on its last car swinging tauntingly, blinking now and then with a leer in its eye, rapidly vanishing from her sight into the depth of the night.

She gasped and looked about her for the station that but a short moment before had been so real to her mind; and, lo! on this side and on that there was none!

The night was wide like a great floor shut in by a low, vast dome of curving blue set with the largest, most wonderful stars she had ever seen. Heavy shadows of purple-green, smoke-like, hovered over earth darker and more intense than the unfathomable blue of the night sky. It seemed like the secret nesting-place of mysteries wherein no human foot might dare intrude. It was incredible that such could be but common sage-brush, sand, and greasewood wrapped about with the beauty of the lonely night.

No building broke the inky outlines of the plain, nor friendly light streamed out to cheer her heart. Not even a tree was in sight, except on the far horizon, where a heavy line of deeper darkness might mean a forest. Nothing, absolutely nothing, in the blue, deep, starry dome above and the bluer darkness of the earth below save one sharp shaft ahead like a black mast throwing out a dark arm across the track.

As soon as she sighted it she picked up her baggage and made her painful way toward it, for her knees and wrist were bruised and her baggage was heavy.

A soft drip, drip greeted her as she drew nearer; something plashing down among the cinders by the track. Then she saw the tall column with its arm outstretched, and looming darker among the sage-brush the outlines of a water-tank. It was so she recognized the engine's drinking-tank, and knew that she had mistaken a pause to water the engine for a regular stop at a station.

From A VOICE IN THE WILDERNESS by Grace Livingston Hill—Public Domain

16. In paragraph 2, how does the phrase “when all three had taken the trouble to tell her” affect the tone in the first part of the excerpt?

E. It creates an accusatory tone by suggesting that Margaret believes that others are responsible for her problem.
F. It introduces a defiant tone by suggesting that Margaret left the train early to prove a point.
G. It suggests a frustrated tone by showing that Margaret feels confused by the inconsistent help offered by the railroad employees.
H. It establishes an appreciative tone by showing that Margaret feels cared for by the railroad employees.
17. Which sentence from the excerpt best supports the idea that traveling to new places by train is unfamiliar to Margaret?

A. “With a lurch the train came to a dead stop and Margaret Earle, hastily gathering up her belongings, hurried down the aisle and got out into the night.” (paragraph 1)
B. “Perhaps something was the matter with the engine that detained them and they had forgotten her for the moment.” (paragraph 2)
C. “Did they not have platforms in this wild Western land, or was the train so long that her car had stopped before reaching it?” (paragraph 3)
D. “She could dimly see moving figures away up near the engine, and each one evidently carried a lantern.” (paragraph 4)

18. Read this sentence from paragraph 4.

Yet if the train started before she found the conductor she might be carried on somewhere and he justly blame her for a fool.

How does the sentence contribute to the development of the plot?

E. It shows how Margaret’s reliance on the guidance of others leads to the external conflict she faces.
F. It reveals how Margaret’s concern about the opinions of others causes the external conflict she faces.
G. It highlights how Margaret’s indecision results in the external conflict being prolonged.
H. It illustrates how Margaret’s confusion makes it difficult for her to fully understand the external conflict.

19. Read this sentence from paragraph 4.

She strained her eyes into the darkness, and tried to make out things from the two or three specks of light that danced about like fireflies in the distance.

The simile used in the sentence affects the tone of the paragraph by emphasizing a

A. feeling of comfort as Margaret connects her unfamiliar surroundings with familiar images.
B. sense of lonesomeness as Margaret realizes that she is on her own in the wilderness.
C. sense of tranquility as Margaret is distracted from the urgency of her situation by the beauty of the night.
D. feeling of dread as Margaret regards the desolation of the land that surrounds her.
20. Read paragraph 9 from the excerpt.

A moment of useless screaming, running, trying to attract some one’s attention, a sickening sense of terror and failure, and the last car slatted itself past with a mocking clatter, as if it enjoyed her discomfort.

The imagery in this sentence conveys the

E. growing irritation Margaret feels as she is ignored by people on the train.
F. effort Margaret is making despite being physically unable to keep up with the train.
G. anger that Margaret is experiencing as she watches the train leave without her.
H. vulnerability Margaret feels as the train leaves her behind.

21. How does Margaret’s experience in paragraph 9 emphasize a theme of the excerpt?

A. It confirms Margaret’s understanding that she cannot rely on help from anyone else.
B. It leads Margaret to realize that her efforts to change her situation are ineffective.
C. It causes Margaret to believe that her own actions led to an unfavorable outcome.
D. It reinforces Margaret’s frustration about her lack of control over her surroundings.

22. Read paragraph 10 from the excerpt.

Margaret stood dazed, reaching out helpless hands, then dropped them at her sides and gazed after the fast-retreating train, the light on its last car swinging tauntingly, blinking now and then with a leer in its eye, rapidly vanishing from her sight into the depth of the night.

What does the figurative language in this sentence emphasize?

E. the sense of doubt that Margaret experiences when she is deciding what to do next
F. the anger that Margaret feels toward the people on the train who she expected to help her
G. the embarrassment that Margaret feels when she imagines what others will think of her
H. the hopelessness that Margaret feels when she accepts that the train is continuing on
23. How does paragraph 11 contribute to the plot of the excerpt?
   
   A. It reveals that the reality of the situation is different from Margaret’s assumptions.
   B. It illustrates that Margaret’s main problem is her own imagination.
   C. It shows that Margaret is surprised by the unexpected adventure she is about to undertake.
   D. It provides additional insight into how Margaret reacts to stressful situations.

24. How do the details in paragraphs 12–13 about the setting help support the theme of the excerpt?
   
   E. They show that Margaret is overwhelmed by the darkness that surrounds her.
   F. They suggest that the situation is frustrating but that Margaret is hopeful.
   G. They reveal that the landscape is beautiful and that Margaret is alone.
   H. They demonstrate that Margaret is easily discouraged and frightened.
Excerpt from “Niagara Falls”

by Rupert Brooke

1 The real secret of the beauty and terror of the Falls is not their height or width, but the feeling of colossal power and of unintelligible disaster caused by the plunge of that vast body of water. If that were taken away, there would be little visible change, but the heart would be gone.

2 The American Falls do not inspire this feeling in the same way as the Canadian. It is because they are less in volume, and because the water does not fall so much into one place. By comparison their beauty is almost delicate and fragile. They are extraordinarily level, one long curtain of lacework and woven foam. Seen from opposite, when the sun is on them, they are blindingly white, and the clouds of spray show dark against them. With both Falls the colour of the water is the ever-altering wonder. Greens and blues, purples and whites, melt into one another, fade, and come again, and change with the changing sun. Sometimes they are as richly diaphanous\(^1\) as a precious stone, and glow from within with a deep, inexplicable light. Sometimes the white intricacies of dropping foam become opaque and creamy. And always there are the rainbows. If you come suddenly upon the Falls from above, a great double rainbow, very vivid, spanning the extent of spray from top to bottom, is the first thing you see. If you wander along the cliff opposite, a bow springs into being in the American Falls, accompanies you courteously on your walk, dwindles and dies as the mist ends, and awakens again as you reach the Canadian tumult. And the bold traveller who attempts the trip under the American Falls sees, when he dare open his eyes to anything, tiny baby rainbows, some four or five yards in span, leaping from rock to rock among the foam, and gambolling beside him, barely out of hand’s reach, as he goes. One I saw in that place was a complete circle, such as I have never seen before, and so near that I could put my foot on it. It is a terrifying journey, beneath and behind the Falls. The senses are battered and bewildered by the thunder of the water and the assault of wind and spray; or rather, the sound is not of falling water, but merely of falling; a noise of unspecified ruin. So, if you are close behind the endless clamour, the sight cannot recognise liquid in the masses that hurl past. You are dimly and pitifully aware that sheets of light and darkness are falling in great curves in front of you. Dull omnipresent foam washes the face. Farther away, in the roar and hissing, clouds of spray seem literally to slide down some invisible plane of air.

3 Beyond the foot of the Falls the river is like a slipping floor of marble, green with veins of dirty white, made by the scum that was foam. It slides very quietly and slowly down for a mile or two, sullenly exhausted. Then it turns to a dull sage green, and hurries more swiftly, smooth and ominous. As the walls of the ravine close in, trouble stirs, and the waters boil and eddy. These are the lower rapids, a sight more terrifying than the Falls, because less intelligible. Close in its bands of rock the river surges tumultuously forward, writhing and leaping as if inspired by a demon. It is pressed by the straits into a visibly convex form. Great planes of water slide past. Sometimes it is thrown up into a pinnacle of foam higher than a house, or leaps with incredible speed from the crest of one vast wave to another, along the shining curve between, like the spring of a wild beast. Its motion continually suggests muscular action. The power manifest in these rapids moves one with a different sense of awe and terror from that of the Falls. Here the inhuman life and strength are spontaneous, active, almost resolute. . . . A place of fear.

\(^1\)diaphanous: sheer, translucent
One is drawn back, strangely, to a contemplation of the Falls, at every hour, and especially by night, when the cloud of spray becomes an immense visible ghost, straining and wavering high above the river, white and pathetic and translucent. The Victorian lies very close below the surface in every man. There one can sit and let great cloudy thoughts of destiny and the passage of empires drift through the mind; for such dreams are at home by Niagara. I could not get out of my mind the thought of a friend, who said that the rainbows over the Falls were like the arts and beauty and goodness, with regard to the stream of life—caused by it, thrown upon its spray, but unable to stay or direct or affect it, and ceasing when it ceased. In all comparisons that rise in the heart, the river, with its multitudinous waves and its single current, likens itself to a life, whether of an individual or of a community. A man's life is of many flashing moments, and yet one stream; a nation's flows through all its citizens, and yet is more than they. In such places, one is aware, with an almost insupportable and yet comforting certitude, that both men and nations are hurried onwards to their ruin or ending as inevitably as this dark flood. Some go down to it reluctant, and meet it, like the river, not without nobility. And as incessant, as inevitable, and as unavailing as the spray that hangs over the Falls, is the white cloud of human crying. . . . With some such thoughts does the platitudinous heart win from the confusion and thunder of a Niagara peace that the quietest plains or most stable hills can never give.

From LETTERS FROM AMERICA by Rupert Brooke—Public Domain

platitudinous: clichéd, common

25. The central idea that the Falls communicate a feeling of “unintelligible disaster” (paragraph 1) is conveyed in paragraph 2 through a description of

A. the glow of the precious stones visible within the water.
B. the dynamic flow of the colors that are visible in the water.
C. the sudden appearance and disappearance of rainbows.
D. the sounds associated with a sense of falling.

26. Read this sentence from paragraph 2.

They are extraordinarily level, one long curtain of lacework and woven foam.

What is the effect of comparing the American Falls to a “long curtain of lacework and woven foam”?

E. It demonstrates the timelessness of the American Falls.
F. It conveys the secretive nature of the American Falls.
G. It illustrates the elegant uniformity of the American Falls.
H. It communicates the intense strength of the American Falls.
27. Read this sentence from paragraph 3.

These are the lower rapids, a sight more terrifying than the Falls, because less intelligible.

Which statement best describes how the sentence fits into the overall structure of the excerpt?

A. It signals a change from the positive aspects of the Falls to the negative aspects.
B. It indicates a progression from the literal description of the water to a discussion of timeless truths.
C. It highlights a shift from the qualities of the Falls to the qualities of the river.
D. It introduces a contrast between the obvious and the hidden features of the rapids.

28. Which sentence from the excerpt best supports the idea that the essence of the Falls lies in their emotional impact?

E. “If that were taken away, there would be little visible change, but the heart would be gone.” (paragraph 1)
F. “By comparison their beauty is almost delicate and fragile.” (paragraph 2)
G. “One is drawn back, strangely, to a contemplation of the Falls, at every hour, and especially by night, when the cloud of spray becomes an immense visible ghost, straining and wavering high above the river, white and pathetic and translucent.” (paragraph 4)
H. “A man's life is of many flashing moments, and yet one stream; a nation's flows through all its citizens, and yet is more than they.” (paragraph 4)

29. Read this sentence from paragraph 4.

There one can sit and let great cloudy thoughts of destiny and the passage of empires drift through the mind; for such dreams are at home by Niagara.

The sentence most contributes to the development of ideas in the excerpt by

A. suggesting that viewing the Falls can be a life-changing experience.
B. showing that the cliffs of the Falls are a good place for self-examination.
C. emphasizing that the grandeur of the Falls seems impossible to grasp.
D. highlighting the type of reflection that is inspired by a visit to the Falls.
30. In paragraph 4, the idea that human life and history travel toward the same ending is illustrated mainly through

   E. the discussion of how the rainbows visible in the Falls are like the art and beauty created by humankind.
   F. the comparison between the movement of water in the Falls and the human experience.
   G. the inclusion of details that show that every observer’s experience with the Falls is different.
   H. the acknowledgment that contemplating the Falls at night sparks an awareness of humankind’s destiny.

31. With which statement would the author of this excerpt most likely agree?

   A. A sense of ease and assurance comes with accepting one’s fate.
   B. No matter where one’s path goes in life, one will always have regrets.
   C. The best way to overcome fear is to recognize it and then defy it.
   D. Reason will die out with humanity, but art will remain immortal.
Uncovering the Past

Archaeology as a distinct branch of science is only about two centuries old. The first archaeological activities focused largely on the search for clues about earlier human societies. In the nineteenth century, most archaeologists were amateurs trained in ancient languages and history. Many were art historians whose interest lay in the artwork and monuments of ancient civilizations. For the most part, their excavations were aimed at uncovering and removing priceless artwork and other valuable artifacts for museum display. Collectively, these early archaeologists are now considered traditional archaeologists.

Today, however, there is a different approach to archaeology, one that tries to reconstruct the everyday life of people in ancient times by applying the scientific methods of a range of specialized fields. Modern archaeologists take full advantage of available technology. Laptop computers enable digging teams to record their finds at each level of an excavation. With sketchpad computer software, archaeologists can draw their finds in the field. Three-dimensional computer modeling enables researchers to create floor plans and elevations for the structures they uncover. Archaeologists can also use remote sensing technologies such as radar and lidar, which is similar to radar but it uses laser light instead of radio waves. These technologies enable scientists to detect traces of early settlements that are not visible to the human eye.

The excavations at Kourion, a Roman port city on the island of Cyprus in the Mediterranean Sea, serve as an example of the modern approach. Portions of Kourion had been unexpectedly buried by a massive earthquake in the fourth century A.D. Traditional archaeologists were interested primarily in the remains of Kourion's theater, temple, and classical monuments. They also collected precious objects, such as jewelry, found in nearby tombs. Modern archaeologists, however, have focused their studies and excavations on the settlement itself. This preserved seaport has proved to be a gold mine of important information about everyday life sixteen centuries ago.

During one excavation of a house at Kourion, for example, forensic anthropologists were able to reconstruct the skeleton of a young girl, whom they called Camelia. On the basis of her teeth, they determined her age to be about thirteen, although measurement of her skeleton showed that she was only the size of a modern eleven-year-old. The study of the teeth also confirmed her sex and pointed to her excellent health; Camelia had no cavities. Even after centuries, the forensic scientists could study the physical evidence in ways similar to those used in criminal investigations to determine the circumstances of Camelia’s death.

Other specialists on this excavation included a zooarchaeologist, who identified animal remains, including the skeleton of a mule found near Camelia. Another specialist, a paleobotanist, studied the contents of a bake oven at the site and identified four domesticated grains among the charred crumbs—evidence of a kind of ancient multigrain bread.

Although the archaeologists at this site unearthed a few beautiful items, the excavation did not uncover any priceless artwork for museums. Nonetheless, the archaeological processes used in Kourion have given us a valuable insight into everyday life in a Roman city.
32. Which of the following best describes the goal of modern archaeology?
   
   E. to use science to learn how people lived in the past  
   F. to find artwork from ancient civilizations  
   G. to search for evidence of ancient settlements  
   H. to uncover precious objects for display in museums  

33. What would a traditional archaeologist be most interested in finding at a site like Kourion?

   A. a human skeleton  
   B. beautiful jewelry or ceramics  
   C. evidence of foods eaten  
   D. the remains of animals  

34. What role does paragraph 2 play in the structure of the passage?

   E. It provides a contrast to the topic discussed in the first paragraph.  
   F. It details examples that support the central idea of the first paragraph.  
   G. It states a theory that will be explained further in the third paragraph.  
   H. It summarizes the information found in the rest of the passage.  

35. Which conclusion is best supported by the information in paragraph 4?

   A. Forensic anthropologists specialize in the excavation of ancient theaters and temples.  
   B. Forensic anthropologists can obtain a variety of information by examining teeth.  
   C. Forensic anthropologists believe that people in the past were smaller than people are today.  
   D. Forensic anthropologists primarily investigate ancient crimes.
36. As described in paragraphs 4–5, what did the archaeological team learn about life in Kourion?

   E. People in Kourion had a better diet than people have today.
   F. People in Kourion kept a wide variety of domesticated animals.
   G. People in Kourion had a shorter life expectancy than people have today.
   H. People in Kourion made bread from various domesticated grains.

37. What is the most likely reason the author mentions the zooarchaeologist (paragraph 5)?

   A. to introduce the topic of other artifacts discovered near Camelia
   B. to contrast this position with that of the paleobotanist
   C. to complete the list of archaeological specialists
   D. to provide an example of a particular field in modern archaeology
Snowy Mountains
by John Gould Fletcher

Higher and still more high,
Palaces made for cloud,
Above the dingy city-roofs
Blue-white like angels with broad wings,

Pillars of the sky at rest
The mountains from the great plateau
Uprise.

But the world heeds them not;
They have been here now for too long a time.

The world makes war on them,
Tunnels their granite cliffs,
Splits down their shining sides,
Plasters their cliffs with soap-advertisements,
Destroys the lonely fragments of their peace.

Vaster and still more vast,
Peak after peak, pile after pile,
Wilderness still untamed,
To which the future is as was the past,
Barrier spread by Gods,

Sunning their shining foreheads,
Barrier broken down by those who do not need
The joy of time-resisting storm-worn stone,
The mountains swing along
The south horizon of the sky;

Welcoming with wide floors of blue-green ice
The mists that dance and drive before the sun.

“Snowy Mountains” by John Gould Fletcher—Public Domain

38. The description in the first stanza (lines 1–7) helps establish a central idea of the poem by

   E. comparing the length of time the mountains have existed with the length of time the city
      has existed.
   F. contrasting the grandeur of the mountains with the structures in the city below them.
   G. implying that the mountains are a source of inspiration to the people in the city below.
   H. suggesting that the mountains are larger than the people in the city realize.
39. Read line 1 and line 15 from the poem.

Higher and still more high,
Vaster and still more vast,

The parallel structure of the two lines

A. emphasizes how the sense of wonder the speaker has at the beginning of the poem changes to a fear of the mountains.
B. reinforces the sense of awe the speaker experiences when considering the magnificence of the expansive mountains.
C. reveals that the mountains are continually expanding both in height and land mass.
D. stresses a contrast between the height of the mountains and the area of land the mountains cover.

40. Read line 5 from the poem.

Pillars of the sky at rest

The line helps develop the theme of the poem by suggesting that the mountains

E. serve a noble and supportive purpose in the world.
F. attract the clouds with their strength and permanence.
G. remain untamed through the ages.
H. provide protection for the people.

41. How does isolating the word “Uprise” in line 7 affect the meaning of the poem?

A. It creates a contrast between the great plateau and the city buildings.
B. It reveals the similarity between the tall buildings in the city and the tall mountains on the horizon.
C. It creates a vision of the region before people developed the land.
D. It emphasizes that the mountains dominate the landscape.
42. How does the poet develop the speaker's point of view in the second stanza (lines 8–14)?

E. by describing images of the mountains’ awe-inspiring size and strength
F. by illustrating the differences among the various ways humans can impact the natural environment
G. by criticizing society for taking careless, destructive courses of action against nature
H. by demonstrating how the mountains and the people are able to benefit from each other

43. Which line from the poem best supports the idea that people have forfeited priceless natural beauty in order to make a profit?

A. “Above the dingy city-roofs” (line 3)
B. “The world makes war on them,” (line 10)
C. “Tunnels their granite cliffs,” (line 11)
D. “Plasters their cliffs with soap-advertisements,” (line 13)

44. Which detail from the poem reflects the speaker’s view that people often fail to appreciate what is familiar?

E. “The mountains from the great plateau” (line 6)
F. “They have been here now for too long a time.” (line 9)
G. “Splits down their shining sides,” (line 12)
H. “To which the future is as was the past,” (line 18)

45. How do the details in the third stanza (lines 15–26) contribute to the development of the theme of the poem?

A. by reflecting nature’s capacity to resist change
B. by showing that nature is capable of influencing human will
C. by exposing how a lack of awareness leads to nature’s ruin
D. by explaining why people must respect nature
46. Read lines 21–22 from the poem.

   Barrier broken down by those who do not need
   The joy of time-resisting storm-worn stone,

   How do the lines help convey the speaker’s point of view?

   E. They suggest that the speaker wants to remove the obstacles that prevent others from experiencing the wonders of nature.
   F. They reveal the speaker’s opinion that some people are too busy to appreciate natural beauty.
   G. They suggest the speaker’s dismay that people destroy the natural landscape without understanding the ramifications of their actions.
   H. They explain that the speaker is confident that nature will never be fully destroyed by people.

47. Read lines 23–26 from the poem.

   The mountains swing along
   The south horizon of the sky;
   Welcoming with wide floors of blue-green ice
   The mists that dance and drive before the sun.

   The personification in these concluding lines of the poem suggests that the mountains are

   A. gracious hosts who are untroubled by the actions of people.
   B. unaware of their coming destruction.
   C. lively entertainers who are not bothered by the everyday concerns of people.
   D. too proud to reveal their pain.
Samuel Morse, an American inventor, is credited with creating the electronic telegraph, a communication device that allows users to send messages using a system of short and long pulses that represent letters, numbers, and punctuation. In 1844 the United States Congress passed the Telegraph Bill, which provided Morse with the funds to build an electric telegraph system.

Invention of the Telegraph

Earlier Signal Systems

Long before Samuel F. B. Morse electrically transmitted his famous message “What hath God wrought?” from Washington to Baltimore on May 24, 1844, there were signaling systems that enabled people to communicate over distances. Most were visual or “semaphore” systems using flags or lights. In the eighteenth century, such systems used an observer who would decipher a signal from a high tower on a distant hill and then send it on to the next station. The young American republic wanted just such a system along its entire Atlantic coast and offered a prize of $30,000 for a workable proposal. The framers of this legislation had no way of knowing that when they used the word “telegraph” to refer to this visual semaphore system, they would be offered an entirely new and revolutionary means of communication—electricity.

The Growth of an Idea

The idea of using electricity to communicate over distance is said to have occurred to Morse during a conversation aboard ship when he was returning from Europe in 1832. Michael Faraday’s recently invented electromagnet was much discussed by the ship’s passengers, and when Morse came to understand how it worked, he speculated that it might be possible to send a coded message over a wire. While a student at Yale College years before, he had written his parents a letter about how interesting he found the lectures on electricity. Despite what he had learned at Yale, Morse found when he began to develop his idea that he had little real understanding of the nature of electricity, and after sporadic attempts to work with batteries, magnets, and wires, he finally turned for help to a colleague at the University of the City of New York, Leonard D. Gale.

Gale was a professor of chemistry and familiar with the electrical work of Princeton’s Joseph Henry, a true pioneer in the new field. Well before Morse had his shipboard idea about a telegraph, Henry rang a bell at a distance by opening and closing an electric circuit. In 1831, he had published an article, of which Morse was unaware, that contained details suggesting the idea of an electric telegraph. Gale’s help and his knowledge of this article proved crucial to Morse’s telegraph system because Gale not only pointed out flaws in the system but showed Morse how he could regularly boost the strength of a signal and overcome the distance problems he had encountered by using a relay system Henry had invented. Henry’s experiments, Gale’s assistance, and, soon after, hiring the young technician Alfred Vail were keys to Morse’s success.

Obstacles and Opportunities

By December 1837, Morse had enough confidence in his new system to apply for the federal government’s appropriation, and during the next year he conducted demonstrations of his telegraph both in New York and Washington.

1legislation: Telegraph Bill
However, when the economic disaster known as the Panic of 1837 took hold of the nation and caused a long depression, Morse was forced to wait for better times. It was during this period that Morse visited Europe again and tried not only to secure patent protection overseas but to examine competing telegraph systems in England. . . .

By 1843, the country was beginning to recover economically, and Morse again asked Congress for the $30,000 that would allow him to build a telegraph line from Washington to Baltimore, forty miles away. The House of Representatives eventually passed the bill containing the Morse appropriation, and the Senate approved it in the final hours of that Congress's last session. With President Tyler's signature, Morse received the cash he needed and began to carry out plans for an underground telegraph line.

**Realizing a Great Invention**

Morse had hired the ingenious construction engineer Ezra Cornell to lay the pipe carrying the wire, and although Cornell did his job superbly, one of Morse's partners, Congressman F. O. J. Smith, had purchased wire with defective insulation. Too much time had been wasted laying bad wire, and with the project on a rigid deadline, something had to be done quickly. Cornell suggested that the fastest and cheapest way of connecting Washington and Baltimore was to string wires overhead on trees and poles. The desperate Morse gave the go-ahead, and the line was completed in time for the dramatic and spectacularly successful link between the Supreme Court chamber of the Capitol building and the railroad station in Baltimore.

Soon, as overhead wires connected cities up and down the Atlantic coast, the dots-and-dashes method of recording messages on a long moving strip of paper was replaced by the operator's ability to interpret the code in real time. . . . Telegraph lines soon extended westward, and within Morse's own lifetime they connected the continents of Europe and America.

---

**Invention of the Telegraph**—Public Domain/Library of Congress

**dots-and-dashes method:** the short and long pulses of Morse code that are sent and received by telegraph operators
The first transatlantic electric telegraph message was sent in 1858, and by 1902 the British All-Red Line connected most of the world.

48. Which statement describes how the author’s use of problem-solution in paragraph 2 contributes to the development of ideas in the passage?

E. Morse’s discussion on a ship about Faraday’s electromagnet reminded him of the Yale College lectures on electricity, which he had enjoyed but had not fully understood, inspiring him to learn more about electricity from his colleague Gale.

F. Morse’s discouragement over his lack of knowledge of electricity prompted him to experiment with batteries, magnets, and wires, which led to the development of a new long-distance communication system.

G. Morse’s difficulty in understanding how Faraday’s electromagnet worked was frustrating, and it pushed him to create a system for sending signals over wires.

H. Morse’s longtime fascination was not enough to make up for his lack of knowledge about electricity, so he eventually sought help from Gale.

49. Which statement describes how the author’s use of sequencing in paragraph 3 contributes to the overall structure of the passage?

A. It shows that several people were simultaneously attempting to create an electric telegraph.

B. It shows how the invention of the electric telegraph depended on information and techniques discovered by others.

C. It shows that multiple means of long-distance communication were being used at the same time.

D. It shows how quickly long-distance communication changed from visual signals to electrical signals.

50. Read this sentence from paragraph 7.

The desperate Morse gave the go-ahead, and the line was completed in time for the dramatic and spectacularly successful link between the Supreme Court chamber of the Capitol building and the railroad station in Baltimore.

The words “dramatic” and “spectacularly” in the sentence convey a

E. sense of relief and fulfillment that the line was finished.

F. sense of wonder and of celebration that the telegraph line was completed on time.

G. feeling of excitement about the future possibilities of the telegraph.

H. feeling of confidence about being able to continue the work.
51. Which excerpt from the passage supports the idea that Morse was aware of his limitations?

A. “After sporadic attempts to work with batteries, magnets, and wires, he finally turned for help to a colleague.” (paragraph 2)
B. “Gale’s help and his knowledge of this article proved crucial to Morse’s telegraph system.” (paragraph 3)
C. “Henry’s experiments, Gale’s assistance, and, soon after, hiring the young technician Alfred Vail were keys to Morse’s success.” (paragraph 3)
D. “Morse had hired the ingenious construction engineer Ezra Cornell to lay the pipe carrying the wire.” (paragraph 7)

52. The details of the section “The Growth of an Idea” convey a central idea of the passage by suggesting that

E. the collaborative efforts of colleagues resulted in successful communication over a wire.
F. a great deal of interest and work was devoted to understanding how to use electricity to send signals.
G. Faraday’s invention of the electromagnet inspired the invention of the telegraph.
H. colleges like Yale played a great role in making new discoveries about electricity and its applications.

53. How does the graph support the ideas in paragraph 8?

A. It indicates how welcome the improvement of long-distance communication was in the United States.
B. It provides evidence of the dramatic increase in the number of telegraph messages as Morse’s system expanded across the United States.
C. It reveals that by the twentieth century millions of people had used the telegraph despite earlier hesitations about the system.
D. It shows how improvements that allowed Morse code to be read in real time made relaying telegraph messages faster and increased the system’s usage.
54. Which sentence is the best summary of how Morse obtained the funding necessary to build his telegraph system?

E. Morse applied for a federal grant that was delayed until 1843, so he spent time traveling in Europe, where he concentrated on obtaining a patent for his system.
F. Morse applied for a government grant that required both houses of Congress and the president to pass a bill awarding him $30,000 for his telegraph project.
G. Morse applied for a government appropriation and conducted telegraph demonstrations to show that his system could work, and after a delay caused by a financial depression, Congress approved the $30,000 appropriation in 1843.
H. Working with Gale and Vail allowed Morse to find flaws in Henry’s work and to develop his own ideas before applying for the federal government appropriation.

55. How does the map provide additional support for a central idea of the passage?

A. by demonstrating that Morse’s telegraph system greatly exceeded the limitations of previous long-distance communication systems
B. by indicating that Morse was lacking foresight by seeking a patent only in North America
C. by proving that Gale’s advice helped Morse extend the telegraph’s range much farther than first thought possible
D. by providing a graphic that shows the surprisingly immense influence Morse’s telegraph had across the world

56. The idea that, in the mid-nineteenth century, the United States was mostly unaware of the possibilities of electricity is illustrated in the passage mainly through the

E. description of the government’s initial desire to expand a semaphore signaling system that used either flags or lights along the Atlantic Coast.
F. delay by the House of Representatives to pass the bill funding Morse’s telegraph line six years after he first applied for the appropriation.
G. discussions of the newly invented electromagnet that sparked the idea of sending codes through wires.
H. description of how an electric circuit could be closed to ring a bell at a distance.

57. With which statement would the author most likely agree?

A. Morse’s telegraph was successful because the wires were strung aboveground rather than underground as originally planned.
B. Understanding the importance of Morse’s telegraph requires detailed knowledge of electrical systems.
C. The implementation of Morse’s telegraph system was overly influenced by economic factors.
D. Morse’s invention of the telegraph made a great stride toward better connecting people across the United States and across the world.
PART 2 — MATHEMATICS

57 QUESTIONS

IMPORTANT NOTES

(1) Formulas and definitions of mathematical terms and symbols are not provided.

(2) Diagrams other than graphs are not necessarily drawn to scale. Do not assume any relationship in a diagram unless it is specifically stated or can be figured out from the information given.

(3) Assume that a diagram is in one plane unless the question specifically states that it is not.

(4) Graphs are drawn to scale. Unless stated otherwise, you can assume relationships according to appearance. For example, (on a graph) lines that appear to be parallel can be assumed to be parallel; likewise for concurrent lines, straight lines, collinear points, right angles, etc.

(5) Reduce (simplify) all fractions to lowest terms.

## Grid-In Questions

### Questions 58–62

**DIRECTIONS:** Solve each question. On the answer sheet, write your answer in the boxes at the top of the grid. Start on the left side of each grid. Print only one number or symbol in each box. Under each box, fill in the circle that matches the number or symbol you wrote above. **DO NOT FILL IN A CIRCLE UNDER AN UNUSED BOX. DO NOT LEAVE A BOX BLANK IN THE MIDDLE OF AN ANSWER.**

MULTIPLE CHOICE QUESTIONS

QUESTIONS 63–114

DIRECTIONS: Solve each question. Select the best answer from the choices given. Mark the letter of your answer on the answer sheet. When you are solving questions, you can write in the test booklet or on the scrap paper given to you.

63. If $x = 9$ and $y = -7$, what is the value of $x(x - 2y)$?
   A. 18
   B. 45
   C. 144
   D. 207

64. A roofing contractor uses shingles at a rate of 3 bundles for every 96 square feet of roof covered. At this rate, how many bundles of shingles will he need in order to cover a roof that is 416 square feet?
   E. 5
   F. 12
   G. 13
   H. 14

65. $M = 3N = \frac{P}{4} = Q + 5 = \frac{R}{7} > 0$
   Based on the statement above, which variable has the greatest value?
   A. $M$
   B. $N$
   C. $P$
   D. $R$

66. In the figure above, PQRS is a parallelogram. The measure of $\angle PQT$ is 50°, and the measure of $\angle PTQ$ is 70°. What is the measure of $\angle QRS$?
   E. 60°
   F. 70°
   G. 80°
   H. 120°

67. To make party invitations, Macie could buy a package of paper for $10.50, or she could buy $x$ individual sheets of the same paper for $0.15 each. What is the largest value of $x$ that would make buying the individual sheets less expensive than buying the package?
   A. 60
   B. 65
   C. 69
   D. 70
68. At 1:00 p.m. one day, the temperature was 8 degrees above zero. During the rest of the day, the temperature fell 3 degrees per hour. What was the temperature at 7:00 p.m. that day?

E.  $-13^\circ$  
F.  $-10^\circ$  
G.  $-7^\circ$  
H.  $5^\circ$

69. A bag contains 75 marbles that are red, blue, or green. The ratio of red to blue marbles is $15:7$, and the ratio of blue to green marbles is $7:3$. If 2 blue marbles are removed and replaced with 2 green marbles, what will be the new ratio of red to green marbles?

A.  $3:1$  
B.  $5:1$  
C.  $15:3$  
D.  $45:11$

70. The table above shows the number of times that different desserts were ordered at a restaurant. Based on this information, what is the probability of a customer ordering ice cream as a dessert?

<table>
<thead>
<tr>
<th>Dessert</th>
<th>Number of Times Ordered</th>

<tr>
<td>Cake</td>
<td>47</td>
</tr>
<tr>
<td>Ice Cream</td>
<td>48</td>
</tr>
</tbody>
</table>

71. What is the least common multiple of 24, 6, and 18?

A.  36  
B.  48  
C.  72  
D.  144

72. One day, the Early Bird Restaurant used 15 dozen eggs for 200 breakfast customers. At this rate, approximately how many dozen eggs are needed for 300 breakfast customers?

E.  20  
F.  23  
G.  25  
H.  30
73. A cooler contains three types of beverages: 5 bottles of apple juice, 3 bottles of grape juice, and 6 bottles of orange juice. What is the probability that a bottle chosen at random from this cooler is not apple juice?

A. \( \frac{1}{9} \)

B. \( \frac{5}{14} \)

C. \( \frac{9}{14} \)

D. \( \frac{2}{3} \)

74. A large circular dinner plate has a radius of 20 centimeters. A smaller circular plate with a circumference of \( 20\pi \) centimeters is placed in the center of the larger dinner plate. What is the area of the part of the larger dinner plate that is not covered by the smaller plate?

E. \( 20\pi \) sq cm

F. \( 100\pi \) sq cm

G. \( 200\pi \) sq cm

H. \( 300\pi \) sq cm

75. 

<table>
<thead>
<tr>
<th>Page Space</th>
<th>Price</th>
</tr>
</thead>
<tbody>
<tr>
<td>( \frac{1}{4} ) page</td>
<td>$200</td>
</tr>
<tr>
<td>( \frac{1}{2} ) page</td>
<td>$350</td>
</tr>
<tr>
<td>full page</td>
<td>$600</td>
</tr>
</tbody>
</table>

The table above shows prices for newspaper advertising. A store purchased \( \frac{1}{4} \) pages, \( \frac{1}{2} \) pages, and full pages of page space in equal numbers for a total of $11,500. What is the total amount of page space the store purchased?

A. \( 1\frac{3}{4} \) pages

B. 10 pages

C. \( 16\frac{1}{2} \) pages

D. \( 17\frac{1}{2} \) pages

76. How many positive odd numbers satisfy the inequality \( 3x + 8 \leq 92 \)?

E. 13

F. 14

G. 17

H. 28
77. If \( \frac{36}{y} = 4x \), what is the value of \( x \) when \( y = 3 \)?
   A. 3  
   B. 4  
   C. 9  
   D. 12

78. Points X, Y, and Z are on a straight line, and Y is between X and Z. Length \( \overline{YZ} = \frac{3}{5} \overline{XY} \), and length \( \overline{XY} = 20 \) centimeters. What is the length of \( \overline{XZ} \)?
   E. 12 cm  
   F. 24 cm  
   G. 30 cm  
   H. 32 cm

79. Bryana bought 1 3/4 yards of cloth at $8.00 per yard. If there was an 8% sales tax, what was the total cost of the cloth?
   A. $12.96  
   B. $14.08  
   C. $15.12  
   D. $16.08

80. On the number line above, \( MN = 5 \frac{5}{6} \). What is the position of point \( M \)?
   E. \(-7 \frac{1}{6}\)  
   F. \(-4 \frac{1}{2}\)  
   G. \(4 \frac{1}{2}\)  
   H. \(7 \frac{1}{6}\)

81. A United States presidential coin is made from an alloy of four metals—copper, zinc, manganese, and nickel—with weights in the ratio of 177:12:7:4, respectively. The coin weighs a total of 8 grams. What is the weight of the zinc in this coin?
   A. 0.28 g  
   B. 0.48 g  
   C. 0.96 g  
   D. 48 g

82. Jack scored a mean of 15 points per game in his first 3 basketball games. In his 4th game, he scored 27 points. What is his mean score for the first 4 games?
   E. 15  
   F. 17  
   G. 18  
   H. 21
83. A cylindrical oil drum can hold 4,320 liters when it is completely full. Currently, the drum is \( \frac{1}{3} \) full of oil. How many kiloliters of oil need to be added in order to fill the drum completely?

A. 1.44  
B. 2.88  
C. 4.32  
D. 14.10

86. If \( w - 1 \) is an odd integer, which one of the following must be an even integer?

E. \( w + 1 \)  
F. \( 2w - 1 \)  
G. \( 2w - 2 \)  
H. \( 2w + 1 \)

84. Nicole’s age now is three times Carmen’s age. If Carmen will be 17 in two years, how old was Nicole 5 years ago?

E. 38 yr  
F. 40 yr  
G. 45 yr  
H. 50 yr

87. Three students stand at the starting line of a running track and begin running laps at the same time. Ann completes 1 lap every 2 minutes, Jack completes 1 lap every 3 minutes, and Lee completes 1 lap every 4 minutes. How many laps does Ann complete before all three runners are once again at the starting line at the same time?

A. 4  
B. 6  
C. 12  
D. 20

85. A chemical decays in such a way that the amount left at the end of each week is \( 20\% \) less than the amount at the beginning of that same week. What percent of the original amount is left after two weeks?

A. 40%  
B. 60%  
C. 64%  
D. 80%

88. Simplify this expression:

\[ 4(7 - 3x) - (5 - x) \]

E. \( 23 - 4x \)  
F. \( 23 - 11x \)  
G. \( 28 - 4x \)  
H. \( 28 - 12x \)
89. **PET SURVEY**

<table>
<thead>
<tr>
<th>Number of Pets</th>
<th>Number of Students</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>12</td>
</tr>
<tr>
<td>1</td>
<td>16</td>

<tr>
<td>2</td>
<td>7</td>
</tr>
<tr>
<td>3 or more</td>
<td>5</td>
</tr>
</tbody>
</table>

Amy surveyed students at her school about the number of pets they have. What is the probability that a student who participated in the survey has at least 2 pets?

A. \( \frac{7}{40} \)
B. \( \frac{1}{12} \)
C. \( \frac{1}{8} \)
D. \( \frac{3}{10} \)

90. A large container is partially filled with \( n \) liters of water. Ito adds 10 liters of water to the container, making it 60% full. If Ignacio adds 6 more liters of water, the container will be 75% full. What is the value of \( n \)?

E. 14
F. 15
G. 26
H. 30

91. \( 5x^3 + 3x + 9 + \frac{1}{x^2} \)

If \( x = 10 \), what is the value of the expression above?

A. 2,539.01
B. 5,039.01
C. 5,039.1
D. 5,139

92. R, S, and T are midpoints of the sides of square MNPQ, as shown above. What is the sum of the areas of the shaded triangles?

E. 9 sq cm
F. 12 sq cm
G. 18 sq cm
H. 36 sq cm

93. The Chens spend $5 of every $8 they earn on planned expenses. If the family earns $29,600 in one year, how much will they spend on planned expenses that year?

A. $1,850
B. $3,700
C. $5,920
D. $18,500
94. A pizza shop offers a choice of 3 sizes (small, medium, and large) and 7 different toppings. Different pizzas can be created by changing the size and/or the choice of toppings. If Cody wants to order a pizza with exactly 2 different toppings, how many different pizzas can he create?

E. 6  
F. 21  
G. 63  
H. 126

95. The table above shows the number of cats per family in 100 households in the Blaine neighborhood. By what percentage is the number of families with 1 cat greater than the number of families with 2 cats?

<table>
<thead>
<tr>
<th>Number of Cats</th>
<th>Number of Families</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>15</td>
</tr>
<tr>
<td>1</td>
<td>42</td>
</tr>
<tr>
<td>2</td>
<td>35</td>
</tr>
<tr>
<td>3 or more</td>
<td>8</td>
</tr>
</tbody>
</table>

96. A wooden box has a square base. The height of this box is 3 times the length of one side of the base. If one side of the base is 3 feet long, what is the volume of this box?

E. 9 cu ft  
F. 27 cu ft  
G. 36 cu ft  
H. 81 cu ft

97. On a bike trip, Rajiv traveled 65 kilometers in 5 hours, while Shaina traveled 72 kilometers in 4 hours. How much less was Rajiv’s mean speed, in kilometers per hour (kph), than Shaina’s?

A. 1  
B. 5  
C. 7  
D. 9

98. Points P, Q, R, and S represent −3, −1, 0, and 2, respectively, on a number line. How many units is the midpoint of PQ from the midpoint of RS?

E. 1  
F. 2  
G. 3  
H. 4

99. There are 1,000 cubic centimeters in 1 liter, and 1,000 cubic millimeters in 1 milliliter. How many cubic millimeters are there in 1,000 cubic centimeters?

A. 1,000  
B. 10,000  
C. 100,000  
D. 1,000,000
100. In the quarter circle above, what is $y$ in terms of $x$?

- E. $x - 1$
- F. $x + 1$
- G. $\frac{x+1}{2}$
- H. $\sqrt{\frac{(x+1)^2}{2}}$

101. The hash marks on the number line above are evenly spaced. What is the coordinate of point R?

- A. $\frac{7}{40}$
- B. $\frac{9}{40}$
- C. $\frac{11}{40}$
- D. $\frac{21}{40}$

102. Phan chose an Internet service that charges $18.00 per month plus $0.024 per minute. Deion chose an Internet service that charges $30.00 per month for unlimited usage. At the end of the month, Phan’s and Deion’s charges were identical. For how many minutes did Phan use the Internet service that month?

- E. 50
- F. 60
- G. 100
- H. 500
103. In a sample of 50 cars at a local dealership, there are 12 red cars and 10 cars with backup cameras. Of the 12 red cars, 4 have backup cameras. If a car is selected at random from the given sample, what is the probability that both of the following are true: the car is not red and does not have a backup camera?

A. \( \frac{3}{5} \)

B. \( \frac{16}{25} \)

C. \( \frac{19}{25} \)

D. \( \frac{4}{5} \)

104. The decimal 0.06 can be written as the fraction \( \frac{x}{50} \). What is the value of \( x \)?

E. 3

F. 6

G. 12

H. 30

105. What is the area of the shaded triangle shown above?

A. \( m + n \)

B. \( n - m \)

C. \( 2(n - m) \)

D. \( 4(n - m) \)
The cards in the table above are mixed in a box. Which animal pictured on a card has exactly a 1 in 4 chance of being picked at random from the box?

E. cat  
F. dog  
G. fish  
H. horse  

A ball is selected at random from a box that contains 7 black balls, 14 green balls, and 21 red balls. What is the probability that the ball selected is black?

A. \( \frac{1}{6} \)  
B. \( \frac{1}{5} \)  
C. \( \frac{1}{3} \)  
D. \( \frac{5}{6} \)  

At North High School, a survey asked two questions, Question A and Question B. For each question, students could answer either “yes” or “no.” Of the 800 students who responded to the survey, 720 answered “yes” to Question A, and 640 answered “yes” to Question B. What is the least possible number of these students who could have answered “yes” to both questions?

E. 80  
F. 160  
G. 560  
H. 640
111. Raoul is at least 3 years older than Vahn. Which of the following inequalities gives the relationship between Raoul’s age \( r \) and Vahn’s age \( v \)?

A. \( r - v \geq 3 \)
B. \( r - v \leq 3 \)
C. \( 3 - v \leq r \)
D. \( 3 - r \leq v \)

112. 1 sind = 5.6 ricks
1 sind = 12.88 dalts

Using the conversion above, how many dalts are equal to 1 rick?

E. 0.43
F. 2.30
G. 7.28
H. 18.48

113. There are now \( x \) cans stacked on a shelf that holds 36 cans when full. If 4 of these cans were removed, the shelf would be half full. What is the value of \( x \)?

A. 14
B. 16
C. 18
D. 22

114. Carlos tossed a paper cup in the air 50 times and found that the probability of it landing on its side was 72%. If he tosses the cup in the air 150 more times, what is the total number of times he can expect the cup to land on its side?

E. 72
F. 108
G. 144
H. 158
1. (B) The question asks for the correction needed for an error in the sentence. The sentence needs a comma to set off the clause “which is considered one of the ‘new’ Seven Wonders of the World,” because the clause is not essential to the meaning of the sentence (nonrestrictive clause). Option B is correct because it places a comma where it is needed, after “Italy,” to set off the nonrestrictive clause that follows. Option A is incorrect because when a name has more than one element, a comma is used to separate the elements for clarity. Option C is incorrect because it would remove the comma at the end of the nonrestrictive clause, which should be set off by commas at the beginning and the end. Option D is incorrect because a comma after “built” would separate the phrase “could hold more than 50,000 spectators,” which is a dependent clause that uses the subject from the main clause and so needs to stay connected to the rest of the sentence.

2. (E) The question asks for the correction of an error in sentence structure in the paragraph. The first sentence is a run-on sentence because both clauses—“In September 2016 the National Museum of African American History and Culture opened as part of the Smithsonian Institution” and “the museum is already the Smithsonian’s third most popular site”—are independent clauses, and independent clauses should not be combined without the use of a conjunction and a comma. The revision in Option E adds the word “and” before the comma, which corrects the run-on. Option F, Option G, Option H are incorrect because the corresponding underlined portions in the paragraph are not structural errors. No edits are needed to correct those portions of the text.

3. (C) The question asks for the correct revision of the sentence in the box. The sentence is incorrect because, as written, the phrase “to promote their club” refers to the closest noun to the phrase, which is “a bake sale,” and that does not match logically. Option C is correct because the revision has the phrase “to promote their club” clearly modifying “members of the debate team” and adds the idea that the bake sale is on Wednesday to the end of the sentence. Option A and Option B are incorrect because the revisions do not fix the error that “to promote their club” modifies “a bake sale.” Option D is incorrect; while the revision clarifies that “to promote their club” relates to the “members of the debate team,” the rest of the sentence is poorly written because the insertion of “on Wednesday to promote their club” in the middle of the sentence interrupts the main clause, “Members of the debate team will sponsor a bake sale.”

4. (G) The question asks for the necessary revisions to the paragraph. Option G is correct because the errors appear in sentence 3 of the paragraph. The word “studies” is in the present tense, but it should be changed to “studied” to match the past tense established in the paragraph (“spent,” “recited”). Additionally, the comma after the word “emotions” needs to be removed because the words “emotions and motivations” are part of a group (series) of two elements, and when there are only two elements in a series, a comma is not used. Option E is incorrect because sentence 1 does not need to be revised. The word “spent” is correct in the past tense, and there is no need to insert a comma after the word “play.” Option F is incorrect because sentence 2 does not need to be revised. The word “did” is correct as written in the past tense, and there is no comma needed after the word “projection” because “so” is not functioning as a conjunction but rather as part of the conjunction phrase “so that,” which does not take a comma. Option H is incorrect because sentence 4 does not need to be revised. The word “recited” is correct as written in the past tense, and the comma after “times” is needed in order to separate the modifying phrase “making slight adjustments and improvements to his performance each time” from the main clause.

The Local Library

5. (A) The question asks for a sentence that should replace sentence 4 to introduce the main claim of the passage. Option A is correct because it best presents the main claim that the public library is a valuable resource and should be used by community members. Option B is incorrect because it states that going to the library can be a learning experience. This idea is implied in sentences 17 and 18, but it is not the main claim of the passage. Option C is incorrect because it states the idea that the library is useful for students, which would be supporting evidence rather than an introductory statement expressing the main claim. Option D is incorrect because it states that local libraries provide services to help improve communities, which is explained in sentences 15–18, but it does not present the main claim.

6. (H) The question asks which option would provide the best support for sentence 8. Sentence 8 expresses the idea that the library helps community members meet their need for human connection and companionship. Option H is correct because it provides support for sentence 8 and strengthens the connection between the
information in sentence 8 and the main claim of the passage by listing examples of how people can connect at the library. Option E is incorrect because it references the history of the library, which does not support the idea in sentence 8 or the main claim of the passage. Option F is incorrect because, although it introduces the idea of community meetings, it does not support the idea in sentence 8. Option G is incorrect because it mentions expectations by the community members and brings up a new idea that is unrelated to the main claim of the passage and that does not provide support for sentence 8.

7. (A) The question asks for the revision of sentence 12 that best maintains the formal style established in the passage. Option A correctly maintains the formal style by using “people” instead of “you” and the more formal language “resources available” and “accomplish many tasks.” Option B is incorrect because it uses second person, directly addressing the reader, which is informal. Option C is incorrect because, even though it does not use second person, it uses informal language like “work on” and “things.” Option D is incorrect because it uses the informal phrase “whatever you need to do” in addition to informally addressing the reader through the use of second person.

8. (G) The question asks where sentence 17 should be moved in order to improve the organization of the fourth paragraph. Sentence 17 describes a typical librarian and the assistance he or she provides in the library. Option G correctly places sentence 17, an example of what else the librarian does, after the librarian is introduced in sentence 14. Option E is incorrect because it places the sentence before the main idea of the paragraph, which states that public libraries offer a variety of resources. Sentence 17 is an example of one of the resources, so it would not be placed at the beginning of the paragraph before the main idea. Option F is incorrect because it moves the sentence to before the librarian is introduced in the paragraph. Option H is incorrect because sentences 15 and 16 have shifted away from the topic of the librarian, so the details in sentence 17 would not logically fit between them.

9. (B) The question asks for a concluding sentence that would follow sentence 19 and support the argument presented in the passage. Option B is correct because it logically follows sentence 19 and supports the argument that the public library facilitates connections within a community and provides valuable services—some at no cost—by urging community members to use, maintain, and support their local public library. Option A is incorrect because it does not provide a logical conclusion that fully supports the argument in the passage; the sentence addresses only one benefit of having a public library, ignoring the valuable services and resources it provides. Option C is incorrect because it presents the idea that the library has been in existence since 1833, which does not logically provide a conclusion for the passage or support the argument developed in the passage. Option D is incorrect because it presents a new claim—community leaders must work together to support library events—instead of a conclusion that supports the argument presented in the passage.

10. (H) The question asks why the June 30 date bears significance to some scientists. Scientists noted that Earth was passing through cometary debris on June 30, 1908 (paragraph 4), which supports the idea stated in Option A, making it the correct response. Option B is incorrect because, although the scientists searched for a crater, they never found one (paragraph 2). Option F is also incorrect although the scientists searched for a crater, they never found one (paragraph 2). Option E is incorrect because, although huts were flattened when the blast occurred, the destruction of the huts was not evident when the site was found almost two decades later (paragraph 2). Option G is incorrect because, while it states a detail from the passage, the detail is not connected to the June 30 date. Option H is incorrect because the tremors recorded at a seismic station thousands of miles away detailed the magnitude of the event, not the location (paragraph 1). Option G is incorrect because, although huts were flattened when the blast occurred, the destruction of the huts was not evident when the site was found almost two decades later (paragraph 2).

11. (A) The question asks why the June 30 date bears significance to some scientists. Scientists noted that Earth was passing through cometary debris on June 30, 1908 (paragraph 4), which supports the idea stated in Option A, making it the correct response. Option B is incorrect because, while it states a detail from the passage, the detail is not connected to the June 30 date. Option C is incorrect because it states a theory regarding the cause of the impact that is not tied to the date of June 30. Option D is incorrect because this detail is used in the passage to suggest that such a blast could not have been caused by a comet.

12. (E) The question asks for the evidence found after Galli’s analysis. Galli discovered unusually high levels of some elements, such as copper, gold, and nickel, which are common elements in particles from outer space that were abundant in the tree resin (paragraph 6), as stated in Option E. Option F is incorrect because it refers to a
prior finding of Galli’s, not what his analysis of the tree resin revealed. Option G is incorrect because, although the spruce trees did survive the blast, they were the trees Galli studied rather than a revelation from his studies. Option H is incorrect because it was previously known that meteorites contained these elements, and that information was not revealed by Galli’s analysis.

13. (B) The question asks for the most likely reason it was difficult for scientists to discover the site of the Tunguska explosion. Paragraph 2 notes that the site of the blast was very “remote,” as stated in Option B. Option A is incorrect because none of the possible blast explanations mentioned in the passage suggest a nuclear explosion or radioactivity. Option C is incorrect because, even before visiting the site, scientists debated possible causes of the explosion (paragraphs 2–3). Option D is incorrect because the passage states in paragraph 2 that no evidence of a crater, or craters, was ever found.

14. (F) The question asks for an explanation of how paragraph 1 supports the passage. Paragraph 1 provides several examples of the severe damage caused by the explosion, as stated in Option F. Option E is incorrect because the scientific aspects of the explosion are not discussed until later in the passage. Option G is incorrect because paragraph 1 discusses some of the effects of the blast rather than the potential cause. Although human suffering is one detail described in paragraph 1, this is not the primary evidence of the explosion’s destruction, making Option H incorrect.

15. (D) The question asks how the questions at the end of the last paragraph affect the passage. Although the passage introduces a number of theories about the Tunguska explosion, no definitive explanation has been reached. This idea is stated in Option D. Option A is incorrect because, although the passage does not discourage further study, it does not specifically promote it. Option B is incorrect because, although the author presents multiple possible causes, the passage suggests that the damage was most likely caused by one of these possibilities rather than several of them simultaneously. The author is certainly curious about the actual cause of the Tunguska explosion but objectively presents the questions about it that remain unanswered, making Option C incorrect.

**Excerpt from A Voice in the Wilderness**

16. (G) The question asks how the phrase affects the tone in the first part of the excerpt. The phrase includes the words “all three” and “taken the trouble,” emphasizing Margaret’s early frustration as she recalls with some confused irritation that the men thought she needed an abundance of help earlier, but none of them is around to help when the train stops, as indicated in Option G. Option E is incorrect because when Margaret recalls the interaction, there is no indication that she blames the men for her current problem. Option F is incorrect because, while the description of how Margaret “hastily [gathers] up her belongings” and “[hurries] down the aisle” (paragraph 1) gives the appearance of being defiant, there is no evidence that she intentionally put herself in this vulnerable position just to make a point. Option H is incorrect because when Margaret recalls the interaction, there is no evidence that she appreciates the care shown to her, but rather she seems a bit offended that the men do not think she could take care of herself, as shown by the author’s description of the forceful way she exits the train without assistance when it stops.

17. (C) The question asks for evidence from the passage that best supports the claim that Margaret is unfamiliar with traveling to new places. If Margaret has never traveled to this region by train before, she must guess or attempt to interpret what she sees. This idea is best represented in the sentence in paragraph 1 (Option C) where she questions whether the stations in the West have platforms. The sentence in paragraph 1 (Option A) is an incorrect response because Margaret’s actions in the sentence are decisive as she gathers her belongings to disembark; she is familiar with rail travel. The sentence in paragraph 2 (Option B) is an incorrect response because, in the sentence, Margaret is using her knowledge about trains to attempt to interpret the actions of others; she is familiar with trains, even if a particular destination has not been mentioned. The sentence in paragraph 4 (Option D) is an incorrect response because, while the sentence shows that Margaret is trying to better understand her situation in the darkness, her ability to identify the train’s engine and the figures carrying lanterns indicates some familiarity with her mode of travel.

18. (H) The question asks which sentence correctly explains the connection between the sentence from paragraph 4 and the overall plot of the excerpt. The train’s need to stop for water is not evident to Margaret, which causes the external conflict. The sentence from paragraph 4 reveals how Margaret’s confusion over her best course of action prevents her from recognizing the nature of the external conflict; therefore, Option H is correct. Option E is incorrect because Margaret’s reliance
on others is not demonstrated in the sentence, and her reliance on others does not contribute to the external conflict. Option F is incorrect because her concern for the opinion of others is not the main cause for her external conflict. Option G is incorrect because Margaret's indecision has no effect on the cause of the conflict.

19. (B) The question asks how the simile in the sentence from paragraph 4 reflects the tone of the paragraph. The image of two or three fireflies creating small specks of light in the darkness creates a sense of isolation or loneliness in Margaret, as shown in the sentence, “A sudden feeling of isolation took possession of her” (paragraph 4). Therefore, Option B is correct. Option A is incorrect because Margaret is confused and indecisive, showing her discomfort with her situation. Option C is incorrect because Margaret expresses distress in her situation, questions her decision, and worries about being labeled a “fool” (paragraph 4). Option D is incorrect because the simile is meant to show how far away things are from Margaret, not create a feeling of dread, which develops later in paragraph 9.

20. (H) The question asks for what the imagery in the excerpt from paragraph 9 conveys. The words “useless” and “failure” in the sentence indicate that Margaret’s best efforts do not help her. The phrase “the last car slatted itself past” shows that Margaret is helpless to stop the train from departing, which leaves her completely vulnerable, as described in Option H. Option E is incorrect because describing Margaret’s “sickening sense of terror” indicates that she is extremely afraid of being left behind rather than increasingly irritated with the other passengers. Option F is incorrect because the paragraph mainly describes Margaret’s screaming and running could easily suggest feelings of anger, descriptions of her “sickening sense of terror” and reaches out “helpless hands,” the language used to describe the train as “swinging tauntingly” and having “a leer in its eye” confirms Margaret’s fears of being left alone and feeling foolish; there is nothing she can do to change the situation, as expressed in Option H. Option G is incorrect because, while the image of Margaret’s helpless hands dropping at her sides could suggest a sense of doubt, the figurative language in the sentence emphasizes a different feeling about her situation and does not indicate her intentions. Option F is incorrect because, while the figurative language seems to give a malevolent quality to the train, it is not referring to the people onboard, who are described in paragraph 8 as “comfortable and safe inside, unconscious of her need.” Option G is incorrect because, while Margaret is worried in paragraph 4 about embarrassing herself, she now feels “dazed” because she is overwhelmed with the seriousness of what has just happened.

21. (A) The question asks about the relationship between the theme and paragraph 9, where Margaret desperately tries to get someone on the train to notice her. One important theme of this excerpt concerns Margaret’s willingness to take action to ensure that she reaches her destination. This determination, described in Option A, is why she gathers her belongings together without help, gets off the train without being assisted by employees, and then attempts to climb back on while the train employees are busy examining the engine. Option B is incorrect because, while the narrator describes her screaming as useless, she does not feel that her efforts overall are useless, and she does not give up until paragraph 10. Option C is incorrect because, while Margaret is feeling a sense of “failure” in paragraph 9, she does not condemn herself as the train moves away. Option D is incorrect because Margaret has expressed “terror” in paragraph 9 over being unable to catch someone’s attention, not frustration over her lack of control over her surroundings.

22. (H) The question asks for what the figurative language illustrates in the sentence. As Margaret stands and reaches out “helpless hands,” the language used to describe the train as “swinging tauntingly” and having “a leer in its eye” confirms Margaret’s fears of being left alone and feeling foolish; there is nothing she can do to change the situation, as expressed in Option H. Option E is incorrect because, while the image of Margaret’s helpless hands dropping at her sides could suggest a sense of doubt, the figurative language in the sentence emphasizes a different feeling about her situation and does not indicate her intentions. Option F is incorrect because, while the figurative language seems to give a malevolent quality to the train, it is not referring to the people onboard, who are described in paragraph 8 as “comfortable and safe inside, unconscious of her need.” Option G is incorrect because, while Margaret is worried in paragraph 4 about embarrassing herself, she now feels “dazed” because she is overwhelmed with the seriousness of what has just happened.

23. (A) The question asks how paragraph 11 helps shape the overall plot of the excerpt. In paragraph 5, Margaret assumes there is a station, “It was probably on the other side, but she was standing too near the cars to see,” but in paragraph 11, the station that had been “so real” in Margaret’s mind actually does not exist, supporting Option A as the correct response. Option B is incorrect because Margaret’s main problem is not that she has imagined the station on the other side of the train but that it actually isn’t there. Option C is incorrect because, while Margaret seems somewhat in awe of her surroundings in paragraph 12 and she “gasped” in paragraph 11, her exclamation is one of shock at the discovery, not surprise over an unexpected adventure. Option D is incorrect because the paragraph mainly describes what Margaret does in the particular situation she is currently in but does not explain or provide details that give insight to Margaret’s personality in general.
24. (G) The question asks how the details about the setting support the theme of the excerpt. In paragraph 12, phrases such as “vast dome of curving blue” and “the beauty of the lonely night” describe the beauty of the place. However, in paragraph 13, the author writes, “no building broke the inky outlines of the plain, nor friendly light streamed out to cheer her heart” to express how alone Margaret really is. These phrases demonstrate that Option G is correct. Option E is incorrect because positive phrases such as “largest, most wonderful stars” show that Margaret is not overwhelmed by the darkness. Option F is incorrect because, while Margaret is feeling helpless and alone at the recent realization that there is no station (paragraph 11), the descriptions of the landscape, which focus on the beauty and mysteriousness of the place, do not signify hope but rather how quiet and isolated the location is. Option H is incorrect because, while Margaret has expressed fear in paragraphs 9–11, the details in paragraphs 12–13 do not show that she is discouraged but rather that she is aware of her situation because she sees no buildings or light.

Excerpt from “Niagara Falls”

25. (D) The question asks for a specific detail from paragraph 2 that conveys the central idea that the Falls communicates a feeling of “unintelligible disaster” (paragraph 1). The sound of falling is described in paragraph 2 as “a noise of unspecified ruin,” so Option D is correct because it best connects with the idea of “unintelligible disaster” mentioned in paragraph 1. Option A is incorrect because, although the water is described as “diaphanous as a precious stone” in paragraph 2 because of the “glow” coming from the interaction of the light, there are no stones within the water. Option B is incorrect because the details in paragraph 2 about the flow of colors in the water are described as an “ever-altering wonder,” which conveys a sense of beauty and not a sense of disaster. Option C is incorrect because the rainbows in paragraph 2 are described as “vivid” and accompanying someone “courteously” while he or she walks, which contributes to the idea that the appearance and disappearance of the rainbows are a pleasant experience and not disastrous.

26. (G) The question asks for the effect of the comparison being made in the sentence in paragraph 2. The word “lacework” in the sentence suggests an elegant piece of craftsmanship, and the “one long curtain” and “extraordinarily level” aspects of the Falls mean that the Falls are uniform or consistent; therefore, Option G is correct. Option E is incorrect because neither “lacework and woven foam,” nor the quality of being extremely level, are related to timelessness. Option F is incorrect because, while a curtain may suggest the idea of something being hidden or secret, the description of a delicate “lacework” curtain does not suggest this purpose. Option H is incorrect because “lacework” is generally fragile and does not suggest great strength.

27. (C) The question asks for the statement that best describes how the sentence from paragraph 3 fits into the overall structure of the excerpt. The first sentence of paragraph 3 moves the description “beyond the foot of the Falls” to “the river” and then begins to describe this location before confirming it again with the words “these are the lower rapids.” This emphasis on the shift in location is best stated in Option C, making it the correct response. Option A is incorrect because, as the first sentence in paragraph 3 states, the paragraph describes the river and not aspects of the Falls. Option B is incorrect because the entire paragraph describes only the literal movements of the river. Option D is incorrect because the features of the rapids, as described in paragraph 3, are all obvious and not hidden.

28. (E) The question asks for the sentence from the excerpt that best supports the idea that the essence of the Falls lies in their emotional impact. The first sentence in the excerpt establishes the “real secret of the beauty and terror of the Falls . . . lies in the feeling of colossal power and unintelligible disaster.” Option E is correct because the sentence in Option A best supports this notion by identifying these qualities as “the heart,” or essence, of the Falls. While “delicate” and “fragile” are words that can be connected with certain kinds of emotions, in the sentence in Option F, they are connected with physical beauty, so Option F is incorrect. Option G is incorrect because, while the sentence in Option G describes the power of the Falls’ to engage one in thought, it does not best support the idea that the essence of the Falls lies in their emotional impact. Option H is incorrect because the sentence in Option H describes thoughts one may have while watching the Falls and is not focused on the Falls’ emotional impact.

29. (D) The question asks how the sentence from paragraph 4 contributes to the development of ideas in the excerpt. The description of “cloudy thoughts of destiny and the passage of empires” in the sentence refers to the types of thoughts a person might have while observing the Falls, as stated in Option D. Option A is incorrect because the sentence focuses on the idea that the Falls are a place of great contemplation but does not clarify that these thoughts are life-changing. Option
B is incorrect because the sentence does not describe focused thoughts of a personal nature; the grand, sweeping nature of the Falls inspire thoughts of the same caliber as “the passage of empires.” Option C is incorrect because the sentence is about how the Falls inspire great thoughts but is not about how difficult it is to grasp the grandeur of the Falls.

30. (F) The question asks how the discussion of human life and history is illustrated in paragraph 4 of the excerpt. The author concludes in paragraph 4 that the Falls can be compared to people and history by writing, “both men and nations are hurried onwards to their ruin or ending as inevitably as this dark flood,” making Option F correct. Option E is incorrect because the discussion of rainbows in paragraph 4 focuses on the fate of art and beauty, not of humanity (“I could not get out of my mind the thought of a friend, who said that the rainbows over the Falls were like the arts and beauty and goodness, with regard to the stream of life—caused by it, thrown upon its spray, but unable to stay or direct or affect it, and ceasing when it ceased”). Option G is incorrect because, in paragraph 4, the author talks about people in general when discussing “men and nations” and provides no evidence of the differences in specific individuals’ experience of the Falls. Option H is incorrect because, while the setting at night does provide a place of contemplation, the author notes the “dark flood” as the overall illustration of the human experience.

31. (A) The question asks for the statement the author would agree with most. In paragraph 4, the author states that the Falls make a person feel “with an almost insupportable and yet comforting certitude, that both men and nations are hurried onwards to their ruin or ending.” Later, the final sentence says, “With some such thoughts does the platitudinous heart win from the confusion and thunder of a Niagara peace.” This sentence supports the author’s belief that a person can find peace in accepting the certainty of his or her own ending, as expressed in Option A. Option B is incorrect because the author does not discuss regrets in the excerpt. Option C is incorrect because, while the excerpt discusses fear when looking at the power of the Falls, the excerpt does not support the idea that one should defy fear. Option D is incorrect because the excerpt states in paragraph 4 that art is “unable to stay.”

Uncovering the Past

32. (E) The question asks for a summary of what the goal of modern archaeology is in general. The passage is mostly about how archaeology has evolved from efforts to discover ancient artwork and museum pieces to using technology to piece together a sense of life in early civilizations, which is best described in Option E. Option F is incorrect because it states the goal of archaeology in the past, not in modern times. Option G is incorrect because finding settlements is not the goal but just the first step in the modern archaeological process. Option H is incorrect because it states the goal of traditional, rather than modern, archaeology.

33. (B) The question asks what artifacts a traditional archaeologist would be interested in finding based on the material in the passage. The passage explains that, unlike modern archaeologists, traditional archaeologists are interested in valuable items from the past rather than learning about the people from the past and their lifestyles. Jewelry and ceramics are examples of valuable items, which makes Option B correct. Option A is incorrect because human skeletons would be valuable to modern archaeologists, not traditional archaeologists. Option C is incorrect because it is a detail that relates to modern archaeologists’ efforts to study people, not just valuable items. Option D is incorrect because the remains of animals would also advance the goals of modern, rather than traditional, archaeologists.

34. (E) The question asks how paragraph 2 supports the structure of the passage. The first paragraph provides history on the field of archaeology, specifically what has come to be known as traditional archaeology. Paragraph 2 describes how modern archaeology differs from traditional archaeology, which is detailed in Option E. Option F is incorrect because paragraph 2 provides no support for paragraph 1. Option G is incorrect because paragraph 2 provides facts about modern archaeology and does not introduce a theory. The remainder of the passage describes how modern archaeology was used at one specific dig, which is not mentioned in paragraph 2, making Option H incorrect.

35. (B) The question asks for the concluding sentence that best summarizes the information from paragraph 4. Paragraph 4 explains that Camelia’s age was determined through an examination of her teeth, which makes the conclusion in Option B the correct answer. Option A is incorrect because the excavation discussed in the paragraph is at a house, not a theater or temple. Option C is incorrect because, although Camelia’s body was smaller than a thirteen-year-old’s would be expected to be, the passage does not go into enough detail to suggest that all people from the past were smaller than people...
are today. Option D is also incorrect because there is no evidence in the passage of Camelia's death being the result of a crime.

36. (H) The question asks what archaeologists learned about the ancient culture based on the evidence found in paragraphs 4–5. Paragraph 5 states that a paleobotanist identified four domesticated grains within a bake oven at the site, which supports Option H. Option E is incorrect because there is not enough evidence in either paragraph to support the broad assumption that people in Kourion had a better diet than people today. Option F is incorrect because the passage mentions the discovery of the remains of only one domesticated animal, which does not support the idea that Kourion people kept a wide variety of domesticated animals. Option G is incorrect because paragraph 4 states that Camelia's age was determined to be about thirteen at the time of her death, but since her death was likely caused by a natural disaster, the suggestion that all Kourion people had a shorter life expectancy than people today is not supported.

37. (D) The question asks for the strongest reason for the author mentioning the zooarchaeologist in the passage. The primary purpose of the passage is to explain and describe modern archaeology, the technology it employs, and various aspects of the field. Zooarchaeology is a specialty within the field, which is stated in Option D. Option A is incorrect because other artifacts found near Camelia could have been introduced without mentioning the zooarchaeologist. Option B is incorrect because the text does not state any comparisons between zooarchaeologists and paleoarchaeologists. Option C is incorrect because the passage does not provide a list of archaeological specialists.

**Snowy Mountains**

38. (F) The question asks how the description in the first stanza helps establish a central idea of the poem. The poem is mostly about the grandeur of the mountains in spite of the spread of civilization. The first stanza contrasts these two elements, which is stated in Option F. Option E is incorrect because it is a detail that is referenced later in the poem. Option G is incorrect because the poem actually communicates the message that people do not recognize the greatness of the mountains. Option H is incorrect because, although the first stanza mentions the size of the mountains, it does not imply that people cannot see how large the mountains are.

39. (B) The question asks how the parallel structure of lines 1 and 15 affect the poem. Lines 1 and 15 communicate the feeling that the mountains are even higher and vaster than can be comprehended upon first view. This observation reflects the awe that the speaker feels, which is reinforced by the parallel structure of the lines, as stated in Option B. Option A is incorrect because the speaker never hints at fear when describing the mountains. Option C is incorrect because it reflects a literal interpretation of the figurative language in the two parallel lines: the mountains do not actually grow larger but are simply larger than can be understood at first. Option D is incorrect because the parallel structure of lines 1 and 15 is not meant to stress any sort of contrast between height and area but to reinforce the speaker's feeling by complementing each other.

40. (E) The question asks how the line from the poem helps develop the theme of the poem. Line 5 helps develop the theme that the mountains are more important than people realize by suggesting that the mountains serve a noble, foundational purpose in the world, as explained in Option E. Option F is incorrect because, while the poem does describe the strength and permanence of the mountains, the line does not suggest that these traits attract the clouds. Option G is incorrect because, while the line states that the highest peaks are “at rest,” the mountains mentioned in the poem have already been harmed by human influence and do not remain untamed or untouched. Option H is incorrect because, while pillars are strong and may indicate shelter, there is no suggestion in the line that the mountains are protecting the people. Additionally, this concept is not a theme of the poem.

41. (D) The question asks how the isolation of the word affects the meaning of the poem. The isolation of the word “Uprise” powerfully emphasizes the first stanza's description of the magnificent mountains standing tall above the land below, as expressed in Option D. Option A is incorrect because the word describes the mountains and, therefore, does not create a contrast between the plateau and the city buildings, but rather between the mountains and the plateau. Option B is incorrect because the word contrasts the mountains with the plateau; it does not compare the mountains to the buildings in the city. Option C is incorrect because the first stanza describes the already developed land over which the mountains rise.

42. (G) The question asks how the poet develops the speaker's point of view in the second stanza. In the
second stanza, the speaker criticizes the destructive actions of “the world” (lines 8 and 10) against the mountains—actions such as tunneling “their granite cliffs” (line 11) and destroying “the lonely fragments of their peace” (line 14)—as described in Option G. Option E is incorrect because the speaker’s descriptions of the mountains’ grandeur mainly occur in the first and third stanzas, while in the second stanza, the speaker focuses on humanity and its negative effect on the mountains. Option F is incorrect because the wording of the second stanza—“makes war” (line 10), “Splits down their shining sides” (line 12), and “Destroys the lonely fragments” (line 14)—communicates the speaker’s position that people’s main impact on the mountains is destructive; the wording does not illustrate different ways people impact the natural environment. Option H is incorrect because no benefit to the mountains is described by the speaker in the second stanza.

43. (D) The question asks for the line from the poem that best supports the idea that people have forfeited natural beauty for profit. Advertisements are often used as a means to gain a profit, as implied by the soap advertisement in line 13 (Option D). Additionally, the word “Plasters,” in line 13, communicates a negative connotation for the use of advertisements on the priceless natural beauty of the mountains, making Option D the correct response. Option A is incorrect because, while city roofs may spoil the natural beauty, they do not directly symbolize financial gain or profit in line 3. Option B is incorrect because, although making a profit might have been the root cause of the damage that was done to the mountains, making war on the mountains is not a direct message about profit or financial gain in line 10. Option C is incorrect because, although tunneling through the mountains affects the natural beauty of the mountains, it does not directly symbolize financial gain or profit in line 11.

44. (F) The question asks for the detail from the poem that reflects the speaker’s view that people often fail to appreciate that which is familiar. Line 9 (Option F) most directly supports this idea by implying that the mountains have been here for so long that people are accustomed to seeing them and no longer appreciate their beauty and value, making Option F the correct response. Option E is incorrect because line 6 describes the mountains’ location, rather than their longevity or familiarity. Option G is incorrect because, in line 12, the mention of harm that has been done to the mountains does not connect to a sense of overfamiliarity. Option H is incorrect because, although line 18 alludes to the longevity of the mountains, it does not connect the longevity with a sense of overfamiliarity or the failure of people to appreciate the mountains’ worth.

45. (A) The question asks how the details in the third stanza contribute to the development of the theme of the poem. In the third stanza, phrases such as “Wilderness still untamed” (line 17), “time-resisting storm-worn stone” (line 22), and “The mountains swing along” (line 23) convey the message that in spite of the destruction described in the second stanza, the mountains manage to maintain their wild magnificence. This message is communicated in Option A. Option B is incorrect because, while the phrase “Barrier broken down” (line 21) conveys the idea that people can have some effect on the natural landscape, it does not convey how nature affects people. Option C is incorrect because the phrase “those who do not heed” (line 21) implies a choice to damage nature and not a lack of awareness or understanding. Option D is incorrect because the third stanza is not a call to humanity to respect the mountains but a description of the untamed, welcoming mountains and the joy they provide for those who appreciate them.

46. (G) The question asks how the lines help convey the speaker’s point of view. The words “those who do not need / The joy” in lines 21–22 suggest the speaker’s sadness that people do not realize that they are destroying something wonderful and irreplaceable, as expressed in Option G. Option E is incorrect because the word “barrier” (line 21) refers to the speaker’s opinion that the mountains were “spread by Gods” (line 19) and not an obstacle that the speaker thinks should be removed. Option F is incorrect because, while the lines indicate that people have lost the need to connect with nature, they do not reveal that the speaker thinks that the cause of this loss is busyness. Option H is incorrect because, although the speaker does say that the stone is “time-resisting” (line 22), this belief is only a small detail of the speaker’s point of view.

47. (A) The question asks what the personification in the lines suggests in the poem. Line 25’s use of the word “Welcoming” suggests that the mountains are kind hosts. Lines 23 and 26, with language such as “The mountains swing along” and “The mists that dance and drive before the sun,” imply the carefree nature of the mountains as they resist the destructive work of humanity. Therefore, Option A is correct. Option B is incorrect because the wording in the lines is positive and victorious, with no language to suggest coming destruction. Option C is incorrect because, although the lines mention that “the mountains swing along” (line 23) and “the mists . . . dance” (line 26), the personification is used to describe the
The Invention of the Telegraph

48. (H) The question asks for the best explanation of how the use of problem-solution in paragraph 2 helps develop the ideas in the passage. Option H is correct because it explains that Morse realized his problem was that he was not knowledgeable enough to continue his experimentation without help, so the solution was to seek help from a colleague. Option E is incorrect because, while “Morse found when he began to develop his idea that he had little real understanding of the nature of electricity” (paragraph 3), the paragraph does not state that he was discouraged; it was his failed experimentation that resulted in him first realizing that he needed help. Option G is incorrect because the paragraph states that “Morse came to understand how [Faraday’s electromagnet] worked,” and that understanding is what caused him to think about sending messages over a wire; Also, Morse’s difficulty was in understanding the properties of electricity in general once he began his experimentation.

49. (B) The question asks how the use of sequencing, or arranging in chronological order, in paragraph 3 contributes to the overall structure of the passage. Paragraph 3 outlines the information that Gale knew who Henry was (“Well before Morse had his shipboard idea about a telegraph, Henry rang a bell at a distance by opening and closing an electric circuit”), and that Gale told Morse. Gale’s input was “crucial to Morse’s telegraph system,” and hiring Vail was an additional and necessary help. Therefore, Option B is correct because the creation of Morse’s telegraph involved a series of steps that each built upon earlier ideas and inventions from others, such as Henry, Gale, and Vail. Option A is incorrect because, although the inventions and advancements of others assisted in the development of the telegraph, the passage does not suggest that the other men were attempting to create their own telegraph systems. Option C is incorrect because the only other long-distance communication system mentioned in the passage is the outdated semaphore system discussed in paragraph 1. Option D is incorrect because the telegraph system was in development for more than ten years because of the lack of funding and the need for further experimentation.

50. (F) The question asks what the words “dramatic” and “spectacularly” convey in the sentence. Morse and Cornell rushed to post the wires overhead, and the “rigid deadline” (paragraph 7) was successfully met. The words have a positive and victorious tone that is consistent with the feeling of wonder that it worked and of celebration that the construction was completed, making Option F correct. Option E is incorrect because, while there may have been some feelings of relief and fulfillment that the lines were in place, the passage does not say so, and instead it focuses on the wonder and joy Morse and Cornell felt overcoming setbacks and completing the construction of Morse’s telegraph system. Option G is incorrect because the passage does not share whether Morse or Cornell considered the future possibilities of the telegraph, only that the finished product was “dramatic,” implying it was amazing to see. Option H is incorrect because, while the passage later discusses the expansion of overhead wires “up and down the Atlantic coast” and how they “connected the continents of Europe and America” (paragraph 8), there is no evidence shared in the passage that Morse planned to continue his work with electricity.

51. (A) The question asks for support from the passage for the idea that Morse was aware of his limitations. Option A is correct because the sentence from paragraph 2 details the materials with which Morse experimented unsuccessfully before turning to others for assistance. Option B is incorrect because, although the sentence from paragraph 3 notes that Gale provided necessary assistance, it makes no reference to Morse admitting defeat and requesting his help. Option C is incorrect because, although the sentence from paragraph 3 makes it clear that Henry, Gail, and Vail contributed to Morse’s success, the sentence does not specifically say that Morse realized that he needed assistance to succeed. Option D is incorrect because the sentence from paragraph 7 refers to Morse seeking help from Ezra Cornell in constructing his system, not in developing a way to make it work.

52. (F) The question asks how a passage section helps convey a central idea of the passage. Paragraph 3 states that “Henry’s experiments, Gale’s assistance, and, soon after, hiring the young technician Alfred Vail were keys to Morse’s success.” The level of interest inspired Morse and others to work together to find a way to use electricity to send long-distance messages. Option F is correct; the section helps convey a central idea...
because, overall, the section focuses on what fascinated Morse enough to begin his work and how others were just as interested and willing to work to achieve this goal. Option E is incorrect because, although the word collaborative suggests that multiple people contributed to the telegraph’s success, the option does not clarify the research and effort needed in order to understand how to use electricity to send signals. Option G is incorrect because when Morse came to understand how Faraday’s electromagnet worked, Morse wondered if it might be possible to send a coded message over a wire, but that thought later evolved into the telegraph only after more research and experimentation. Option H is incorrect because the influence of what Morse learned at Yale was only a minor factor in his development of the telegraph.

53. (B) The question asks how the graph supports the ideas in paragraph 8. The graph shows the number of messages transmitted from 1870 to 1920. In 1920 almost 160 million messages were transmitted, showing a “dramatic”—almost double—increase from 1910, which makes Option B the correct answer. Option A is incorrect because, while it can be implied from the expansion shown on the graph that people possibly welcomed the improvement in long-distance communication, the graph does not state this explicitly. Option C is incorrect because the graph does not show how many people used the telegraph, but rather it shows the number of messages sent. Additionally, paragraph 8 provides no details about hesitation on the part of individuals. Option D is incorrect because, while improvements in recording and interpreting code were made, the graph does not show the effect of this advancement on the speed or number of messages being transmitted.

54. (G) The question asks for the best summary of Morse’s efforts to fund the construction of his telegraph system. Option G is correct because it details all the steps that resulted in Morse obtaining the appropriation, or $30,000 needed. Option E is incorrect because it focuses on what Morse did while his application for the funding was delayed. Option F is incorrect because, while it begins with Morse applying for the grant, it focuses on the process required for the government to approve the appropriation. Option H is incorrect because it relates how Morse worked with others to develop his ideas about the telegraph before applying for funding for its construction.

55. (A) The question asks how the map provides additional support for a central idea of the passage. The map shows the telegraph line crossing continents in 1902, just forty-four years after the first message was sent in 1858. This is a much greater distance than the first line Morse built between “the Supreme Court chamber of the Capitol building and the railroad station in Baltimore” (paragraph 7), making Option A correct. Option B is incorrect because the map shows the distance the line covers; it does not indicate Morse’s lack of foresight in seeking patents only in North America. Option C is incorrect because, while Gale’s advice was crucial to Morse’s success, the map shows the physical line stretching across continents many years later, after their initial work. Option D is incorrect because, while it can be inferred that the telegraph had influence across the world, the amount of influence cannot be determined.

56. (E) The question asks for information that conveys the idea that the United States was mostly unaware of the possibilities of electricity in the mid-nineteenth century. The passage states that most signaling systems at the time were “visual or ‘semaphore’ systems using flags or lights” (paragraph 1) and that the United States was looking for “just such a system along its entire Atlantic coast” (paragraph 1). Option E is correct because waving lights and flags reveals how limiting and simple the system of the time was, and Option E states that the United States wanted to expand this system, not improve upon it. Option F is incorrect because the delay in funding had to do with the Panic of 1837 and the “long depression” (paragraph 5), not because the House of Representatives was not aware or ready for innovation in the use of electricity. Option G is incorrect because it focuses on what prompted Morse to consider an electronic wire-based communications system. Option H is incorrect because it describes a basic aspect of an early electrical discovery that demonstrated the interest of scientists in the possibilities of electricity, not the United States as a whole.

57. (D) The question asks which statement best represents a viewpoint held by the author of the passage. Paragraph 8 states that “Telegraph lines soon extended westward, and within Morse’s own lifetime they connected the continents of Europe and America.” Therefore, Option D is correct because the author presents Morse’s telegraph as a great leap in the ability to quickly communicate messages over distances never before imagined. Option A is incorrect because the author explains that the aboveground wiring was used only because “Cornell suggested that [it was] the fastest and cheapest way” (paragraph 7), not because it would be more successful. Option B is incorrect because the author conveys the importance of this advancement in communication without providing detailed information about electrical systems. Option C is incorrect because,
while the Panic of 1837 caused a delay in Morse's funding, the author shows that Morse received the appropriation in 1843 and was able to overcome the financial setback he faced.
58. (120) There are 5 choices for the first digit, 4 choices for the second digit, 3 choices for the third digit, 2 choices for the fourth digit, and 1 choice for the final digit. The total number of possibilities is \(5 \times 4 \times 3 \times 2 \times 1 = 120\).

59. (3) \[
\frac{147 - x}{12} = 12
\]
\[147 - x = 144\]
x = 3

60. (3.4) \[|(-6) - (-5) + 4.2| - |3 - 9.6| = |3.2| - |-6.6|\]
\[= 3.2 - 6.6 = -3.4\]

61. (300) Let \(x\) be the total number of pages in the workbook. Then, 20% of \(x\) is 60. Set up a proportion and solve for \(x\):
\[
\frac{20}{100} = \frac{60}{x}
\]
\[20x = 6,000\]
x = \(\frac{6,000}{20} = 300\) pages

62. (65) Call the missing angle in the top half of the figure \(x\). The sum of the four angles on the top of the figure is equal to 180°.
\[x + y + 30 + 60 = 180\]
Since \(x\) is a vertical angle with the 25° angle, then \(x\) is also 25°. Use that to solve for \(y\).
\[25 + y + 30 + 60 = 180\]
\[y + 115 = 180\]
y = 65

63. (D) \[x(2y) = 9[9 - 2(-7)] = 9(9 + 14)\]
\[= 9(23) = 207\]

64. (E) Find the missing angle, angle QPT, of triangle PQT: \(180° - 70° - 50° = 60°\)
   In parallelogram PQRS, angle QPT is congruent to angle QRS, so the measure of angle QRS is also 60°.

65. (D) Break the equations apart to each equal \(M\):
   \[M = 3N\]
   \[M = \frac{P}{4}\]
   \[M = Q + 5\]
   \[M = \frac{R}{7}\]
Pick a number to substitute into the equations, and solve the equations to find the values of \(M, N, P, Q,\) and \(R\).
Let \(M = 2\). Since all the equations are equal to 2, substitute 2 to find each variable.
\[M = 3N\]
\[2 = 3N\]
\[\frac{2}{3} = N\]
\[M = \frac{P}{4}\]
\[2 = \frac{P}{4}\]
\[8 = P\]
\[M = Q + 5\]
\[2 = Q + 5\]
\[-3 = Q\]
\[M = \frac{R}{7}\]
\[2 = \frac{R}{7}\]
\[14 = R\]
Variable \(R\) has the greatest value.
66. (G) Set up a proportion:
\[
\frac{x}{416} = \frac{3}{96}
\]
\[96x = 1,248\]
\[x = 13\text{ bundles}\]

67. (C) Set up an inequality to compare the costs:
\[0.15x \leq 10.50\]
\[x \leq 70\]
Therefore, 70 individual sheets of paper would cost $10.50, so 69 is the greatest number of individual sheets of paper that Macie can buy that would be less expensive than the package.

68. (F) 7:00 p.m. is 6 hours after 1:00 p.m. Calculate the number of degrees the temperature dropped in 6 hours: \[3 \times 6 = 18\text{ degrees}.\]
Subtract that from the starting point (8 degrees) to find the solution: \[8 - 18 = -10\text{ degrees}.\]

69. (D) The ratio of red to blue to green is 15:7:3.
Find the proportion of blue marbles. Add the numbers of the ratio and use the total sum as the denominator: \[\frac{7}{15+7+3} = \frac{7}{25} = \frac{3}{25}.\]
Find the proportion of green marbles: \[\frac{3}{25}.\]
Since there are a total of 75 marbles, the number of blue marbles is \[\frac{7}{25} \times 75 = 21.\]
The number of green marbles is \[\frac{3}{25} \times 75 = 9.\] The number of red marbles is \[75 - 21 - 9 = 45.\]
If 2 blue marbles are removed and replaced with 2 green marbles, the number of blue marbles is now 19 and the number of green marbles is now 11. The ratio of red marbles to green marbles is 45:11.

70. (F) The total number of desserts ordered is \[42 + 23 + 47 + 48 = 160.\]
The probability that ice cream was chosen is \[\frac{48}{160} = \frac{3}{10} = 30\%.\]

71. (C) Since 18 and 24 are both multiples of 6, find the least common multiple of only 18 and 24.
Multiples of 18: 18, 36, 54, 72...
Multiples of 24: 24, 48, 72...
The least common multiple of 6, 18, and 24 is 72.

72. (F) Let \(x\) be the number of dozens of eggs for 300 customers. Set up a proportion:
\[\frac{x}{300} = \frac{15}{200}\]
\[200x = 4500\]
\[x = 22.5\text{ dozen eggs.}\]
Round up to 23 because you can't have half an egg.

73. (C) The total number of bottles of juice in the cooler is \(5 + 3 + 6 = 14.\)
The number of bottles of juice that are not apple juice (grape juice and orange juice) is \(3 + 6 = 9.\)
So the probability is \(\frac{9}{14}.\)
74. (H) The radius of the large plate is 20 cm. Use that to find the area of the large plate:

\[ A = \pi r^2 = \pi (20^2) = 400\pi \text{ sq cm} \]

The circumference of the smaller plate is 20\pi cm. Use that to find the radius, and then the area, of the smaller plate:

\[ C = 2\pi r \]

\[ 20\pi = 2\pi r \]

\[ r = 10 \]

\[ A = \pi r^2 = \pi (10^2) = 100\pi \text{ sq cm} \]

Subtract the area of the small plate from the area of the large plate:

\[ 400\pi - 100\pi = 300\pi \text{ sq cm} \]

75. (D) The question says that an equal number \((x)\) of each type of page space was purchased. To find the number of each type of page space that was purchased, multiply the price per type by \(x\) and set it equal to the total amount spent, then solve for \(x\):

\[ 200x + 350x + 600x = 11,500 \]

\[ 1,500x = 11,500 \]

\[ x = 10 \]

Thus, the store purchased 10 units of each type of page space. To find the total amount of page space purchased, multiply each type of page space by 10, and add:

\[ (10 \times \frac{1}{4} \text{ page}) + (10 \times \frac{1}{2} \text{ page}) + (10 \times 1 \text{ page}) = 17\frac{1}{2} \text{ pages} \]

76. (F) Solve the inequality for \(x\).

\[ 3x + 8 \leq 92 \]

\[ 3x \leq 84 \]

\[ x \leq 28 \]

The positive odd numbers less than 28 are 1, 3, 5, ..., 25, and 27. There are 14 of them.

77. (A) Substitute 3 for \(y\) and solve for \(x\):

\[ \frac{36}{y} = 4x \]

\[ \frac{36}{3} = 4x \]

\[ 12 = 4x \]

\[ 3 = x \]

78. (H) Since \(XY = 20\) cm, use that to find \(YZ:\)

\[ YZ = \frac{3}{5}XY = \frac{3}{5}(20) = 12 \text{ cm} \]

\[ XZ = XY + YZ = 20 + 12 = 32 \text{ cm} \]

79. (C) Calculate the cost of the cloth before tax:

\[ \frac{3}{4} \times 8 = \frac{7}{4} \times 8 = \$14 \]

Now find the tax for \$14 worth of cloth:

\[ 14 \times 8\% = 14 \times \frac{8}{100} = \$1.12 \]

Finally, add the cost of the fabric and the tax:

\[ \$14 + \$1.12 = \$15.12 \]

80. (F) To find \(M\), subtract \(N - M\) and set it equal to the length:

\[ \frac{1}{3} - M = \frac{5}{6} \]

\[ -M = \frac{5}{6} - \frac{1}{3} \]

\[ -M = \frac{5}{6} - \frac{2}{6} \]

\[ -M = \frac{3}{6} \]

\[ M = -\frac{4}{2} \]
81. (B) Add the four values in the ratio \((177 + 12 + 7 + 4 = 200)\) and use the sum as the denominator. Use that to find the fraction of zinc in one of the coins. Then reduce the fraction:
\[
\frac{12}{200} = \frac{3}{50}
\]
Multiply this fraction by 8 to find the number of grams of zinc in decimal form:
\[
\frac{3}{50} \times 8 = \frac{24}{50} = 0.48 \text{ g}
\]

82. (G) Jack scored a mean of 15 points per game in each of the first 3 games, so he earned a total of 45 points for the first 3 games. Use that information to calculate the mean over the four games:
\[
\frac{45 + 27}{4} = \frac{72}{4} = 18
\]

83. (B) Find the number of liters that need to be added. Since \(\frac{1}{3}\) of the oil drum is full, \(\frac{2}{3}\) of the drum remains empty:
\[
\frac{2}{3} \times 4,320 = 2,880 \text{ liters}
\]
Use the conversion \(1 \text{ kL} = 1,000 \text{ L}\) to find the number of kL:
\[
\frac{2,880}{1,000} = 2.88 \text{ kL}
\]

84. (F) First, find out how old Nicole and Carmen are now.
Let \(N = \) Nicole’s age now.
Let \(C = \) Carmen’s age now.
\[C + 2 = 17\]
\[C = 15 \text{ (Carmen’s age now)}\]
\[N = 3C\]
\[N = 3(15) = 45 \text{ (Nicole’s age now)}\]
\[N - 5 = 45 - 5 = 40 \text{ (Nicole's age 5 years ago)}\]

85. (C) Let \(x\) be the original amount of the chemical. It loses 20% after each week, which means 80% of the chemical remains at the end of each week.
End of first week: \(0.80x\)
At the end of the second week, 80% of the amount left at the end of the first week remains.
End of second week: \(0.80(0.80x) = 0.64x\) or \(64\%\)

86. (G) One more than an odd integer must be even.
One more than \(w - 1\) is \(w\), therefore \(w\) must be even. Two times an even integer must be even, therefore \(2w\) is even. An even integer decreased by 2 must be even.
Therefore, \(2w - 2\) must be even.

87. (B) Find the least common multiple of 2, 3, and 4 — which is 12. So, it takes 12 minutes before all three are back at the starting line. Ann completes 1 lap every 2 minutes, so in 12 minutes she has completed 6 laps.

88. (F) \(4(7 - 3x) - (5 - x) = 28 - 12x - 5 + x\)
\[= 23 - 11x\]

89. (D) First, add the number of students for each category to find out how many total students were in the survey: \(12 + 16 + 7 + 5 = 40\)
The number of students who had at least 2 pets are the ones who have 2 pets (7) plus the ones who have 3 or more (5). The total number of students with at least 2 pets is \(7 + 5 = 12\).
The probability of a student in the survey having at least two pets is:
\[
\frac{12}{40} = \frac{3}{10}
\]
90. (E) Let \(x\) be the total number of liters the container can hold.

\[
\frac{n+10}{x} = 60\% \quad \text{and} \quad \frac{n+16}{x} = 75\% 
\]

First, solve each equation for \(x\):

Equation 1:

\[
\frac{n+10}{x} = \frac{60}{100} \\
\frac{n+10}{x} = \frac{3}{5} \\
3x = 5(n + 10) \\
x = \frac{5n+50}{3}
\]

Equation 2:

\[
\frac{n+16}{x} = \frac{75}{100} \\
\frac{n+16}{x} = \frac{3}{4} \\
3x = 4(n + 16) \\
x = \frac{4n+64}{3}
\]

Now, set the two equations equal to each other and solve for \(n\).

\[
\frac{5n+50}{3} = \frac{4n+64}{3} \\
5n + 50 = 4n + 64 \\
6n = 14 \\
\]

91. (B) \[5x^3 + 3x + 9 + \frac{1}{x^2} \]

\[= 5(10^3) + 3(10) + 9 + \frac{1}{10^2} \]

\[= 5,000 + 30 + 9 + \frac{1}{100} = 5,039.01\]

92. (E) The length of one side of the square is 6 cm. Since R, S, and T are midpoints, then \(TM, MR, RN, \) and \(NS\) are all equal to 3 cm. Triangles TMR and RNS are both right triangles, so the area of one of the triangles is \(\frac{1}{2} \times 3 \times 3 = \frac{9}{2}\). The triangles are congruent, so the sum of the areas is \(\frac{9}{2} + \frac{9}{2} = 9\) sq cm.

93. (D) Let \(x\) be the amount spent on planned expense in one year:

\[\frac{x}{29,600} = \frac{5}{8}\]

\[x = \frac{5}{8} (29,600) = 18,500\]

94. (G) First, figure out how many different topping pairs are possible. Use 1, 2, 3, 4, 5, 6, 7 to represent the toppings and create a list of possible pairs:

1, 2; 1, 3; 1, 4; 1, 5; 1, 6; 1, 7
2, 3; 2, 4; 2, 5; 2, 6; 2, 7
3, 4; 3, 5; 3, 6; 3, 7
4, 5; 4, 6; 4, 7
5, 6; 5, 7
6, 7

So there are 21 different topping combinations for one pizza.

Since there are 3 pizza sizes, multiply the total number of combinations by 3 to get the total number of different pizzas Cody can create: \(3 \times 21 = 63\).

95. (D) To find by what percent the number of families with 1 cat is greater than the number of families with 2 cats, calculate the difference between the two numbers and divide by the number of families with 2 cats:

\[
\frac{42 - 35}{35} = \frac{7}{35} = \frac{1}{5} = 0.20 \text{ or } 20\%.
\]
96. (H) One side of the square base is 3 ft long. Since the height of the box is 3 times the length, then the height is \(3 \times 3 = 9\) ft. The volume of a rectangular prism is length \(\times\) height \(\times\) width. The volume of the wooden box is \(V = 3 \times 3 \times 9 = 81\) cu ft.

97. (B) Calculate each mean speed:
\[ R = \frac{65}{5} = 13\text{ kph} \]
\[ S = \frac{72}{4} = 18\text{ kph} \]
Then calculate the difference of both mean speeds:
\[ S - R = 18 - 13 = 5\text{ kph} \]

98. (G)

Find the midpoint of PQ and RS:
Midpoint of PQ = \(-\frac{1}{2} - (\frac{3}{2})\) = \(\frac{2}{2} = 1\) unit.
The midpoint of PQ is located 1 unit from each endpoint, so the midpoint is at \(-2\).
Midpoint of RS = \(\frac{2}{2} - \frac{0}{2} = \frac{2}{2} = 1\) unit.
The midpoint of RS is located 1 unit from each endpoint, so the midpoint is at 1.
The distance between the two midpoints is \(1 - (-2) = 3\) units.

99. (D) If \(1\) L = 1,000 cu cm, then \(1\) L = 1,000 mL. Set up a proportion, letting \(x\) = the amount of cubic millimeters in 1,000 cubic centimeters.
\[ \frac{1,000\text{ cu mm}}{1\text{ L}} = \frac{x\text{ cu mm}}{1,000\text{ cu mm}} \]
Solve for \(x\): 1,000,000 cubic millimeters are in 1,000 cubic centimeters.

100. (E) Both \(x + 1\) and \(y + 2\) are radii. So, set them equal to each other and solve for \(y\).
\[ y + 2 = x + 1 \]
\[ y = x - 1 \]

101. (C) There are 5 sections between M and T. To find the length of one of these sections, find the distance between M and T and divide by 5:
\[ \left(\frac{5}{8} - \left(-\frac{1}{4}\right)\right) \div \frac{5}{1} = \]
\[ \left(\frac{5}{8} + \frac{2}{8}\right) \div \frac{5}{1} = \]
\[ \frac{7}{8} \div \frac{5}{1} = \frac{7}{8} \times \frac{1}{5} = \frac{7}{40} \]
R is 3 sections away from M, so add:
\[ -\frac{1}{4} + 3\left(\frac{7}{40}\right) = -\frac{10}{40} + \frac{21}{40} = \frac{11}{40} \]
R is located at \(\frac{11}{40}\).

102. (H) Let \(x\) be the number of minutes Phan used his internet service in the month. Phan’s monthly charges were \(18 + 0.024x\). Since Deion’s charges were the same as Phan’s, set the expression equal to 30 and solve for \(x\):
\[ 18 + 0.024x = 30 \]
\[ 0.024x = 12 \]
\[ x = 500 \]
Phan used his service for 500 minutes.
103. (B) Create a chart using the given information and use subtraction to figure out how many cars are not red and do not have a back-up camera:

<table>
<thead>
<tr>
<th></th>
<th>Red</th>
<th>Not Red</th>
<th>TOTAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>Back-up Camera</td>
<td>4</td>
<td>6 (10-4)</td>
<td>10</td>
</tr>
<tr>
<td>No back-up Camera</td>
<td>32 (38-6)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>TOTAL</td>
<td>12</td>
<td>38 (50-12)</td>
<td>50</td>
</tr>
</tbody>
</table>

The probability of selecting a car that meet both conditions from the total of 50 cars at the dealership is \( \frac{32}{50} = \frac{16}{25} \).

104. (E) \( 0.06 = \frac{6}{100} \). Simplify the fraction to find the answer: \( \frac{6}{100} = \frac{3}{50} \) so, \( x = 3 \).

105. (C) The height of the triangle is 4 units. The length of the base is \( n - m \). So the area is \( A = \frac{1}{2}(n - m)(4) = 2(n - m) \).

106. (F) The total number of cards in the box is \( 8 + 6 + 5 + 4 + 1 = 24 \). Set up a proportion to figure out which card has exactly a 1 in 4 chance of being picked at random. \( \frac{x}{24} = \frac{1}{4} \) or \( x = 6 \). The dog card has a 1 in 4 chance of being randomly selected.

107. (C) Separate the compound inequality into two pieces:
\[ 2x - 2 \leq y \quad \text{and} \quad y \leq 4x + 10 \]
Substitute \( y = 1 \) into each inequality and solve for \( x \):
\[ 2x - 2 \leq 1 \]
\[ 2x \leq 3 \]
\[ x \leq \frac{3}{2} \]
\[ 1 \leq 4x + 10 \]
\[ -9 \leq 4x \]
\[ -\frac{9}{4} \leq x \]
The solution is the number line that shows that \( x \) is greater than or equal to \(-2 \frac{1}{4}\) and less than or equal to \( 1 \frac{1}{2} \).

108. (G) \( \frac{14}{21} = \frac{p}{7} \)
\[ 21p = 7(14) \]
\[ 21p = 98 \]
\[ p = \frac{98}{21} = \frac{14}{3} \]

109. (A) The total number of balls in the box is \( 7 + 14 + 21 = 42 \).
The probability that the ball is black is \( \frac{7}{42} = \frac{1}{6} \).
110. (G) None of the 80 students (800 – 720) who answered “no” to Question A (800 – 720) could have answered “yes” to both questions. Therefore, the least possible number of students who could have answered “yes” to both questions, can be found by subtracting the 80 who answered “no” to Question A from the 640 who answered “yes” to Question B or $640 - 80 = 560$.

111. (A) Raoul is at least 3 years older than Vahn, which can be written as

$$r \geq v + 3$$

Rewrite this inequality to match the answer options:

$$r - v \geq 3$$

112. (F) Since 5.6 ricks and 12.88 dalts are both equal to 1 sind, then $5.6 \text{ ricks} = 12.88 \text{ dalts}$. To calculate the number of dalts ($d$) in 1 rick, set up a proportion:

$$\frac{5.6}{12.88} = \frac{1}{d}$$

$$5.6d = 12.88$$

$$d = 2.3$$

113. (D) The shelf, when full, holds 36 cans. When the shelf is half full, it holds 18 cans.

$$x - 4 = 18$$

$$x = 22$$

114. (G) The probability of the cup landing on its side is 72%. Carlos tossed the cup a total of 200 times (50 + 150). The number of times the cup lands on its side is 72% of 200:

$$0.72 \times 200 = 144$$

### Answer Key for Sample Form B

DIRECTIONS: This section provides sample mathematics questions for the Grade 9 test forms. General directions for how to answer math questions are located on pages 81 and 152. There is no sample answer sheet for this section; mark your answers directly on this page or on a separate piece of paper.

1. Assume $S(x)$ equals the sum of all positive even integers less than or equal to $x$. What is the value of $S(7)$?

2. $\sqrt{16} \cdot \sqrt{196} =$

3. If $\overline{MN}$ is translated 1 unit to the left to produce $M'N'$, what is the area of parallelogram $\overline{NMM'}N'$?

   A. 3 square units
   B. 4 square units
   C. 5 square units
   D. 6 square units

4. Simplify:

   \[
   \frac{12 \cdot p}{p^4}
   \]

   E. 0
   F. $p^{-3}$
   G. $p^8$
   H. $p^{16}$

5. Water is pumped into a tank that is shaped like the right inverted cone shown above. The cone has a base diameter of 12 feet and a height of 4 feet. What is the volume, in cubic feet, of the water in the tank when the height of the water is 2 feet?

   A. $6\pi$ cu ft
   B. $18\pi$ cu ft
   C. $24\pi$ cu ft
   D. $48\pi$ cu ft
6. Straight line $l$ passes through the origin, as shown in the figure above. What is the slope of line $l$ in terms of $a$ and $b$?

E. $\frac{a}{b}$

F. $\frac{2b}{a}$

G. $\frac{2a}{b}$

H. $\frac{b}{a}$

7. The graph shows the wolf population in Yellowstone National Park since 2000. A student drew a line of best fit to model the data.

Which statement best describes the line of best fit that the student drew?

A. The line of best fit is not a strong model for the data, because the points are not close to the line.

B. The line of best fit is not a strong model for the data, because it does not pass through any of the data points.

C. The line of best fit is a strong model for the data, because both the line and the data show a negative trend.

D. The line of best fit is a strong model for the data, because about half the data points are on each side of the line.
8. To determine the price of servicing a car, a mechanic charges a fixed fee plus an hourly rate for each hour he works. If his price for 4 hours of service is $270, and his price for 7 hours of work is $420, what is the fixed fee that the mechanic charges?

   E. $50
   F. $60
   G. $70
   H. $120

9. Rectangle $PQRS$ above is rotated 180° about the origin to form rectangle $P'Q'R'S'$. What are the coordinates of $R'$?

   A. $(4, -3)$
   B. $(-4, 3)$
   C. $(-4, 1)$
   D. $(-4, -3)$

10. $\frac{15.3 \times 10^{-8}}{1.5 \times 10^4}$

    What is the quotient of the expression above, expressed in scientific notation?

    E. $1.02 \times 10^{-13}$
    F. $1.02 \times 10^{-11}$
    G. $1.02 \times 10^{-4}$
    H. $1.02 \times 10^{12}$

11. Which of the following expressions is negative in value?

    A. $4 - \pi$
    B. $3\pi - 9$
    C. $12 - 4\pi$
    D. $36 - 9\pi$

12. In the figure above, $\triangle MPR$ is similar to $\triangle NPQ$. If the length of $\overline{NQ}$ is 10 centimeters, what is the length of $\overline{MR}$ in terms of $x$?

    E. $2x$
    F. $2x + 10$
    G. $x + 5$
    H. $\frac{1}{2}x + 5$

13. The symbol $\langle x, y, z \rangle$ means $\frac{xz + xy + yz}{2}$. What is the value of $\langle 3, 4, 8 \rangle$?

    A. 15
    B. 34
    C. 50
    D. 56
1. (12) \[ S(x) \text{ is the sum of all positive even integers less than or equal to } x. \text{ 1, 2, 3, 4, 5, and 6 are all integers less than 7. Take the positive integers from the list and find the sum:} \]
\[ S(7) = 2 + 4 + 6 = 12 \]

2. (56) \[ \sqrt{16} \cdot \sqrt{196} = 4 \cdot 14 = 56 \]

3. (B) \[ \text{When } \overline{MN} \text{ is translated 1 unit left, the distance between } M' \text{ and } M \text{ is 1 unit, which is the base of the parallelogram. The height of the parallelogram is the vertical distance from } M \text{ to } N. \text{ Since } M \text{ is at } y = 5 \text{ and } N \text{ is at } y = 1, \text{ the height is } 5 - 1 = 4 \text{ units. The area of a parallelogram is base } \times \text{ height, so the area is } 1 \times 4 = 4 \text{ square units.} \]

4. (H) \[ \frac{p^{12} \cdot p^0}{p^4} = (p^{12} \cdot p^0) \left( \frac{p^4}{1} \right) = p^{12+0+4} = p^{16} \]

5. (A) \[ \text{First, find the radius when the depth of the water is 2 ft. Set up two similar right triangles as shown below:} \]

![Diagram of a cone](image)

Use a proportion to find \( x \). Since the diameter of the right inverted cone is 12 ft, the radius is 6 ft:

\[ \frac{x}{6} = \frac{2}{4} \]
\[ x = 3 \text{ ft} \]

Now, find the volume of the cone with a radius of 3 ft and a height of 2 ft:

\[ V = \frac{1}{3} r^2 \pi h = \frac{1}{3} (3^2) \pi (2) = 3 \pi (2) = 6 \pi \]

6. (H) \[ \text{Use the slope formula to figure out the slope of line } l. \]
\[ \text{Slope of line } l = \frac{y_2 - y_1}{x_2 - x_1} = \frac{2b-b}{2a-a} = \frac{b}{a} \]

7. (A) \[ \text{The line of best fit should be close to as many points as possible. In this case, very few of the points are on or next to the line. So, this is not a strong model for the data, because most of the points are not close to the line.} \]

8. (G) \[ \text{Set up the two equations and subtract them from one another to find the price per hour:} \]
\[ y + 7x = 420 \]
\[ -y + 4x = 270 \]
\[ 3x = 150 \]
\[ x = 50 \]

To find the fixed fee, use one of the equations \( y + 7x = 420 \) or \( y + 4x = 270 \) and solve for \( y \), using \( x = 50 \).

\[ y + 4x = 270 \]
\[ y + 200 = 270 \]
\[ y = 70 \]

9. (D) \[ \text{Point } R \text{ is at } (4, 3). \text{ If } (x, y) \text{ is rotated } 180^\circ \text{ about the origin: } R(x, y) \rightarrow (-x, -y). \]
\[ \text{Therefore, } R(4, 3) \rightarrow (-4, -3). \]

10. (F) \[ \frac{15.3 \times 10^{-8}}{1.5 \times 10^4} = \left( \frac{15.3}{1.5} \right) \times \frac{10^{-8}}{10^4} = \]
\[ 10.2 \times 10^{-12} \]

Then use the rule of exponents to simplify.
\[ 10.2 \times 10^{(-8-4)} = 10.2 \times 10^{-12} \]

Rewrite the answer so that it is standard scientific notation form.

\[ 1.02 \times 10^{-11} \]
11. (C) Substitute the approximation $\pi = 3.14$ into each expression and solve to find which expression results in a negative value:

$$4 - \pi = 0.86$$
$$3\pi - 9 = 0.42$$
$$12 - 4\pi = -0.56$$
$$36 - 9\pi = 7.74$$

So, the answer is $12 - 4\pi$.

12. (F) Triangles NPQ and MPR are similar, so corresponding sides of the triangles are proportional. Set up a proportion to find MR.

$$\frac{MR}{MP} = \frac{NQ}{NP}$$
$$\frac{MR}{x+5} = \frac{10}{5}$$

$$5(MR) = 10(x+5)$$
$$5MR = 10x + 50$$
$$MR = 2x + 10$$

13. In this problem, $x = 3$, $y = 4$, and $z = 8$. Substitute those values into the given equation and simplify.

$$\frac{(3\cdot8) + (3\cdot4)}{2} + (8\cdot4) = \frac{24 + 12}{2} + 32 = \frac{36}{2} + 32 = 18 + 32 = 50$$

Answer Key for Grade 9 Mathematics

1. 12 6. H 11. C
2. 56 7. A 12. F
4. H 9. D
5. A 10. F

188
1. On a practice test, there are 3 essay questions for every 7 multiple-choice questions. If there are a total of 420 questions on this test, how many of those are essay questions?

2. \[|19 - 21| + |1.9 - 2.1| - x = 10\]

In the equation above, what is the value of \(x\)?

3. \[
\frac{0.21}{0.33} = \frac{x}{1.10}
\]

What is the solution to the equation above?

4. Point Q is to be placed on the number line one-third of the distance between Point P and Point R. What number will be at Point Q?
5. How many ways can the letters in the word RAIN be arranged horizontally so that the vowels (A and I) are always immediately next to each other (either AI or IA)?

6. On the number line above, D (not shown) is the midpoint of AB, and E (not shown) is the midpoint of BC. What is the midpoint of DE?

7. A box contains 11 marbles: 7 red and 4 green. Five of these marbles are removed at random. If the probability of drawing a green marble is now 0.5, how many red marbles were removed from the box?

8. MNPQ is a parallelogram. The measure of ∠MQP is 120°. What is the value of x + y?
9. Maria is now 16 years old. In 6 years, she will be twice as old as her brother will be at that time. How old is her brother now?

10. \[
\frac{4.5}{0.1} \times 0.22 = 
\]
EXPLANATION OF CORRECT ANSWERS
GRID-IN QUESTIONS

DIRECTIONS: When filling out the answer grid, remember that each column should contain ONLY one symbol/one digit. When filling out the circles, only fill in one circle to MATCH the symbol or digit at the top of the column.

1. (126) There are 3 essay questions for every 7 multiple-choice questions, for a total of 10 questions. The proportion of essay questions is $\frac{3}{10}$. Multiply the fraction of essay questions by 420 to find the total number of essay questions: $420 \times \frac{3}{10} = \frac{1260}{10} = 126$

Since the answer is a positive whole number, skip the first column and begin inputting the digits to the answer in the second column on the left-hand side.

2. (−7.8) $|19 - 21| + |1.9 - 2.1| - x = 10$

$|−2| + |−0.2| - x = 10$

$2 + 0.2 - x = 10$

$x = -7.8$

Since the answer is a negative, begin filling out the grid with the negative sign. The answer contains a negative sign, a whole number, a decimal point, and a digit in the tenths place. Each part of the answer, including the decimal point, should be placed in a separate column, with no blank spaces between them.
3. (0.7) \[ \frac{0.21}{0.33} = \frac{x}{1.10} \]

Multiply the numerators and denominators of all the fractions by 100 to eliminate the decimals:

\[ \frac{21}{33} = \frac{100x}{110} \]

Simplify the fractions:

\[ \frac{7}{11} = \frac{10x}{11} \]

\[ 7(11) = 10x(11) \]

\[ 7 = 10x \]

\[ x = \frac{7}{10} = 0.7 \]

Since the answer is a positive decimal, skip the first column and place the zero in the second column on the left-hand side.

4. (−2) First, find the length of \( PR : 4 - (-5) = 9 \) units.

Point Q is located \( \frac{1}{3} \) of the way from P to R, so calculate where that point would be:

\[ 9 \times \frac{1}{3} = 3 \text{ units} \]

So, point Q is located at \( 4 - 3 = 1 \). Finally, calculate the midpoint of \( PQ \):

\[ \text{Midpoint } \overline{PQ} = \frac{-5 + 1}{2} = -2 \]

Since the answer is a negative single-digit, fill in the negative sign and the second column contains the digit, 2.
5. (12)  There are three positions for the letters AI in the four letter combinations:
   AI _ _, _ AI _, _ _ AI

   For each of those positions of A and I, there are two combinations of the letters R and N: AIRN, AINR, RAIN, NAIR, RNAI, NRAI. Thus, for the letters AI (in that order), there is a total of 6 combinations. The question indicates that IA is also possible, so there are also + combinations with the letters in the order IA. The total number of combinations is $6 + 6 = 12$.

   Since the answer is a positive whole number, skip the first column and begin inputting your answer in the second column.

   6. (1.25)  Calculate the midpoints of $\overline{AB}$ and $\overline{BC}$ to find the locations of D and E, respectively:

   Find the midpoint for $\overline{AB}$ (Point D):
   \[ D = \frac{-8 + 3}{2} = \frac{-5}{2} = -2.5 \]

   Find the midpoint for $\overline{BC}$ (Point E):
   \[ E = \frac{3 + 7}{2} = 5 \]

   Now, find the midpoint of $\overline{DE}$:
   \[ \frac{-2.5 + 5}{2} = \frac{2.5}{2} = \frac{5}{4} = 1.25 \]

   Since the answer is a positive decimal, skip the first column. The response begins in the second column on the left-hand side.
7. (4) There were 11 marbles in the box. After 5 marbles were removed, the total number of marbles in the box is now 6. The probability of drawing a green marble is now $\frac{1}{2}$, which is equivalent to $\frac{3}{6}$, thus, 3 green marbles remain in the box.

Originally, there were 7 red marbles in the box. Since there are now 6 total marbles, there are now 3 red marbles. Meaning 4 red marbles were removed from the box.

Since the answer is a positive single-digit whole number, skip the first column and the response begins on the second left-hand column.

8. (55) In a parallelogram, opposite angles are congruent. Since the question states that angle MQP is 120°, then angle MNP must also be 120°. Use this information to find $x$:

$$3x = 120$$
$$x = 40$$

Adjacent angles in a parallelogram are supplementary (sum of 180°), so the sum of angle MQP and angle NMQ is equal to 180°. Use this information to find $y$:

$$4y + 120 = 180$$
$$4y = 60$$
$$y = 15$$

The question asks for the value of $x + y$, so

$$x + y = 40 + 15 = 55$$

Since the answer is a positive whole number, skip the first column and begin inputting the digits to the answer in the second column on the left-hand side.
9. (5) When Maria is 22, she will be twice as old as her brother.

Let \( x \) = the age of Maria’s brother when Maria is 22.

\[ 2x = 22 \]
\[ x = 11 \]

To find Maria’s brother’s current age, subtract \( 11 - 6 = 5 \).

Maria’s brother is currently 5 years old.

Since the answer is a positive single-digit whole number, skip the first column and the response begins in the second left-hand column.

10. (9.9) In order to solve this problem, first convert \( \frac{4.5}{0.1} \) to a whole number by multiplying the numerator and denominator by 10 to get \( \frac{45}{1} \) which is 45.

Multiply:

\[ 45 \times 0.22 = 9.9 \]

Since the answer is a positive whole number with a decimal, skip the first column and begin inputting the answer starting in the second column on the left-hand side.
1. STUDENT STATEMENT: I am well enough to take this test and complete it. I understand that once I break the seal of the test booklet, I may not be eligible for a make-up test. I am a New York City resident and a Grade 8 student taking a Grade 8 test. I understand that a student who is not a New York City resident, who takes the test more than once in a given school year, or who takes the test at the wrong grade level will be disqualified from acceptance to any of the specialized high schools.

1. STUDENT STATEMENT: I am well enough to take this test and complete it. I understand that once I break the seal of the test booklet, I may not be eligible for a make-up test. I am a New York City resident and a Grade 8 student taking a Grade 8 test. I understand that a student who is not a New York City resident, who takes the test more than once in a given school year, or who takes the test at the wrong grade level will be disqualified from acceptance to any of the specialized high schools.

Signature (full name, first name first): ________________

2. TODAY’S DATE: ___________________ 3. DATE OF BIRTH: ___________________

CAREFULLY RECORD YOUR NAME, SCHOOL CHOICES, DATE OF BIRTH, INFORMATION ABOUT THE SCHOOL WHERE YOU ARE NOW ENROLLED, AND STUDENT ID NUMBER.

USE A PENCIL ONLY. INCORRECT MARKS MAY DELAY THE SCORING OF YOUR ANSWER SHEET.

4. FIRST NAME (please print) ___________________ MI _______________ LAST NAME (surname) (please print) ___________________

5. CHOICES OF SPECIALIZED HIGH SCHOOLS
Indicate your school choice in order of preference. Fill in only one school for each choice. You must fill in a first choice school. Fill in only one circle in a row and only one circle in a column.

School choices indicated on the answer sheet are final.

CHOICES

SCHOOLS

Bronx Science
Brooklyn Latin
Brooklyn Tech
HS Math, Sci., & Engineering
HS American Studies/Lehman
Queens Sci./York
Staten Island Tech
Stuyvesant

6. DATE OF BIRTH: ___________________ 7. SCHOOL WHERE YOU ARE NOW ENROLLED

NAME OF SCHOOL ___________________

School Code ___________________

Fill in for private or parochial schools only

8. STUDENT ID NUMBER

9. BOOKLET LETTER AND NUMBER
